Why Mary Smiles

Mary had a little ad,
Just a line or so,
And everywhere the paper went
That ad was bound to go.
It went with people to their homes,
It worked without a stop,
And Mary smiles because it crowds
Her millinery shop.

A single female fly lays from 120 to 150 eggs, which hatch out in from 8 to 10 hours. These are mature and ready to lay themselves in 20 days. For every female fly killed now there will be several million flies the fewer to be killed in August, so it would appear to be a good thing to begin the swatting season with the appearance of the first fly.

The Haldimand Banner has again changed hands. A. T. Michell, the late proprietor, has had charge for the past seven years which has been very successful to him. The new management will be known as The Haldimand Banner Printing Co., and we hope the same liberal patronage will be accorded the new firm as to their predecessor. Mr. Mitchell has accepted a position as Managing Editor of the Yorkton Times. Yorkton, Sask., and leaves next week.

Now is the time to take a glance over your backyards and devise some plan to ostracise the fruit cans and rubbish which have accumulated since the last installment was removed. You can generally judge of the occupants of a house by condition in which the front and back yards are kept. In a general sense we all pride ourselves on being cleanly and tidy. House and its surroundings above all places in the world should be scrupulously guarded against contaminating influences.

Mrs. Mary Belt and family leave on Wednesday next, May 1st, for Toronto where they purpose making their future home, and their removal is viewed with much regret not only by their own congregation but by the whole community. Mrs Belt will be particularly missed in our village, especially in the Episcopal church where she has labored faithfully and well in the upbuilding of the church and welfare of Christ, which was dear to her heart. May the richest blessing follow her and her esteemed family to their new home and may it there abide is the fervent wish of all.

Frequently you pick up a local paper, and after glancing at the head lines wearily, thrust it aside, remarking nothing in the paper this week. Did you ever stop to think for one minute what the phrase meant—"Nothing in the paper this week," It meant that in the week just passed, no misfortune had befallen to anyone in our town; that the grim angel of death had crossed no threshold of a friend; that no fire had wiped out our neighbors worldly goods; that no man had taken the life of a poor fellow human; that no paper devil, haunted by the past or misdeeds of some other had crossed the great divide by his own hand. So the next time you pick up a paper that does not announce a tragedy, give a little thanks instead of grumbling because there is no news.

In a circular on eggs, the Dominion Department of Agriculture states that 17 per cent. of the eggs marketed in Ontario and Quebec are unfit for food. About two out of a dozen on the average are bad. The deliberate marketing of bad eggs should be a penal offence, on a par with the facing of fruit or the giving of short measure or light weight. It is just as much a fraud on the consumer.

That the Toronto board thought Dr. Noble's position on the school age correct is shown by the fact that it voted unanimously with him. We believe it was wise to do so. Six years a child is entitled to for the purpose of upbuilding its body. We should not begrudge it seven years. but circumstances generally preclude such a long preparation for school life. If a child begin school at six, and be not pushed to hard, it is likely to go through its school life successfully and to finish in a condition to begin its work in the world well equipped mentally and physically.

The many touching and kindly references made to the great ocean horror in the churches throughout Canada Sunday were feelingly expressed. The disaster brings men together. They differ about creeds; they split on points of doctrine; but they are still brother men in sorrow.

This is the season of the year when everybody should cheer up. The growing time is at hand when nature begins to assert itself in new form and to give of her bounties for the benefit of mankind. If winter lingers long in the lap of spring, as it is doing this season, do not become pessimistic and feel that nature in some way has slipped a cog and has turned away from you. Cheer up, seed time will come again and the snow and frosts will disappear This season will prove no exception to the rule. It is better to have winter conditions now than a month hence, after a considerable portion of the seed is in the ground. If when real spring conditions do come, they come to stay, the farmer will fare better than having an early spring, with cold bleak weather following.

Caveat Dismissed

When the executor of the late Munns Rhora, a Haldimand County farmer, renounced his right as executor of the deceased's will because he had gone to live in the United States, George Eyers applied to the court for letters probate William Henry Rhora, a son, objected and filed a caveat against the probate on the grounds that the will was made by his father at a time when he was not mentally capable of making a will.
