Soybean growers will be interested in the development of a chemical growth regulator presently being tested at the University of Guelph. The chemical known as TIBA will be marketed under the trade name REGIM-8 in 1968. This chemical is applied when soybeans are just beginning to flower to cut down the growth of the vegetable part so that more energy is available for the development of pods and seed. This treatment is most suitable where narrow rows are used. Researchers estimate the cost of TIBA to be relatively low since only four-fifths of an ounce actual chemical per acre is required.

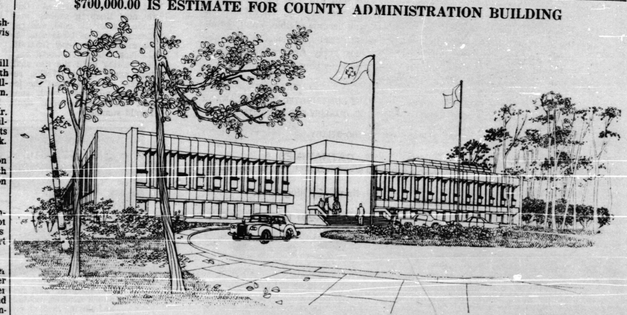
$700,000.00 IS ESTIMATE FOR COUNTY ADMINISTRATION BUILDING



The estimate of $700,000.00 for the proposed new County Administration Building was the subject of considerable debate at the meeting of the County Council last Friday.

Five years ago when the decision to provide such a facility in the County was first made the Councillors were thinking in terms of. perhaps, -300,000-00 as the cost of such a building. Nothing gets cheaper these days it seems

Reeve Cecil Johnson expressed concern over the cost and suggested to Council members that, perhaps, it would be wise to take another look at the requirements and try to determine more specifically if the expenditure is wise. He found little support for this view among his fellow councillors. Reeve Courtenage, of Hagersville, pointed out the steadily advancing cost picture over the past several years could very well add to the over-all cost by 10 percent in another year.

The by-law to borrow $700,000.00 was given second reading and will be sent to the Ontario Municipal Board for their approval.

Council also approved a motion introduced by Mrs Lorna Miller, Reeve of Dunnville to hire two part time health inspectors, a medical officer of health and five public health nurses
