Dear Sir: - I assure you I feel grateful to the radical cure you have effected in my throat trouble, and though I dislike having my name appear in connection with the testimonial business, yet, having a regard for those who are similarly afflicted, as well as having a desire to recognize the results of your treatment, I make a departure in this case. Prior to my acquaintance with you, I suffered for two years from repeated attacks of catarrhal sore throat, each succeeding attack being more prolonged and violent than the former. At these times I had violent fits of coughing, and would discharge endangers health, life, peace and morals, language than a dozen, and if Volapuk large quantities of mucus. Reeing you advertised to visit this place, I thought I would consult you although I confess with not much hope of receiving any henefit. However, I was favorably impressed with your candor, and resolved to give your treatment a trial. The result, I am happy to inform you, is a samplete cure, and one so marked in its actment or satisfied the expectations of great convenience, and no young man's character as to surprise both myself and my friends. From the first your medicine seemed adapted to my case and give relief. In two months I was entirely well, and have so continued during the most unfavorable season of the year. Such a conclusion impeaches the wisdom and power of both God and man. There must be remedies for all evils and humbugs, or God's government is a humbug and failure.

If there are evils which peril the existence and well being of the State, then human governments are a delusion and a snare.

WHAT MAKES A GREAT NATION.

Do we clearly know in what a nation's greatness exists? Whether it be great or little depends entirely on the sort of men and women it is producing. A sound nation is a nation that is composed of sound human beings, healthy in body, strong of limb, true in word and deed, brave, sober, temperate, chaste, to whom morals are of more importance than wealth or knowledge; where duty is first and the rights of man are second; where, in short, men grow up and live and work, having in them what our

ancestors called "the fear of God." It is to form character of this kind that human beings are sent into this world, and those nations who succeed in doing it are those who have made their mark in history. They are Nature's real freemen, and give to man's and value. Therefore all wise statesmen look first, in the ordering of their national affairs, to the effect which is being produced on character; and instihappiness and safety, and to secure these and methods of life are measured and
