LOCAL BOYS PLACE HIGH IN THE CANADIAN WINTER RALLY

Two local boys representing the Lynn Valley Sports Club, made a splendid showing in the British Empire Motor Club's recent rally.

Philip Hare and Richard Dickerson finished sixth over all in an entry of 102 cars from all over Canada an dthe U.S.A. They also finished 2nd in Class and 2nd private entry.

The rally took them from Toronto through country roads to Ottawa, a ten hour rest in Ottawa, then to St. Jovite, Quebec and back to Toronto. A total distance of over 1200 miles of snow packed and ice covered roads. Phil and Dick have been together on several Winter Rally's and this is their highest finish yet.

Phil drove his own car, a Volvo and Dick is the navigator. They say they are going to win it yet. Good Luck, Boys.

THE THINGS OF YESTERYEAR

At this time everyone is thinking about bygone times and I thought it might be interesting to recall some of the things of yesteryear. By that I do not mean antiques but things that were familiar every day objects to many of us; some of which, in fact, are still being used. To the majority of our boys and girls, however, these are either unknown or known only as objects of curiosity.

Take the oil burner cook-stove. It had two, three or four burners, each burner being a round wick. Over the burner was a metal chimney. Besides the cooking surface was a high back, enamelled white, with a shelf near the top. Along with that was the coal oil lamp in various shapes and sizes. How many of our High School students know what a "Coleman Lamp" was? Speaking of stoves, many of us well remember the coal or wood burning kitchen cook stove, some of which are still in use. Not long ago I had a delicious roast beef dinner cooked on such a stove. The hostess and her sister, both Indians, were not only gracious ladies, they were also excellent cooks. But such stoves are rarely used now. I do not recall ever having seen in recent years a truckload of wood blocks for firewood, and very few loads of coal. For heat there was the box stove and the "Quebec heater." The one burned wood only, the other gave best results with coal. I once had a woodburning hot air furnace. The wood for the cookstove had to be split. There are axes in use all around us today, but how many are used to hand split wood on the chopping block? Speaking of tools and implements, the hand rake used to be a very light instrument with wooden teeth. I do not suppose any are now in use, for is the one horse rake that lifted at the end of each row to dump the hay, which was thrown on the waggon by hand and trampled down by the kids, now in use, than or cows is still being done, but what about the Spring tooth? This was an ungainly machine that had to be turned by hand to separate the milk from the cream. It had many, many intricate parts and a farmer's wife had to wash all these parts in very hot water, after going the dishes. Clothes were washed on the scrubbing board in a big galvanized tub, and it was hard work, especially the farmer's big overalls. There were no fancy detergents, just a cake of hard soap. In the public schools today much emphasis is laid on art. I wonder if any of the girls and boys could draw a scrubbing board, from memory if you have seen one, or as you think it looked if you have not. (no prizes offered)

Most of the younger generation have seen a buggy, even if only in a parade, but how about a democrat or express waggon? This was a light one horse vehicle with springs. Behind the driver's seat was a long shallow box for carrying things in. Usually a back seat could be easily installed here. Again, cutters are not uncommon but how many have sen a sleigh drawn by two horses for carrying what we would call freight? Incidentally, I have always wondered why a really stylish cutter had a fur robe hanging over the back of the seat. Was it just for show? It would have been more useful over the knees of the occupants.

Many things that we have they did not have, one being the radio. Without electricity they could not have had it as we know it, but the first radios were powered by a battery. It was the Rogers people who introduced "plug in" radio. There used to be a story going around that when Marconi invented the radio and turned up the volume, there were Amos and Andy, going strong. Today we might say that he heard "Toast and Jamboree"

During the long winter evenings, lit by lamplight, the ladies would sometimes make quilts, not the patchwork kind but beautifully embroidered or applqued. Some of these are now heirlooms with those lucky enough to have one.

P.S. If I have made mistakes or left something out, please write to the Editor about it.

ENCOURAGING REPORTS HEARD AT UNITED CHURCH ANNUAL MEETING

Encouraging reports were heard at the Annual Congregational Meeting in Wesley United Church, held recently. The minister in his message to the people noted the fact that the two churches on the pastoral charge had raised together $19,543.00— $2,600.00 more than in 1965, of which $15,170 was Wesley's share. Of these amounts $3,317.00 was for Missions. Benevolences and Capital Funds "They tell the story of a people's faithful stewardship of time, talent, and material possessions and represent not only a loyalty to the larger work of the United Church of Canada."

Mr. Ralph Gowan was appointed secretary for the meeting, and the reports of the organizations were received from the printed annual statements.

In the elections which follow ed the Rev. John Duffy, B.A., B. D., now a member of the congregation, was appointed an honorary elder, and Messrs. Ralph Gowan, John Deller, Lea Marshall, and Newton Marshall, were elected elders for three years. Elected to the Committee of Stewards for three years were Messrs. Reg Leatherdale, Klaas Druyff, Ken McDowell and John Brintnell. Bruce Riley was elected an honorary steward in his capacity as envelope steward.

On motion of Murray Bousfield a vote of thanks was expressed to the Rev. F. C. and Mrs. Bayes for their leadership during the year, and Mr. Bayes in offering thanks, paid tribute to all those who in any way had contributed towards making 1966 a profitable and rewarding year in the on-going life of Wesley Church

WEDDING

McKEEN — SCHWEYER

Revered G. Taylor-Munro officiated at the double-ring ceremony of Diane Schweyer and James McKeen in Knox Presbyterian Church, Jarvis. The bride is the youngest daughter of Mr. and Mrs Keith Schweyer of Selkirk and the groom is the son of Mr. and Mrs. Jack McKeen of Jarvis

Given in marriage by her father the bride wore a street-length gown of white satin and lace and carried a bouquet of white nosegay mums and yellow roses. The bride's attendant, Miss Sandra Waterbury of Selkirk, was dressed a street length gown of mint green chiffon over taffeta with a bouquet of white mums. Attending the groom was Mr. Ray Nopper of Jarvis.

Following the ceremony a dinner for the immediate families was held in the Cove Room at Port Dover and an evening reception for friends and relatives was held at the home of the bride's parents

The couple were honoured by several showers given by friends and relatives and a community shower was held in the Cheapside Hall.

The couple are now residing at 395 West Street in Simcoe.

IN MEMORIAM

STONE — In loving memory of a dear wife and mother who passed away February 24, 1965.

Nothing can ever take away
A love a heart holds dear.
Fond memories linger every day,
Remembrance keeps you near.

— Keith, Louise and Randy

There Will Be Changes Made In Nanticoke and Area

The following is a report of the editor who, last Friday, was given a glimpse of the immensity of Ontario Hydro's responsibility in providing the facility we all, now, take as matter of fact, and the part the new Nanticoke Generating Station will play in contributing to the overall requirements of the system.

THE ANNOUNCEMENT of Ontario Hydro chairman, George E. Gathercole, on August 31, 1966, at the Canadian National Exhibition, when he addressed the Electrical Day luncheon, that plans were in the offing to build a coal-fired thermal-electric station on the shores of Lake Erie, was the start of many rumors, in this area, that Nanticoke might be the site.

On January 12, 1967, Mr. Gathercole confirmed that the site of the Commission's new thermal generating station would be at Nanticoke.

The Plant, which will be built is just east of Nanticoke on the Lakeshore, and a total of 770 acres of land is involved in the project. This involves something like seven farms. Negotiations for the purchase of two farms have now been completed. Negotiations continue on the remaining five.

Middle-aged residents may wonder why this plant is being built. Back in 1906, when Ontario Hydro was formed, only water power was considered as a means of producing electricity. The flow of water on the Niagara River and the development of hydraulic plants at Niagara Falls was, in the minds of most people, the only way electricity could be produced. While this means of electrical production still produces most of the electricity used in the Province these resources have been used up and new means must be found to meet the needs of the 2,000,000 customers of Hydro and the anticipated doubling of that need every decade in the future.

It is estimated that thermal electric stations — such as the one to be built at Nanticoke — may supply two-thirds of Ontario Hydro's power requirement as early as 1980.

Ontario Hydro chose coal for its conventional thermal-electric plants because no other fuel could compete in price or availability. Vast quantities are needed. For example, the plant at Nanticoke, fully operational, will require 600 tons of coal an hour, enough to keep a home furnace operating for 100 years. This fuel will be brought into Nanticoke from the Pennsylvania Coal fields by ship. This will require docking facilities extending into the lake for, perhaps, 2,250 feet. These carriers will be self unloading into a stock pile that will require about 30 acres of land space that will accommodate about 2,500,000 tons. From the stockpile it will be fed, by conveyor belt, to the powerhouse where it is pulverized and eventually goes into the furnaces. These furnaces have a capacity of 110 tons of coal an hour.

The Nanticoke Plant will have an initial capacity of 1,000,000 Kilowatts late in 1971. A second unit will increase this capacity to 2,000,000 Kilowatts (greater than the present Hydraulic production of Niagara) by 1972 It is still possible that this production may be doubled at a later date, determined by the circumstances that develop.

When the proposed production of 2,000,000 Kilowatts (in 1972) is accomplished, the station will require 600,000 gallons of lake Erie water every minute for cooling purposes, converting steam into water in the station's condensers.

Last Friday we were given a first hand look at the only similar thermal producing facility in Ontario. It is located at Lakeview, just west of Toronto on the shores of Lake Ontario.

This experience was provided through the courtesy of the Public Relations Department of Ontario Hydro. Mr. Leo Vamplew, in charge of public relations in the Niagara area, brought us into contact with the senior officials of Ontario Hydro, at the Lakeview plant and the entire system, when any question we could conceive of was responsibly answered. This Thermal-Electric development at Nanticoke will be, almost, beyond human comprehension.

The Nanticoke plant will be the most modern and up-to-date of any development yet in the colossus of power sources. The results of research enables the Commission to build larger units of production than could have been accomplished when the Lakeview plant was built. Each unit there is of 3,000,000 Kilowatts capacity. At Nanticoke each unit will be of 5,000,000 Kilowatts capacity.

Preliminary construction (site preparation) is slated to begin in the early spring of 1968. First concrete pouring is scheduled for the fall of 1968. The powerhouse superstructure will be of steel frame construction with insulated aluminum siding.

Since the site of this development included the site of the Jarvis intake and pumphouse for the Jarvis waterworks system, we were pleased to learn that if this should conflict with Hydro's building arrangements, the Commission will provide a system which is equal to or better than the existing one.

Other things we learned: Requirements for a railway spur line are still under study; The possibility of bringing fuel in from across the lake via a pipeline — still under study; The fly ash from the furnaces will be disposed of on the property in a man-made lake — area not determined; Dust collectors will reclaim 99.5 percent of all air polluting materials; By early 1971 it is expected the water force will reach a peak of about 1500; a staff of 175 to 200 will be required to operate the plant upon completion; local labor will be employed when and where possible.

The location of the electric producing plant at Nanticoke will not, necessarily, be an inducement to industry to locate there. The power will be fed into Hydro's provincial grid transmission circuits (the route not yet determined) and re-directed to the power needs through

(continued on page three)

ATTENTION BANDSMEN —

Anyone interested in becoming a member of the Jarvis Christian Brass Band "Crescendo" is invited to come to any practice in the Jarvis Christian School every Wednesday night at 7 P. M. sharp Phone Robert Lenos 587-2743, Leatherdale's Variety Store 587-2292 or Rusty More 587-2223 for further information.

FREE INSTRUCTION FOR BEGINNERS

Free private instruction is available for beginners, both boys and girls, ten years old or over. Instruments available free of charge.

BIRTHS

BEST—To Mr. and Mrs. Harold Best, R R 2, Hagersville, a daughter, Sherry Lynn on Sunday, February 19, 1967, a sister for Scott, at west Haldimand General Hospital, Hagersville, Ontario.

WILLIAMS—To Mr. and Mrs. Andrew Williams, 159 Argyle St., Caledonia, Ontario, a son, on Monday, February 20, 1967, at West Haldimand General Hospital, Hagersville Ontario.

BINGLEMAN — To Mr. and Mrs. Ross Bingleman, R. R. 2 Fisherville, a daughter, Ila Mae, on Tuesday, February 21, 1967, a sister for Grant, Earl, Marie and Keith, at the West Haldimand General Hospital, Hagersville, Ontario.

PERRY—To Mr. and Mrs. Mervin Perry, R. R. 5, Hagersville a daughter, Shelly Jean, 7 lbs 13 ozs., on Tuesday, February 21, 1967 at West Haldimand General Hospital, Hagersville, Ontario

NOPPER—John and Donna of Hagersville are happy to announce the birth of their son Donald William, 7 lbs. 8 oz., on Wednesday, February 15, 1967, at West Haldimand General Hospital, Hagersville, Ontario.

—o—

OBITUARIES

MRS. HERBERT JONES

Bertha Christina Shaw, beloved wife of Mr. Herbert Jones of Jarvis passed away quietly on Friday, February 17th in West Haldimand Hospital, Hagersville, after a lingering illness.

Born in Charlotteville, she and her husband resided in Townsend for forty three years where they engaged in farming, retiring to Jarvis twelve years ago.

Mrs. Jones was very active in the Women's groups of Knox Presbyterian Church until ill health confined her to her home. She is remembered as one who was kind to those who were ill and shut in.

Besides her husband she is survived by two daughters, Rhea (Mrs. Clarence Struthers) of Stratford, Mrs. Eleanor Hammond of Jarvis, and one son Wray of Fenwick. There are four grandchildren and seven great grandchildren.

Funeral services, conducted by her minister, the Rev. G. Taylor-Munro, were held at the McKenzie-Hyde Funeral Home Hagersville on Monday afternoon with interment in Oakwood Cemetery.

Pallbearers were J. A. Duncan, Wray Walter, Cecil Beckerson, Wray Craddock, Jack Cooke and Jack Doughty.

—o—

JAMES B. LAIDLAW

James B. Laidlaw, 84, of Hagersville, died Tuesday at Henderson General Hospital, Hamilton. Born in Walpole Township, he operated a general store at Willow Grove for many years before moving to Hagersville He was the son of the late Robert G. Laidlaw and Jane Anderson.

His wife, the former Ellen McKenzie, died in 1964 Surviving are a daughter, Mrs. Lawrence (Vernice) Embury, Brookings, S.D., one brother, Frank, of Seattle, and sisters, Mrs. Elizabeth Keen, Jarvis, and Mrs. Freeman (Dora) Nixon, of Hagersville.

Funeral service will be held on Friday at 2 P. M. at the William I. Mott Funeral Home, Hagersville with the Rev. Kenneth Matthews officiating. Interment will be in the Hagersville Cemetery.

THE STORY OF THE Jarvis Christian Brass Band "Crescendo"

For those who are not familiar with the band of Jarvis I decided to write a story about our band's activities By doing this I hope it will clear up a lot of misunderstandings about our band being a Dutch organization, which it certainly is not.

The Jarvis Christian Brass Band "Crescendo" (to which I will refer from here on as the Band) was founded in the spring of 1955 by a number of members of the Jarvis Christia Reformed Church. Several people who used to play in a band were called on and asked to be present at a meeting held in the basement of the Canadian Christian School of Jarvis. About twenty interested people were present at this meeting and it was decided to make a loan at the Royal Bank in Hagersville of $2,000 to buy the instruments required to form a band. Also at this meeting a board was selected from those present and Mr. Bob Elzinga was elected as president. The instruments were purchased through Mr. Andrew Sabota who was at that time the director of the Hagersville Band. As soon as the new instruments arrived the first practise was held on a Wednesday evening under the direction of the late Mr. Jake Huzinga, a former resident of this area. At that first band practice it sounded more like the world was coming to an end than it did a musical sound but once things were straightened out the matches and songs started to sound more the way they should. Shortly after the band started our director, Mr. Huzinga informed us that the task was getting too much for him and Mr. John Bussink was asked to swing the stick which he did very successfully for approximately two years. During the leadership of Mr. Bussink we participated in many different activities such as parades, band concerts, band festivals and even had the opportunity to play at the Simcoe Fair.

During these two years we lost members and gained new ones. One new member, I want to tell you about in a few more details. He walked into our band practice one night about 8.30 and sat down in the back of the basement and listened to our playing. At intermission, he introduced himself as Ray Tuinhof and told us that he was interested in joining our band. We told him we were happy to have him and handed him a trumpet so he could play with us after intermission. Some of us member thought we were pretty good players but when this man started to play we sounded as if we had never played an instrument before. About a half year after that a new problem arose. John Bussink informed us that the job of director had become too much for him and said that he was not able to bring the band to a higher standard. We therefore asked Ray Tuinhof to take over John's job as director which he accepted and is still doing at the present time. We are very grateful to have a man like Ray who is very capable of doing his job, which he does with a lot of patience and enthusiasm and I know for sure that I speak for the entire band when I say that if it was not for Ray our band would not exist any more, because the things he did for the band with the help of God are innumerable.

Let...the ma...

Now I come to a point where I would like to say something about the nationality of the band. Many Canadians refer to the band as the Dutch Band. Why? If our band was a Dutch band, it would have to be operating in Holland. I would rather refer to it as a Canadian band located in Jarvis, therefore The Jarvis Band with a lot of members of Dutch origin. Besides we have the privilege of having some outstanding Canadians and residents of Jarvis like Rusty More and Coyne Leatherdale, who are very active members of our (your) band. So the next time you see the band parading down the Jarvis Main Street, please be proud of us and say "There goes The Jarvis Band, the only brass band left in Walpole Township."

We hold our practices on Wednesday evenings from 8 till 10 o'clock, in the basement of the Jarvis Canadian Christian School. Maybe you have wondered why our band is called Jarvis Christian Brass Band. The reason for this is that we feel as Christians that if we centre our activities around God without whose help nothing is possible, we can have a band that will remain a band for a long time. What do we do as a Christian band at our practise nights? Before we start our playing the president leads in a word of prayer, in which he asks God for a blessing for the evening. After we play a hymn to glorify God. Then our regular practice starts usually by playing a march to warm up and then we proceed with overture etc. At 10 o'clock the president closes again with thanksgiving in which he asks God to be with us when we are homewards bound and to bring us together again on the next practice night. About ten years ago there were several bands in this area, but at the present time the Jarvis Christian Brass Band is the only one left. Now I want to ask you one question! Do you think or believe that the way we run our band with the help of God is the reason for our band to survive and other bands to fail? I do!

At the present time we have about twenty members and at this time I would like to ask the help of the people of Jarvis and surrounding area. We are willing to teach you, your sons and daughters to play an instrument from our band. There is no charge involved until you are ready to become a playing member of our band. From there on you pay 50c a week to help cover costs of music, instrument purchase and repairs, which by the way is very costly and of course also to help pay our diretor. If you already know how to play a band instrument I would say "Aunt Jemima, what took you so long?" We want you very much so please don't be bashful and join us on Wednesday evenings. For those who would like to learn you can contact Robert Lenos, 587-2743 or Rusty More 587-2223.

Wouldn't it be wonderful if we could make this Centennial
