CURRENT NOTES.

An Oregon Judge has refused to grant naturalization papers to a pugilist on the ground that "it is contrary to public policy to confer citizenship trouble began with apoplexy and upon one whose avowed occupation is the violation of law." The doctrine seems to be sound. If carried out in its integrity it will cut of others besides pugilists.

Gen. Boulanger received the news of his sentence to imprisonment while dining in London with Lord Delaware. Boulanger was eating grouss when the news was brought to him. He calmly continued his meal, smiled constantly and pretended to be not at all disturbed. But it was noticed that he seemed to have lost his appetite.

A Chicago 'paper recently gave the names and nationalities of the men, owns them and compels me to live in previous Sunday for crimes of one kind and another. It did so to show the carnival of crime witnessed there on the first day of the week. Some 200 names were printed, and to the credit of the Canadian colony, there was not a Canadian among them. It is now apparent that the principal objection to use of electricity for dispatching criminals comes from the firms making electric light and using electricity for business purposes. The system adopted by the New York State authorities for killing criminals was the Westinghouse alternating current as against the Edison direct current. The Westinghouse people are strongly supporting Kemmier's counsel in his attempt to have the punishment declared unconstitutional, as they do not want their business associated with so ignoble a purpose as that of killing men.

We ascertain that it is a mistaken idea that the tariff, hid down at the recent meeting of the Miller's Association of this district, has been adopted by the members as a rule to stringently adhere to. The table was prepared in these ages; but youth and health and order only that a test might be made of vigor are ordinarily at their highest the feelings of the farmers in regard to perfection between these two periods. it. The new sliding railway at Paris, by which it is said to be demonstrated that by a curious combination of compressed air and water at high pressure, will render it possible to drive a train on slides at 100 miles an hour at one-tenth the consumption of coal at present needed by Tocomotives. There is no smoke, no noise, and next to no danger. The train can be pulled up in thirty yards, can climb up gradients of sixteen inches in the yard, and run on curves of forty-four yards radius. There is almost no consciousness of motion; you simply enter the car and in an hour you are 100 miles from where you started. If this be true, the world is on the eve of a revolution as great as that of steam, and, although very small, will so shrink that we shall be next door neighbor to everybody else.

A Long Fast Ends in Beath.

Robert Marvel, of Indianapolis, Ind. after fasting 67 days, died last Tuesday, Aug 20, aged 85. On June 13, Mr. Marvel ate his last "square meal." For 36 days he took absolutely nothing into his stomach. On the thirty-eighth he bit off a piece of pie, but did not eat it. On the thirty-ninth day he drank a little milk, and at irregular periods continued to do so. All told, he drank not exceeding one gallon of milk in the 67 days of his fast. He was reduced to a living shadow. After fasting a full month he one day arose from bed, and seizing a pan of water, drank some of it. After that milk and water were left near him, and occasionally he would rise and drink a little. During the last week Marvel was bed-fast, except at times when he would spring up and wander about the house and porch. Sores came upon him by reason of his long confinement. His fast is the longest on record so far as known. His paralysis.

Sun Baths Better Than Shade Trees.

"There is such a thing as having too much of a good thing," remarked a Cass avenue man to a friend. "I like tress, but I don't like to live in the woods. Every glimpse I get of heavens or earth from my windows in summer is caught on the fly, as it were, between the branches of the trees.'

"Why don't you cut them down?" inquired his friend.

"I would cheerfully, if they were my own, but unfortunately my lindlord houses in Detroit that never have a Country. Address, glint of sumshine from May to November and the people in them are as bilious as East Indians. The average Detroiter is afraid to trim his tress so that they shall present a respectable appearance, and you can walk up any of the avenues and count hundreds of lopsided, awkward looking trees, that have run all to branches. The result is damp houses, malaria and typhoid fever."

"I haven't any trees," said the friend. "If I had I would go home and burn them after such a picture as that." "It is the truth. We live too much in

the shade. Sun baths are better than shade trees of forest growth. It is well enough to shade the streets, but not the houses. Facts are facts, sir."-Detroit Free Press.

When Women Should Marry.
