and Abroad Appear Present Time-Decidedly Above the

Average in Canada, An Ottawa despatch says: Crop report from sixty district correspondents in Ontario show reason for gratification at the prospects. All speak of the excess of rain doing much damage on the lowlands, but in spite of this the crops are, on the whole, nearly everywhere pronounced decidedly above the average. Grain is doing splendidly. Wheat, oats and rye are ail far better than usual. Barley is good, peas excellent and most of the root crops are doing well. Potatoes, however, are seriously damaged by the wet, and so is corn. Hay is scarcely up to the average and fruit is considerably injured. Further heavy rains will injure the whole harvest seriously, but, on the other hand, average fine weather now will give far more abundant harvest than usual.

A cablegram gives information as to the present condition of the European crops, from which it would appear that recent statements as to the extent of damage have very little foundation. Great Britain, France, Germany and Italy appear, as regards the crop outlook, to be in a highly satisfactory condition; Austria-Hungary and Hungary moderately so; while in Russia the latest estimate is that the wheat crop has been damaged to the extent of 25 per. cent. by drought.

SWORN BY A ROOSTER'S BLOOD.

The Strange Oath Taken by a Chinese Wit

ress in Philadelphia. A Philadelphia despatch says: A strange scene was presented in Judge Bregy's Court when the most solemn of Chinese oaths was administered to Lee Bang, a celestial witness. A rooster was brought into court and set down beside the witness-stand where a square of muslin had been placed. Candles and joss-sticks were lighted in a cuspidor. The witness then cut off the rooster's head and signed with a quill dipped in the dead bird's blood the paper from which the oath had been read to him. The paper was then burned in the cuspidor.

" Is this the form of oath administered in the courts of justice in China!" asked Judge Bregy. "Not particularly," replied Interpreter Chew. "The Chinese courts do not take any oath to my knowledge. I have been in America for a long time. When I was in Portland, Ore., the killing of a rooster was resorted to as the only thing to prevent a Chinaman from lying. Before that you couldn't get at the truth." "What is the reason for the solemnity of

this oath?' They believe that everything has a spirit, good or evil, and after a Chinaman cuts off a rooster's head, he believes that the spirit will trouble him if he tells a lie."

How One Burgiar Was Caught.

The Irish (heaven bless 'em) have a little invention which has been used in Ireland with great success. It would be a good attachment for the ballot-boxes in this druggist, rising with alacrity from his country. An enterprising burglar entered a gentleman's house at Waterford, Ireland, unrivalled nerve anodyne. This preparaone night a comple of weeks ago, and, after tion, darling," he added, soothingly, as he purloining everything he could find, he took a bottle from his pocket, quickly some way he touched off a magnesium flash brought along, "will allay any undue thing flared up. The next day it was discovered that the camers had taken the photograph of the burglar. The negative was placed in the hands of the police and by its aid they quickly nabbed their man. It showed the burglar with a jimmy in one hand and a box containing jewelery under they will never be published while he is his arm, while he carried a sack over his shoulder with valuable pieces of plate, books, etc., and was gazing at the flash light in open-mouthed amazement. This was the unimpeachable evidence of a mechanical eye-witness and the fellow was not, it says, worth reprinting. sent up for six months.-Manchester Courier.

Reliable.

Young man-You are older than I am and I want to ask you a question. Does a woman always mean what she says? Old man-Always-that is, if she's married.

After hearing arguments in favor of and in opposition to Kemmler, the Buffalo murderer, Judge Day held that testimony would have to be taken as to the effect of the electric current on the human body, and appointed Tracy C. Beckey, a lawyer, of Buffalo, to take testimony and report to the court on July 30th next.

A 3-year-old child named Cote, residing on St. Dagnillon street. Quebec, fell into a pan of boiling water yesterday and is so severely scalded that it is not expected to recover.

MORE SCOTCH ASCENDENCY.

Wales' Eldest Daughter, A London cable says: There was but one topic of discussion in the clubs last evening. It was the betrothal of Princess Louise Victoria Alexandra Dagmar of Wales, the eldest daughter of the Prince and Princess of Wales, to Earl Fife. Rumor for a long time past has been busy in clubdom with the possibility of such a match, and what gave particular strength me or a jury ?" Mr. Burns said, "You." to the possibilities of such an alliance lay Mr. Britton, Q. C., read a lengthy charge, in the fact that the report was most terday afternoon the Queen formally gave vies with him in the affections of the peo-ple. When it became known that the hand United Kingdom, the Prince and Princess

won universal popularity. Like all the position in which his family royal princesses she has always been was placed. When the charge was troubled with shyness, but not more so brought to the prisoner's knowledge on than might be expected from young ladies Sunday he had time to leave the country, not long out in the world; but those who but instead he went to the Inspector's rounding her have found in her charming in the case were made out and he placed in a good share of her mother's remarkable family, notwithstanding that it had been charm of manner and interesting gentle suggested to him to leave the country, de-Earl Fife has been for many years a close lute ruin for him and his family, and said body knows him and knows well of him. He is an exemplary model of the British Judge Price said this was the saddest case aristocracy. He is the sixth Earl of Fife, he had ever had to deal with, and, conbut was created a peer of the United Kingdom in 1885. He is 40 years of age.

A Remarkable Case of Somnambulism. A policeman early this morning found a woman, attired only in her nightclothes, wandering aimlessly along by the side of St. Mary's Hospital. When the officer spoke to the woman he found that she was sound asleep, and when awakened she went into a nervous condition and was taken into the hospital. She gave the name of Mrs. Annie Davis, and said she lived at No. 834 Park avenue. The police of the 13th Precinct were notified to investigate the case. They found that the woman's husband had gone to his day's labors apparently undisturbed by his wife's escapade. The neighbors state that Mrs. Davis is a somnambulist of extraordinary quality, and her antics have long since ceased to be cause for wonder among the inhabitants of the tenements along Park avenue. She is in the habit, they say, of getting up in the middle of the night and while sound asleep It is reported here that nothing will be will go through part of the work that is to done this year on the proposed extension of be done the next day. Breakfast is some-An inquest was held on the body of and in a sound sleep the woman will do all William McDermost, who hanged himself the usual listle odds and ends of her household duties without making a mistake, even to lighting a fire in the kitchen stove. Once or twice the woman has endangered her life down close to its edge. After Mrs. Davis had recovered from her nervous condition she was sent to herhome.-Brooklyn Times.

Mistakes.

It is not disgraceful to make a mistake Those who never make mistakes never do anything worth mentioning. The attitude of men with reference to their mistakes is sometimes disgraceful. One who cannot see his own errors even when they are pointed out will not make much improvements. Until we discover and deplore our defects we will not take pains to remedy them. Frankness in confessing faults is a great grace. When one becomes so perfect in his own estimation that he has no occasion to confess his faults to his neighbors. he is well nigh beyond the reach of hope. A Christian who believed that his holiness had reached the point of faultlessness once gave way to a violent fit of temper, and when forced to apologize told his story well enough until he came to the conclusion, and then spoiled it by saying; "I cannot tell what made me use such lanam sure I was not angry." "Who can understand his errors?

SAND SPOUT IN THE DESERT. Graphic Description of a Striking Scene in Africa-Moving Column

Under the fairest skies the desert is an

awasome solitude, but when a storm comes Burns, Deputy Postmaster, was brought it is terrible and appalling. I shall never before Judge Price. He tottered like a forget a scene I witnessed some forty miles child when asked to stand up. The Judge beyond the great pyramids, says a writer told him he had been charged with appro- in the New York Mail and Express. I had gained an isolated hillock, some two hundred feet above the level of the surrounding desert. Away to the west, about two miles distant. I descried six or seven lofty pillars then he asked if Mr. Burns was ready for of sand moving swiftly over the undulating credited by those about the Prince. Yes- trial. The reply being "yes," Mr. Burns plain. The centre one of these was vertical and those surrounding it, at a distance of two or three hundred yards, leaned slightly toward it. The sand at the base of the United Kingdom, and the Princess alone ing that had ever come before him. The columns was lastied by the furious whirivies with him in the affections of the peo-ple. When it became known that the hand occupied for many years constituted and of their eldest daughter was to be conferred element in the deplorable nature of the roots and hurled hundreds of yards away upon one of the most popular Peers in the case. His Honor was aware of the terrible and high up into the air; even the grass calamity which befell the prisoner when that grew in the path of that terrible of Wales were simply and purely raised two promising sons met watery graves. storm was shorn clean away from its roots. aloud). The summits of those columns of sand Princess Louise has in her short career Another distressing element was the at length joined, and then burst forth from his family their united tops a yellow gigantic cloud of sand of such magnitude and density as to darken, as in a total celipse, the face of the | tion ?" bright afternoon sun. The sand spout, called by the natives " zobahah," shortly have penetrated the veil of modesty sur- office and gave himself up until the papers after subsided, but the cloud of sand and heavens, continued to darken the setting sun for more than an hour. The smaller column behind travelled swiftly, increasing in size, until it reached the site of the is about middle size and has a face with justice taking its course. Mr. McIntyre break-up of the other, and then added its mite to the universal destruction. With my sextant, as I stood in security, I measured the height of the centre column of sand; it was nearly one thousand feet. The other columns were rising so rapidly that they soon reached a greater height than that of the centre column. When the junction of them all took place the sudden eruption of sand, leaves and grass reached to a total height of over four thousand feet. These "zobahahs" are not very frequent, but when they occur they carry widespread devastation along with them, and woe betide the traveller and the tent that happen to stand than a plain waist. Oh, there's that in their way. Not more than dreadful reporter. I'm tired to death tellten yards from the column the air is perfectly calm, but within the small circum-Coachmen's capes made of white velvet scribing circle there rages such a tempest as will carry away anything, however firmly fixed in the ground, into the regions of the upper air as easily as an ordinary note paper as an indication of the extent of gust of wind will blow a piece of paper. The camel, this wonderful ship of the desert, always knows a few hours before whether one of those approaching " zobahahs" is likely to come upon him, and his natural instinct will guide him to a place of never get anything right." safety, where he lies down and only breathes the cool reactive current which closely follows the burning, almost suffocating, hot air which accompanies the pircle and the direction of the centreof the circle is almost invariably from north to south.

When these awful turmoils are over, and The steamer blanket used by the ladies the disturbing elements have resumed their normal state, the burning sand becomes saturated with a heavy dew, the sun is less angry, and the African desert more amenable to life in both man and beasts. Nature's

The Manchester Ship Canal. Some interesting statistics were lately given by Ald. Bailey, one of the directors, with reference to the progress of this work. He stated that 151 million tons of earth and rock had been excavated, and that 28,000,000 tons more remained to be removed. It was anticipated that the work would be finished in two years from 1st of 183 pumping engines, 82 steam navvies, 5,000 waggons, 158 locomotives and 116 steam cranes, and in a few months 15,000 men would be employed. He further gave some particulars as to the cost of haulage of one ton, which was stated to be 6d. per mile on the highways, 2d. on the railways, 1.66d. per mile on the Leeds and Liverpool Canal, 1-116d. per mile on the Aire and Calder Navigation, and between New York and Liverpool about 1.300d. per mile.

GETTING INFORMATION.

A Reporter's Experience with the Patroness of a Philanthropical Institution.

It was the evening of the graduating exercises in a philanthropical institution. Said a New York Sun reporter to the lady in charge rustling around in the dignity of a new black silk :

" How many graduates have you?" "Oh, dear me, are you a reporter. I just dread to see one come in. They never get anything right. I never knew one to. I think they do it on purpose. It is too mean for anything. I hate-" But will you tell me the number of

graduates ?" " Oh, ever so many, and they are just the brightest girls. Oh, it is such a wonderful thing that this institution can educate them as it does. It is perfectly splendid. I don't suppose its any use to tell you about it, for you won't get it right any

" What do they graduate in ?" "Why, every thing most. That's the idea of the institution, to make them so self-reliant and ready for emergencies

"Who are the patrons of the institu-

"Oh, nice people. Every body ought to be interested in it. They would be, too, if the papers took it up in the right way, but grass, which had been raised high in the they won't. They never get any thing right, the reporters—oh, I can't tell how they twist things."

> "How many instructors do you em ploy ?" "Oh, we have the loveliest teachers, I'll go and ask Miss B--- to come and tell you shout them. She knows them personallyall the little family history, you know. But of course we don't want you to publish that. Papers are just filled with every one's private affairs now. It is just horrid, but I suppose the reporters don't care what they say if they just get their pay. Excuse me; I'll go and speak to Miss Smith," and she rustled away. The reporter waited while they counseled together, and, approaching, heard: "Oh, I think she's lovely in that dress. You know I advised her to put those revers on-so much more becoming ing him about things. You tell him about the teachers, won't you, dear, and put those violets up a little nearer your

> chin." "I? Why, I don't know anything about it, and I'm busy; I'm on the flower com-

mittee.' "Well, we might as well let it go. I've told him about it, but he ll get it all wrong, anyway. It is perfectly awful the way those reporters misconstrue things and

Grit versus Pluck.

A burro and a bull-dog had a fight recently in Fresno, Cal. Burro is Cali-"zobahans." The usual movement of fornian for donkey. The burro was these sand spouts is in the arc of a wide browsing on cockle burs by the roadside when the buil-dog trotted along, stopped, and without a growl, seized the donkey by the shank bone of the off hind leg. The burro kicked and kicked, and then he tried to reach the dog with his mouth, but unavailingly. Then the burro laid down on its back and brought its hind legs forward towards its head. He shut his laws on the dog's back and slowly straightened out. The dog, without flinching, kept his grip on the shank bone. But the donkey had just as much grit, and kept on straight ening itself out, though the strain was causing the flesh and muscles to be terribly lacerated. The dog let go first. The burro kept its hold on the dog's back, and in a second was on its feet, with the dog dangling from its mouth. The burro's leg was terribly lacerated, but it did not seem to mind. He limped across the road, and, deliberately pausing several times to January next. There were on the works rest, rubbed the dog back and forth over the barbed-wire fence until it was killed. The dog did not howl from the beginning to the end. - Chicago Journal.

Victoria's Interest in Funerals.

I hear that the Queen has recently been concerning herself with the arrangement of royal funerals, and that Her Majesty has caused a long memorandum on the subject to be drawn up, with a variety of new orders, which extend to the most minute detail. In future the body of a defunct male member of the royal family It is common to make the useful recom- is to be placed in the coffin in an attire of quite different material to that worn by a repel insects on plants, to perform the deceased female, and married people are dusting in the morning while the dew is on not to be treated the same as the unmarried. the plants. The only objection to this The Queen's solicitude extends even to the recommendation is that plants are not making of the coffins, and there are copious moistened with dew every morning, or it is directions concerning them. Embalming evaporated before the owner has time to do is positively prohibited. One would supthe work, or it may be too hot and dry for pose that the Queen was anticipating a dew. The work is therefore put off till the large mortality among her kindred. It is insects may have done their mischief. How They Catch Fish in Georgia.

Last Monday morning it was our pleasure to go a-fishing with a party on Alapaha, near Grover, and see how fish are caught the "new way." From four to six men go into the water with a log in front of them, and a sheet with one edge on the log and the other edge held up by the men so that the fish can't jump over, but fall on the sheet. The log is pushed along to the land, and when near it the fish begin to try to make their escape back to the deep water by jumping. If they fail to make a good leap they lodge on the cloth, thereby becoming victims of their own destruction. It is amusing to see how they jump. It is came into violent contact with the back of supposed that about three hundred pounds were caught .- Abbeville (S.C.) Times.
