KUNZE'S IMPORTANT CONFESSION.

Denouncing the Clan-na-Gael Evidence Against Burke.

frequent, Dr. John McInerney and J. J. Maroney were entrusted with carrying them out. The "Triangle" Sullivan, Boland and Feeley-was the Supreme Executive to decide on the work to be done. McInerney was always despatched to the scene of the proposed outrage, and, being up how the work was to be done, and decided upon the amount of explosives it would be necessary to use. Maroney had charge of the financial end of the business, and as soon as the actual perpetrators had received their instructions from McInerney. Maroney equipped them and supplied them with money for their journey. When the bills for these expeditions began to come in McInerney opened his eyes at the amounts asked for. This was in 1883 or 1884, and was the keynote of the fight afterwards taken up and waged by Cronin, McCahey and others.

It was said Thursday by some of Mc. Inerney's friends that fully \$2,000,000 had passed into the hands of the Sullivan faction. The Clan-na-Gaet has been in existence for twenty years, and the contributions were hoarded up until Sullivan, by reason of his acquired power, called for 25 per cent. This was followed by a demand for 50 per cent., and a third call absorbed the remainder. When vouchers of this money, Sullivan freely announced that all vouchers had been destroyed because they would implicate prominent men in English and Irish politics. The anti-Sullivanites here now believe these vouchers never existed, and the knowledge possessed by McInerney concerning the disposition of these funds made him a mark for hatred.

The Limerick men in the Clan-na-Gael Chicago to shoot those they suspect of meeting. complicity in McInerney's murder. It

at Tower of London, etc. Sentenced May 18th, 1885, for life. Wallace, alias Duff, murder at

20 years. This makes thirty-two imprisoned for dynamite outrages, for the conviction of Wallace, for the Solihull murder, was only brought about by his arrest in one of the criminal conspiracies. The Solihull murder was a Fenian " removal." Of these thirtytwo two died, and one, Patrick Drum. was released immediately after conviction, leaving twenty-nine persons sent to jail to serve out sentences for their share in the murder plot. Some of these sentences have been already ended, but there are still in British jails twenty-two men under punishment for the conspiracy, and it is a curious fact that none of these men have been permitted to earn good time or get the indulgence granted to other convicts, if the stories told by their friends be true.

Of the dynamitards two are dead. These are Capt. Mackey Lomasney and Peter Maione, although there is much doubt about the name of this latter. They were killed in the abortive explosion at London Bridge about a quarter to 6 o'clock the bodies was ever found and it is supposed that the men and boat were so torn to pieces that nothing but human and other wreckage remained after the premature explosion of the cartridges. Lomasney's widow still lives in Detroit and it will be remembered that it was the failure to provide properly for her that was one of Dr. Cronin's charges against the triangle .-Chicago Personal Rights Advocate.

Villard's Romantic Career.

Henry Villard is once more a recognized power in Wall street. He has been elected President of the Oregon & Transcontiby a majority of 16,999 shares. Thus romantic lives of this generation. THE TIME TO BATHE

When it is Dangerous to Plunge in Cold Water-Before Noon and Before Going to Bed the Best Time for the Bath.

In considering the subject of injudicious bathing one of the medical journals reiterversity last evening on "The Annexation of Canada." These are some of the things of Canada." These are some of the things to the Government against which their fatigued. An hour before noon and before to the Government against which their fatigued. An hour before noon and before to bathe. attack was to be delivered before they had going to bed are the best times to bathe.

left the vessel which carried them over. The average duration of the bath should be P. J. Tynen, the No. 1 of the Phoenix Park from five to ten minutes for children, fifassassination, when Lord Frederick teen minutes for women and but little longer for men. To delay much beyond these periods is a pernicious practice invitblue lips, chattering teeth and wrinkled, clammy skin, who have been spending half a morning in alternately plunging into the waves and walking about, dripping, in the cool air. From what should have been an invigorating dip, they return in a condition approaching collapse. Such abuse of sea bathing is unfortunately too common, even among those who have sought the seaside for the improvement of impaired health. The immediate effect of a cold bath is to chill the surface of the body, the cemperature of which, as tested by a thermometer may fail several degrees—as much even as three or four. The skin becomes pale, the lips blue, there is chilliness, shivering, goose skin and the breath has a spasmodic and catching character. Cold bathing is salutary under certain conditions of the system, while in others it is capable of great harm. It benefits the strong and robust and it can be made a restorative and tonic, a revitalizer, to the run down " when wisely and judiciously used. Aged people should use it with much care and not oftener than every other day; and should not remain in the water longer than ten minutes at the mest. Persons who have heart or kidney disease and those in a feeble state of health should not indulge. If the bather do not remain in too long, "reaction" sets in, the chilliness gives place to a pleasant glow and a feeling of comfort and agreeable exhilaration. This reaction follows most quickly when the bath is of short duration. The shorter the bath the less is the ultimate depression of the temperature of the blood. The shorter the bath the greater is its power of stimulating the functions; the longer it is continued the greater is the cooling effect and the consequent lowering of vitality. The best of all baths is the swimming bath, for in it the bather can indulge in a free exercise of his limbs, such as is hardly attainable under any other circumstances. Swimming is a very valuable exercise, as it brings into action a large number of muscles. It employs the arms equally with the legs and leads to a healthy develoyment of the muscles of the chest. Nearly all good swimmers are big chested. A sea bath has also another great advantage over all other forms of bath, that it is taken in the purest air possible. Reaction more readily occurs after a sea bath than after a river bath, and thus the liability to "catch cold" is less, although the popular belief that it is impossible to take cold from a wetting with salt water is far from the truth. The practice into which the fair sex has fallen, of sitting about for a long time after "coming out" in order to dry their hair, is injurious and should be avoided. As soon as the bather leaves the water the body should be dried thoroughly and the clothing assumed as rapidly aspossible. Serious injury of the ear, resulting even in deafness, has occurred in consequence of the waves striking forcibly on the side of the head. Put a light cotton plug into each ear. - New York News.

A Nova Scotia Elopement.

A runaway pair from St. Margaret's Bay arrived in the city this on Friday morning in time to take the steamer Halifax for Boston. The man's name is David Johnston, and he is married; while the the evening of Dec. 13th, 1884. Neither of girl's name is Sadie Boutiller, about 17 years of age. As near as can be learned the elopement was planned about a week ago. The couple had been frequently seen walking along the roads in the evenings at the bay. Johnston had been reprimanded by his wife, but all to no purpose. The elopers drove into town early this morning and registered on the passenger list under assumed names. The deserted wife is the mother of two children. Mrs. Johnston's father arrived in town just in time to see the steamer sail down the harpor.

Typhoid Epidemic at Wilkesbarre.

A despatch of Wednesday from Wilkesnental Railroad, after a desperate struggle, barre says: This city is threatened with an epidemic of typhoid fever. Within the begins another chapter in one of the most past few weeks numerous cases have developed among the people using the water ful foreigner, poor, unknown, depending on of Laurei Run, which supplies the eastern nothing but pluck and brains, becomes portion of the city. The physicians to-day made a careful canvass of the stricken disconfidential friend of millionaires, specula- trict and over 150 cases of typhoid were tor, millionaire himself, constructor of a discovered. All the cases are attributed to railroad across this continent, guest of the impurity of the water supply aggravated

Fun For Women

Wives should never conceal anything from their husbands-excepting their faults,

Next to hearing that she is pretty herself, a woman likes best to be told how homely some other woman is.

-When the boys in one of the public schools at Atlanta, Ga., swear, they are made to rinse their mouths out with water that has stood in a quassia cup. One application is said to convince them of the Billy Dobson, proprietor of the Blue superior advantages of the editorial method:

IN CLOVER. Out in the sunshine bright song birds flit by

Apart from this all I sit steeped in sadness, For to Love's question I gained no reply When evening had come and down in the meadow

My love and I strolled mid clover-tops red.
To my query of noontime, while the stars shone out bravely,
"In clover or out, I love you," she said.

-" Who is the haggard looking man with is an editor." "Who are they and what -Mr. Noodleboy-"No wonder you girls | has he done to excite their wrath?" "They were?" "Five hundred."
