WHOLE PAMILIES KILLED.

The following particulars have been received: The excursion party left Armagh yesterday morning in two trains. The accident | Poole, who witnessed the accident from occurred at a point where the trains had to the shore, shouted to him to keep up ascend a grade on a bank fifty feet high. trouble. The second section attempted to run the ascent, but the weight of the train proved too great for the engine. Several cars were detached and allowed to run back towards the level track, but before they reached it they came in collision with an ordinary train from Armagh proceeding at a good rate of speed. The excursion cars were completely wrecked. The scene which ensued was heartrending. Hosts of volunteers were soon at hand, and the dead and wounded were taken from the wreck and carried down the bank. Medical aid was called for, and a special train from Belfast brought to the scene twenty surgeons from that city and a number of medical men from other places between Belfast and Armagh. The disaster is unparalleled in the railroad history of Ireland. The accident has cast a gloom over Armagh. All the shops were closed afternoon and the people are in general mourning. The engineer, fireman and guard of the train, and the traffic manager's clerk were summoned before a magisbeing responsible for the accident.

DETAILS OF THE DISASTER.

third train was inadequate. While the he spent most of his summers in the neigh- posited more than a year ago, and as he second train was ascending the incline the borhood of Kingston, camping and evangelengineer remarked to the fireman, "I am atraid we can't do it." The following train was commencing the ascent when the engineer saw the runaway cars. Shutting off steam and reversing the lever the engineer and fireman jumped from the engine, shouting to the passengers to do likewise. The latter, however, not hearing the cries did not obey. No one was injured on that train. The engine was hurled 60 to him to forsake his wild career. Little has since pushed on to Kagheyi, at the people. Mrs. Maybrick resumed her feet down an embankment. The carriage that ran into the engine was shattered to ton early religious impressions, which had further news in addition to the letter given splinters, and fragments of dress, umbrellas, been made by a devoted governess who etc., were scattered hundreds of yards. A frequently talked to him in childhood about dozen corpses were found beneath the Jesus, came swelling upon his soul, and a himself to Zanzibar." engine in a parboiled condition. Some of marvellous conversion occurred. He told the occupants of the runaway cars tried to escape, but the doors were locked. The first part of the train started back in pursuit of the runaway cars, and the enormity of his sins. Then and there with passengers saw the collision at a distance of 300 yarda.

ANOTHER ACCOUNT.

Another account says the engineer of the the glorious change was wrought. second train, finding his engine powerless to paid the train up the steep grade, unlinked several cars with the object of next station and returning for the remainder. Heavy stones were placed behind God and His work. them from slipping, but the locomotive on restarting gave the entire train a shunt speed gradually increasing until they attained a frightful velocity. After running

stood forward without evincing the elights est nervous tremor. She was then formally committed, and at a few minutes to 7 o'clock she was removed from the dock A cablegram from London, dated last and subsequently conveyed to Walton jail, where she will await her trial at the next

sented by able counsel. The Chief of Police. several city clergymen, and leading Christians gave evidence for the prosecution, and were severely cross-examined by the lawyer on the opposing side, who had gathered from cigarette and quack medicine advertisements, illustrated papers, statuary, etc., all the suggestive advertisements he could find, with the view of eliciting an expression. decency. The result was rather ludicrous. tion: Archdeacon Fortin was shown one of the pictures complained of, and asked his The court was hushed when in response to opinion of its character. Answer, "I look upon that picture as grosely immoral to begin with, because it represents certain portions of the body which decency dictates should be covered in proper society; Cross-examined-When oarsmen row on

the river are they in the garb of proper society ?

Is a person attired for bathing properly attired?

To the rev. gentleman was submitted a picture in the Graphic. He thought it much less nude than the pictures complained of. In these pictures a part of the body which should be covered was represented. He regarded a picture from pen and pencil shown him as immoral. He did not cause it was a work of art. These pictures were very far removed from works of art. He thought exhibit "B," a common drug store advertisement, equally objectionable. The druggists' lithograph, representing Humphrey's homoeopathic specifics, was in his opinion also very obiectionable. Other exhibits representing advertisements for cigar stores were produced. He thought them highly objectionable. He did not consider the Laccoon from them.

The counsel then produced Alphonse submitted to Rev. Mr. Fortin. Some of them he saw no objection to, another one the "Ladies' Pictorial," an English publiplace. He had endeavored to correct evils was adjourned till Saturday.

A CARDINAL'S RANK.

A Quebec Paper Discusses How Cardinals are Treated in Canada and by British Royalty Respectively.

A Quebec despatch says: L'Electeur has undertaken to reply to some statements made at the anti-Jesuit Convention in Toronto, and starts by taking up the claim of one of the speakers that Cardinal Taschereau had been given a seat on the throne on the opening of the Legislature alongside the Lieutenant-Governor. This, it save, is untrue. The Cardinal, as a prince of the Church, was entitled to rank as an Ambassador does at court, and he was given a seat on the floor of the House to the left of the throne, but not on it. This. it says, was pure courtesy, which would have been extended to His Eminence in any civilized country As an instance of the consideration in which Cardinal Manning is held at the English court, it says that when His Eminence appears he does so in his full red and ermine and he takes the rank of a Prince. The journal says that when he once called at one of the royal palaces to visit the Queen by invitation, he was received by the Prince of Wales, who personally conducted him to Her Majesty, with whom he held a long conversation. His reception altogether was of the most affable nature.

Potash in Corn Cobs.

There is a good deal of potash in corn cobs, as thrifty housewives long ago learned when making soap. It is here that a good deal of the mineral elements of the corn plant are concentrated. Perhaps it is for the potash as a corrective of acidity in the stomach that animals will often eat the cob. It is all the better for being charred or burned. Burn to a crisp the corn cobs from which fattening hogs have devoured the corn, and see how greadily the same animals will eat them. - New York Mail and Express.
