Heffer's statement is said to be most cir. had occurred through excessive loss of smith's assistant, Jules Chartrand, went to cumstantial, giving names, date and minute blood, but there was no certainty of it, he light his fire, and at the same hour Godefroi the water. All the survivors have been details. He says Burke told him that Dr. said. Cronin was murdered in the Carlson cottage on the night of May 4th, and that he together with a number of others, whose did not ensue from blood-letting, but from was present at the commission of the deed, names he gave. After the murder was committed the conspirators put the remains in a box and took them to the lake shore in an express waggon. They threw the box into the lake; but it would not sink and drifted ashore, so they put it back into the waggon and took it to the city and hid it for the night. On the following night they set forth again, intending to sink the box containing the remains into the lake by means of weights, but becoming suddenly panic-stricken with the fear of capture they dropped the body into a manhole and threw the box into a vacant Chicago and go to Europe by Winnipeg. These names Heffer gave to his lawyers. The story throughout is most circumto Chicago and give evidence in the matter. The authorities here have notified the

Notwithstanding this secrecy those men were betrayed by the Board to the English authorities, and twenty of them are now in prison. This was, he declared, to enable the Board to steal the funds, and when at last a showing was made the Board claimed that the Order owed them \$13,000, while there was \$250,000 in the treasury when they took charge. Several witnesses were then examined.

A Friday's Chicago despatch says: Dr. Egbert stated the facts revealed by the autopsy which he made upon Dr. Cronin's body on the day following its discovery. He described the wounds, and gave it as his opinion that death resulted from them. All the wounds were upon the head. The skull was not broken, except a small piece of bone was chipped off at the corner of the left eye.
