SEVEN HOUSES BURIED.

A Quebec despatch of Thursday says About half past 7 o'clock this evening a terrible land-slide occurred immediately below Durierin Terrace, by which seven souse were crushed out of shape and from twenty to forty people killed and wounded. Those who witnessed the fall of the rock say that they heard a long, loud report, as of several cannon, and on looking up towards the terrace and citadel were horrified by the sight of an immense mass of stones, rock and earth breaking loose and rushing down the three hundred feet of a declivity npon the doomed houses below. Immediately the air was filled with dust, so that no one could see ten feet in front of him, and breatning was made difficult. This was followed by the sounds of timbers crashing and yielding to the immense power of the avalanche, and the shouting and screaming of men, women and children in all the agony of despair. The avalanche was caused by the hot weather of the past few weeks cracking the earth and rock, which were loosened and driven down by the heavy rain of the last few days. Immediately the men of the water police, whose station is near the scene of the accident, set to work to

RESCUE THE IMPRISONED, while the general alarm was sounded, which called out the tire brigade and police, for what between lamps and stoves treaking the houses soon caught fire. A telephone message was also sent to the Citadel remesting the assistance of a detachment of " B " Dattery, R.C.A. The flames were, however, soon extinguished, and the men from the Battery began the work of extricating the unfortunates from the ruins, assisted by many of the citizens. As each immense crowds of horror stricken relatives and sympathizing onlookers.

MANY HARROWING SCENES occurred as the dead and wounded were carried in, some with broken limbs, others with grief and calling for a brother or huswere carried in the arms of strong, resolute men almost melted into tears.

Chas. Allan, Thos. Berrigan, Tim Berrigan, to be fatally injured. The City Council son, who had been admired in her lifetime one of James Bradley.

witnessed which were extremely heartrending. A young boy named Power was released from the ruins. He, however, begged piteously to be allowed to remain and die with his mother and sisters, who were also in the ruins near by. He as well as his parents and sisters were removed alive but badly wounded. A man named Berrigan was found near by pinned solidly under a huge rock. He was speaking to friends around him, who were unable at the time to remove the immense boulder and relieve him from his agonizing and perilous position, as the rock was in such a position that it was feared when it was moved it would cause his death. Up to the present hour, 11.30 p.m., there have been six bodies taken from the ruins, namely: Thomas Farrell and two of his children, two children named Burke, and one unknown child. from the debris badly injured. Some have broken arms and legs, others being badly feet in some places.

Accidents are occurring every moment to down.

DUFEERIN TERRACE UNDERMINED.

The mass of rock detached from the cliff's side left a vacant space of extraordinary dimensions. It has worked immedistely under the Dufferin terrace, undermining the support of that great promenade, so that it is now unsafe. The northeast bastion of the citadel is perpendicular with the cliff sides. Huge rocks are still menacing the locality, hanging as they are on the flank of the mountain. Thos. Farrell, three Farrell children, two Ten corpses and sixteen wounded are now taken out. The work is still carried on one child of P. Fitzgerald, Mrs. Bracken cheerily, but it will take several days to Mrs. Stephen Burke, Henry Black, Wilhaul out all the bodies. RELIEF FOR THE SUFFERERS

Trees Uprooted and Swept Upon the Fields.

A Wednesday's San Francisco despatch says: Japanese papers place the number of persons drowned in the floods of August 20th in the city of Wakayamo and in the districts of Minami-Muro, Higashi-Muro, Nishi-Muro and Hidaka at 10,000, and the number of persons receiving relief at 26,424. The River Kinokuni swelled from thirteen to eighteen feet above its normal level and the embankments at the village of Iwahashi were washed away. The village and about forty-eight hamlets were covered by the raging waters. On August 19 an enormous mass of earth fell from the mountain near the village of Tennokawa and stopped the course of the river of the same name, which being already swollen submerged the village and drowned nearly all the inhabitants. A number of villagers belonging to Tsujido took refuge in their temple on high ground, but when the land slide occurred fifty persons were buried

The steamer Gaelic, from Yokohama, brings details of the overwhelming disaster in Japan. The Province of Kii, in the southwestern part of Japan, has been visited by the greatest floods known in the history of the country. Over 15,000 people have been killed, several towns have been destroyed and others have been wrecked. The catasescaped, but lost his life trying to get his trophe was caused by floods in the western part of the Province and by the crumbling of a mountain, which buried six villages. Citadel, will have to be removed, as it is The early part of August was remarkable rivers soon became alarming. The banks precautionary measure all communication of the Kinogawa, a stream over 100 miles with the Bastion has been cut off and the long, broke near the city of Wakamayo on morning and evening guns will no longer be August 19th, and a mountain of water rushed out upon the fields and towns, wrecking houses, bridges, fences, temples and all things in its path. In this discrict huge boulders covering the roadway, as it 200 houses were carried away and 5,000 miles. The Japanese newspapers think is a certainty that there can be nothing were ruined by the water, leaving 30,000

people DEPENDENT UPON THE LOCAL OFFICIALS for food. Lower down the embankments of Hidakagown were also destroyed, flooding the cultivated fields and adjacent towns. Out of sixty houses at Wakanomuda, but two remain standing, and more than 50 people lost their lives. An official of the steep track to day when the electric current Nisnimura district, who arrived at Wakamoya Aug. 22nd, reports that about 4 p. m. mountain at great speed. The conductor Aug. 19th a sudden rise of the waters took shouted to the passengers to jump off. The place at Sanabemachi, and in a few min- car contained 50 people, visitors to the reutes the floors of buildings were covered. union of the Army of the Cumberland, one-THREE HUNDRED PERSONS LOST THEIR LIVES. Seized the passengers and they began leapvolume of the river Kinokuni, an adjacent and was thrown in front of the car, striking the rise being in some places 13 to 18 feet. No bridge over the stream could withstand the force of the flood. The river steadily extricated from under a rafter, on which midnight it began to overflow its embank-being literally torn out. About ten persons ments, and about four miles from the city of Wakameyo the banks at the village o Iwahashi were washed away. Immediately the village and its whole neighborhood, including 48 other hamlets, were-

COVERED BY THE RAGING WATERS. being given to several thousand people. The embankments on the Yodogown and houses were swept away or partially wrecked. In Hongumura 180 houses were washed away and thirty persons drowned. In Higashipo, Murogori and Neship Marogori several hundred houses were demolished and considerable loss of life occurred. In Hidakagoria 380 houses were carried away and 70 houses were damaged. were injured.

FIVE THOUSAND PEOPLE NARROWLY ESCAPED

Many houses in Tsechigwara and Shikiya, which are situated close to the Kumanagawa were carried away, and many lives lost. The buildings of the Kumano Shrine, except one or two small temples were swept away, but the sacred image was saved. According to a report from Jeninu in Higashi Murogari, about one-fourth of the buildings (over 500) and 100 persons were swept away. The Hikawga river rose 28 feet, and villages close to the river were flooded. About 150 houses were washed away and many persons perished. Seventy-In the city of Mexico the income from station at Shusan were carried away. the fields, where several thousands are there was 863. Other villages suffered much, and the number of dead cannot be The amount of water passing over accurately determined, but for the province Dervish means "one who lies at the the neighborhood of Amanogawa, fearing

MOUNTAINS SUDDENLY CRUMBLED AWAY, obstructing communication between Tsujido, Mura and Sakamoto Mura, and the waters in the rivers which rose in consequence covered the houses in Tsujido Mura, the people fleeing to the temple on an elevated piece of ground. The mountain of Sugitama, at the back of the temple, suddenly came down in an avalanche, burying the entire village under ground, only the upper naif of the temple being left to view. The villages of Nagato Mura, Tanise Mura, Uyencike Mura and Hayashi Mura, along the Totsugawawgo were all buried under ground by the crumbling away of the Umiyabara Mountain. All the villages of Ui, Nagatorio, Numata Hara and Asahi, at the entrance of the Totsugawago, face each other and can be seen across the river, but there being no boats between

these places NO HELP COULD BE RENDERED. The villages of Uyeno, Chi, Takatsu, Kawatsu and several others were all either swept away or buried underground. The number of deaths in these villages has not yet been ascertained, but as all outlets were blockaded the loss of life must have been appalling. The villages of Kaseahaya, Uchihara, Takigawa, Nojori, Yamasaki and Taana were also entirely swept away or buried by the overflow of rivers and the crumbling of mountains. The damage along the lower course of the river and the villages skirting it has not been yet ascertained, but it is supposed that out of fifty villages comprising Totsugawaga, all have suffered more or less from the disaster, and it is do stful if one has escaped. In all

these villages,

FARMS, RICE FIELDS AND HOUSES are supposed to have been nearly or quite destroyed. The exact number of deaths in this small region is not yet known, but the district officials place it between 4,000 and 5,000. The coal mines at Tatezato Mura, and Yoshino Gori also caved in, and forty miners are missing. In Shiono Mura a land slide occurred, crushing to death eight persons, besides which forty are missing who are supposed to have been buried alive. It is impossible to furnish aid to the thousands of sufferers, and many must die of hunger and thirst. The losses in lives and money will never be known, as whole towns have been annihilated, leaving no -arvivers to tall the story. The wreckage is strewn along the sea coast for ninety
