WHARPINGERS AND DOCK COMPANIES.

A last Thursday night's London cable mys: The London and India docks Joint Committee, after being in consultation the greater part of the afternoon, declined to concede the one remaining point at issue with regard to the strikers' pay, 6d. instead of 5d. per hour, and issued the following manifesto, which was immediately posted up on each side of the dock-house entrance and despatched to the strikers' headquarsers, and also to the general managers of railroads, shipping companies and others specially interested: "The Joint Committee have decided to adopt the following conditions for extra labor at the docks under their control, the 5d. rate per hour, with 6d. per hour overtime, to apply to all labor not piecework, but men taken on before noon, if discharged by the Dock Company, to receive not less than 2s. The present contract work to be converted into piecework as far and as soon as practica-hie, under which the men will be paid not less than 6d. per hour, with 8d. an hour overtime, and divide the surplus, if any, between them all, the payments being made to the men under supervision of the dock officials. The hours of overtime shall be at the docks and uptown warehouses from 8 p.m. to 8 a.m. The committee will use their best endeavors to obtain from the Government a prolongation of the Customs hours, which, if granted, will have the effect of extending the time during which pay ment may be earned."

The large crowd of strikers, shippers and others who were congregated in front of the dock-house made a grand rush to read this manifesto the instant the copies were posted, and for a while great confusion securred. It was evident that the general expectation was that the notice was an announcement that the directors had capitulated, and great disappointment was expressed as soon as it was discovered that such was not the case. One striker was so angry that he reached out and with an oath sore down the notice he had just read. Hot words followed, and a free fight seemed

As the crowd learned the contents of the manifesto, many expressions of disgust and indignation were uttered. One striker voiced the general sentiment when he said: "That is not as good as we had before. It means fourpence less per day."

John Burns, head of the strikers, said "Those are not concessions. They are nominal. If the men accepted they would find themselves in the old hole."

the wharfingers who attended the conference did not endorse the issuing of the manifesto. On the conteary, they opposed inger withdrew from the conference beas has been stated, have practically endorsed the strikers in their demands, and the dock directors to induce them to settle the strike as quickly as possible. They represented that their business and that of the entire shipping interests of London were being paralyzed and permanently injured, and immense losses were being suffered. They further made it known that unless the strike was ended at once they would attempt to operate their wharves independently of the dock companies, and, as far as possible, would handle ship cargoes from the river. The wharfingers, at a largely attended meeting, decided upon a compromise which was submitted to the dock committee. It was One of Barnum's Arabs Falls a Victim to rejected. The difference between the dock companies and the wharfingers is as follows: The latter load and unload vessels in mid-stream or at the wharves. The former unload ships at the docks and place return cargoes on the docks, but do not load. The ships' strikers have intimated their willingness to agree to the terms proposed by the wharfingers, but are apparently determined not to knuckle under to the dock companies.

A last night's London cable says: The dock strikers played what they consider their trump card to-day. They issued an appeal for a general strike in London on Monday, unless the dock directors end the strike at noon to-morrow by yielding all the demands of the strikers. The committees of the strikers have placed copies of the appeal in possession of the employees of all large establishments. The dock directors have also been furnished with a copy. One of the dock directors, who had read the copy, said there was nothing for the directors to do. They would not pay sixpence an hour, and if a general strike were inaugurated that was the lookout of the strikers.

Both sides were surprised to-day by the action of Cardinal Manning. He called npon the dock directors when they were in session. He said afterwards he supposed the subject of conversation would be made public, but if the dock directors refused to state what was said he could not do so. He gave the impression that he was on the side of the strikers, and it seems reasonable that the dock directors would quickly make public his semarks if he were on their side. There is also an impression that he may cause an appeal for peaceful methods to be made to the strikers from the Catholic

pulpits on Sunday. A prominent shipowner said : "I understand that Cardinal Manning addressed the directorate at some length, representing College; Editor of "Medical Tribune" how greatly the commerce of London was being interfered with, and how much the peace of the metropolis was being threatmed, and ended by urging them to submit to the strikers' demands, which he believed were not extravagant."

Meanwhile the shipping interests are suffering greatly.

The Seaman's and Wharf Laborers' Union at Brisbane, Australia, sent a cable despatch here to-day, saying employment would be furnished there to 250 of the striking London dockmen.

Charms of the Snake Charmer.

An Ottawa daspatch of Thursday night says : Ali Bin Debe, the volatile Arab who twirls the rifle with such vim and dexterity in Barnum's show besides showing an aptitude for other entertaining feats of skill, has fallen a victim to the magnetism of Miss Nellie Hamilton, the snake charmer, in the same aggregation. Ali knows as much about English as the Prescott county school children do and Miss Hamilton's knowledge of Arabic is equally slender, but love has an universal language, and the two try its agency to understand each other. The result was that Rev. Mr. Wingfield, of this city, had two singularly mated callers yesterday. The dress of one was chiefly noticeable for a showy turban and baggy trousers, while his fair companion was attired in a sweet Broadway hat and tailor-made gown. The rev. gentleman knew no obstacle why the ceremony should not be performed. Nobody forbade the banns, and the rite was accordingly proceeded with. An interpreter was present to explain to the love-stricken Moor the important parts of the ceremony. Ali professed to be a Christian.

A RELIC OF DARK DAYS.

Enforcing an Old Statute Against the Jewish Religion.

A Thursday's Montreal despatch says A rather curious point has arisen before the Montreal courts over the refusal of Judge Pagnuelo, a Superior Court judge, to grant a petition from Louis Aronson, a Jewish citizen, for leave to establish a new Jewish synagogue in this city. It appears that under a statute of King George III. distinguishing between the Jews and Gentiles, which has never been repealed, Jews are required, in order to have a legally recognized corporation, to secure authority from the courts on the application of ten Jewish British subjects. There is, however, another modus operandi, which is to obtain a special charter from the Provincial Legislature. Of the two ways the latter is the more expensive. The congregation which has asked for legal authority is a branch of a Jewish order known as the "Sons of Benjamin," and has been in existence about four years. It numbers about 75 members. It has a burying lot for deceased members, and as registration books cannot be issued to them until it is a legally constituted corporation it labors under certain disadvantages. all the other help are supplied with stock There are three other Jewish congregations in the city recognized by law, the Portuguese, the German, and "Temple Emanuel." The first two are under the old British statute, the last named under a Provincial charter.

A guilotine was sent out by way of New York. Saturday last was fixed for the execution, and at 3 a.m. on that day Neel was aroused and told to prepare for death. One hour children ran in all directions, shouting and afterwards the condemned man was carried out, bound hand and foot, and driven in a carriage to Courbet square, where the execution was to take place. In spite of the early hour there were

abort 2,000 people on the square besides the authorities whose duty it was to see the execution carried out. While the executioner was making his arrangements Noel recognized him and said, "Ah! well, Jean Marie, you are going to kill me. You will have another to kill before long. You ought to offer me a last drink before I I will be the first men to die in this way here; would to God I were the last." The executioner was more nervous than the condemned man, and placed the latter too far forward on the block. "My neck is too far forward," said Noel, "you will strike my shoulders. I beg of you don't be long, and above all don't miss your stroke." The executioner was over a minute getting the man in the proper position, and Noel was about to speak once more when the executioner touched the lever and the knife came down on Noel's neck. The head was severed from the neck but remained hanging by a piece of skin, which the executioner had to cut with his pocket knife. When the head fell in the basket convulsive contractions were noticed for a moment.—Montreal Gazette.
