HAS been saved by the prompt use of Ayer's Pills. Travelers by land or sea are liable to constipation or other derangements of the stomach and bowels which, if neglected, lead to serious and often fatal consequences. The most sure means of correcting these evils is the use of Ayer's Cathartic Pills. The prudent sailing-master would as soon go to sea without his chronometer as without a supply of these Pills. Though prompt and energetic in operation, Ayer's Pills leave no ill effects; they are purely vegetable and sugar-coated; the safest medicine for old and young, at home or abroad.

"For eight years I was afflicted with constipation, which at last became so bad that the doctors could do no more for me. Then I began to take Ayer's Pills, and soon the bowels recovered their natural and regular action, so that now I am in

Excellent

health."-Mrs. C. E. Clark, Tewksbury, Massachusetts.

"I regard Ayer's Pills as one of the most reliable general remedies of our times. They have been in use in my family for affections requiring a purgative, and have given unvarying satisfaction. We have found them an excellent remedy for colds and light fevers."-W. B. Woodson, Fort Worth, Texas.

" For several years I have relied more upon Ayer's Pills than upon anything else in the medicine chest, to regulate my bowels and those of the ship's crew. These Pills are not severe in their action, but do their work thoroughly. I have used them with good effect for the cure of rheumatism, kidney troubles, and dyspepsia."—Capt. Mueller, Steamship Felicia, New York City.

"I have found Aver's Cathartic Pills to be a better family medicine for com-mon use than any other pills within my knowledge. They are not only very effective, but safe and pleasant to take -qualities which must make them valued by the public." - Jules Hauel, Perfumer, Philadelphia, Pa.

Ayer's Pills,

Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Dealers in Medicines.

BY ONE MAN. Write for descriptive catalogue containing testimonials from handreds of people who have sawed from 4 to 9 cords daily. 25,000 now successfully used. FARVIS RECORD. WEDNESDAY, APRIL 23, 1890.

CURRENT NOTES.

reportoral Nellie Bly are to be outdone | in time fairly devour the animal's life. by Maurice Namlaht, a Buffalo tramp, who proposes to go entirely around the | tecting the ewes and lambs from the world without expending a cent, either | inclemency of the weather. Unless for transportation or food. Foolish ample shed protection is afforded they fellow? He might remain at home, will suffer, and the percentage of loss become an editor and live as a portion among the flock will be great. This of our subscribers evidently expect us will not be an expensive undertaking to do, without expending a cent for | if the flock is divided and the incoming food or for the matter of that, for transportation either.

A new departure is being taken in Vienna, which may be worthy of imitation, although some pretty stong objections suggest themselves. It is proposed to establish three separate schools for weak-minded children, each to begin with two grades. This will be done to one. free the other schools of elements which retard the progress, and to give the dullards special treatment, which will benefit them better than the instruction they can get among the brighter boys and girls. Elberfeld, in Rhenish Prussia opened the first of such special schools for dullards, which has now three classes.

The object glass for the forty-inch be the largest refracting telescope ever constructed, and from its lofty position in the pure atmosphere of San Diego it space than any instrument heretofore | bettle. designed by the brain of man or f shioned by his hand. The great glass came from the establishment of Mantois in Paris, and is the biggest piece of work which they have ever done or which has ever been done anywhere. It is a superlatively pure and beautiful circular plate of crown gl ss forty inches in diameter or more, ten feet in circumference, two and a half inches thick and so clear that when balanced upon its edge it is invisible.

An attempt was made by a juryman, in a trial recently, to force a lady witness to kiss the Eible. The judge overruled the demand ordering the woman to be sworn with uplifted hand, saying: "I am not surprised that the witness did not kiss the book; I would not do it either -a dirty book like that." One is inclined to wonder that the nastv practice of requiring a witness to kiss the Bible retains an existance anywhere among decent people. It is an appalled dirtiness than which anything more disgusting cannot be imagined. Fancy one of these books long in use in a court of justice. It is gummy with foul foulness. On its surface is the impact of the foul lips of the barlot, the senual mouth of the rogue, the touch of innocent women, the sliver of the sot. the taint of diseased surfaces, the rotting oders of decayed teethand whiskytrinted breaths, and all the other loathsome things developed by such an opportunity. The judge who indorsed the witness' refusal to soil her purity by touching the unclean object deserves well of the advocates of cleanliness. An oath among most people is one in which God is invoked while the hand of the taker is placed on something sacred in its character. It is an insult to Deity to invoke his co-operation on a book covered with palpable impurity.

Popular People

re invariably pleasant people. Popular renedies are also as invariably pleasant to use and certain in their results, Mr. John Meonnell, of Chesley, Ont., says :- Nasal Bulm is a good medicine for cold in the head. It is a popular remedy,

Spring Management of Sheep.

From now onward says a correspondent of an exchange, the flock of sheep will need special care and watchfullness. The lambing, the welfare of the lambs, the feeding of weak ewes, shearing and troubles from the ever-ONT., active parasites, will all call for immediate attention. A good place should be made for the young lambs so that no harm can befall them. The ewes need, attending to, and feeding as well, if fine lambs are expected. Grass alone is not sufficient, but corn, rye and buckwheat, finely ground together, should be fed them every day. They have a double function to perform, to rear large, fine lambs, and to yield a good supply of fleece. The English sheep breeders have a good mixture for the young lambs, which is known as lamb or calf meal. It supplies all the essentials of milk, and is easily digestible. This mixture consists of three bushels of peas, one bushel of iinseed, one bushel of rye and 100 pounds of fine wheat bran finely ground together. Mixed with these substances are twenty pound of ground sugar, five pounds of selt and one pound of brown ginger and a pound of caraway seeds. The essential part of the diet of ewes and lambs. If this is not pure the milk of the ewes will become tainted and the lambs suffer from the effects.

The lambs should be decked at ano early age. If this is done about a month after its birth the pain is very triffing and the loss of blood small. Cleanliness is an important factor in caring for the flock in the spring. This is the only safeguard against blow-flies. If soft filth is allowed to accumulate The mythical Phileas Fogg and the they will deposit their larve in it, and Too much care cannot be given in proewes separated from the rest of the flock. They can be placed in fields or posture where sheds are provided, while the main flock can care for itself in other pastures. It is not difficult to save nearly all the lambs of a flock in this way, but if the necessary conveniences are denied, then the work becomes a most difficult and trying

Advice To Mothers.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhea, regulates the stomach and bowels, cures wind telescope which is to be mounted at the colic, softens the gums, reduces inflamation, University of Southern California is on the way to its destination. This will tem. Mrs. Winslow's Southing Syrup for Children Teething is pleasant to the tastes and is the prescription of one of the oldest and best female nurses and physicians in the United States, and is for sale by all druggists will pierce further into the recesses of throughout the world. Price 25 cents a

> A railway paper tie has been in vented. The inventor says he can utilize in this way the ordinary paper board, which is made from straw, grass, or any cheap material. The straw boards are cemented together and pressed in moulds, making a fire and water proof tie, which is not affected by atmespheric changes, holds the spikes firmly and sufficiently elastic, and will out-wear five wooden ties.

first-class woodworker, Mr. George Livingstone, who has worked in the village for some time, I am now prepared to do all kinds of work on shortest
