**The Safest**  
**AND most powerful alternative is**  
**Ayer's Sarsaparilla.** Young and  
 old are alike benefited by its use. For  
 the eruptive diseases peculiar to  
 children nothing else is so effective  
 as this medicine, while its agreeable  
 flavor makes it easy to administer.  
 "My little boy had large scrofulous  
 ulcers on his neck and throat from  
 which he suffered terribly. Two physicians  
 attended him, but he grew continually  
 worse under their care, and everybody  
 expected he would die. I had heard of  
 the remarkable cures effected by Ayer's  
 Sarsaparilla, and decided to have my  
 boy try it. Shortly after he began to  
 take this medicine, the ulcers com-  
 menced healing, and after using several  
 bottles, he was entirely cured. He is  
 now as healthy and strong as any boy  
 of his age."—William F. Dougherty,  
 Hampton, Va.  
 "In May last, my youngest child,  
 fourteen months old, began to have sores  
 gather on its head and body. We ap-  
 plied various simple remedies without  
 avail. The sores increased in number  
 and discharged copiously. A physician  
 was called, but the sores continued to  
 multiply until in a few months they  
 nearly covered the child's head and body.  
 At last we began the use of Ayer's Sar-  
 saparilla. In a few days a marked  
 change for the better was manifest. The  
 sores assumed a more healthy condition,  
 the discharges were gradually dimi-  
 nished, and finally ceased altogether.  
 The child is lively, its skin is fresher,  
 and its appetite better than we have ob-  
 served for months."—Frank M. Griffin,  
 Long Point, Texas.  
 "The formula of Ayer's Sarsaparilla  
 presents, for chronic diseases of almost  
 every kind, the best remedy known to  
 the medical world."—D. M. Wilson,  
 M. D., Wiggins, Arkansas.  
**Ayer's Sarsaparilla,**

**JARVIS RECORD.**  
 WEDNESDAY, AUGUST 20, 1890.  
**CURRENT NOTES.**

Chicago is proud, having just been  
 officially declared the second city of the  
 United States in point of population.

The fire losses in the United States  
 and Canada for the past seven months  
 aggregated \$62,534,745. For the same  
 period last year they were \$75,306,500.  
 The losses were largest in July this  
 year, being \$14,723,500.

It is stated that a party of English-  
 men are preparing plans and will form  
 a company with the object of building  
 a canal from Port Stanley on Lake Erie  
 via London to Port Franks on Lake  
 Huron, a distance of 50 miles. There is  
 a difference of fourteen feet between  
 the levels of the two lakes.

The live stock shipments from the  
 port of Montreal for the month of July  
 amounted to the large number of 17,359  
 head of cattle and 18,243 sheep. This  
 is a considerably larger number than  
 has been shipped in one month pre-  
 viously. This great exportation of live  
 stock via the St. Lawrence ports is one  
 proof of the importance of keeping the  
 country free from contagious diseases  
 by the sanitary quarantine regulations  
 enforced by the Department of Agri-  
 culture.

A curious calculation of the amount  
 of food consumed in a lifetime of seventy  
 years has recently been made by M.  
 Sover a French savant, now chief of the  
 Reform club of London. Among other  
 things, M. Sover says that the average  
 epicure of three score and ten will have  
 consumed thirty oxen, 200 sheep, 100  
 calves, 200 lambs, fifty pigs, 2,200 fowls,  
 1,000 fish of different kinds, 30,000  
 oysters, 5,475 pounds of vegetables,  
 243 pounds of butter, 24,000 eggs, and  
 four tons of bread, besides several hogs-  
 heads of wine, tea, coffee, etc. This  
 enormous amount of food will weigh  
 but little short of forty tons.

This reads a good deal like a ghost  
 story, but they say it is true. Dan  
 Anderson, of Dawn, was chosen treas-  
 urer of a school fund, and \$560 was  
 handed over to him. He had no big  
 safe in which to keep it, so he put it in  
 an old bottle and hid the bottle among  
 some old clothes in an outhouse. The  
 money remained there quite a while,  
 and one day a trustee came to get \$50  
 of the fund for some school business.  
 The bottle was still found loaded with  
 the money and put in the same place.  
 But next morning when Anderson went  
 looking for it both money and bottle  
 had disappeared. Some one had stolen  
 the money. It is said he had to mort-  
 gage his farm to raise the required  
 sum for the school.—St. Thomas Jour-  
 nal.

WELLAND, Aug. 8.—A peculiarly sad  
 and fatal accident occurred about a mile  
 north of here to-day, by which Fred.  
 Rounds, a young man, 32 years of age  
 lost his life. He had been engaged cut-  
 ting oats with a binder, and as near as  
 can be ascertained the seat broke, and  
 in falling deceased pulled the lines and  
 the team backed the big wheel on his  
 head, crushing it. Mr. John Phelps  
 had been talking to him a 11 o'clock  
 and this was the last seen of him alive.  
 Not coming to dinner, Rounds wife  
 became alarmed and went to the field  
 to ascertain the trouble and was horri-  
 fied to find her husband dead under the  
 binder, but she was unable to get his  
 body out until assistance came. De-  
 ceased was well and favorably known  
 in town and well liked by all, having  
 resided here most of his life.

Efforts still continue to be made to  
 effect an alteration in the barley item  
 of the McKinley Bill. American brew-  
 ers are exerting all their influence to  
 produce a reduction of the duty from  
 25 to 15 cents a bushel. About one-  
 fifth of the barley used in the United  
 States comes from Canada. And the  
 reason is that our barley is superior to  
 the homegrown. Plenty of barley of  
 native growth is to be had but it lacks  
 the essential quality required. Other  
 substitutes for barley are to be got, but  
 they are inferior even to American  
 barley, while what is wanted is some-  
 thing superior. The hope indulged a  
 couple of years ago, that American  
 barley equal to Canadian would soon be  
 forthcoming in sufficient quantity ap-  
 pears to have flown. Under the Mc-  
 Kinley Bill one or two things must  
 happen. American brewers may dis-  
 pense with Canadian barley, or they  
 may buy it in spite of the increased  
 duty. In the former case, their cus-  
 tomers must be content to take an  
 inferior quality of beer; in the latter,  
 the consumer will have to pay the duty  
 or a large part of it. Possibly the  
 result may be two varying qualities of  
 beer, the better made by the use, more  
 or less liberal, of Canadian barley.  
 That quality would tell, and command  
 the necessary price, we may believe on  
 the evidence of the importations of  
 English and Scotch ales. (Of course, the  
 general consumption would be of the  
 inferior article. It will be strange if,  
 in this item of barley, Americans do  
 not contrive to injure themselves quite  
 as much as they injure Canadians.—  
 Monetary Times.

**That's What We've Been Telling Them.**  
 Letter in Boston Globe.  
 I notice in the Globe of the 25th  
 instant some remarks pertaining to the  
 capture of Canada if the United States  
 and England should go to war. Now  
 if our army officer who gave vent to  
 the above mentioned remarks had  
 weighed his words, perhaps the taking  
 of Canada would not seem as easy as it  
 did. Let us look back to the years  
 1812 and 1825, and see what part of  
 Canada we took then. We find such  
 battles as Lundy's Lane, Queenston  
 Heights and other numerous and hard  
 fought days in which the Canadian  
 forces were equal, if not superior, to  
 ours. And at the close of the war we  
 did not have in our possession enough  
 of Canada to build a respectable city on.  
 They managed to make that heading  
 unaided by England, who had as much  
 as he could do to keep Napoleon in  
 check, and could consequently give  
 her colony no material aid. Now, if  
 the United States and England went to  
 war what a different footing Canada  
 would be on. By the time Mr. Blaine  
 and President Harrison had made up  
 their minds what to do, England would  
 have out of her 290 war ships a suf-  
 ficient squadron to down all the opposition  
 on the great lakes and to destroy Chi-  
 cago, Oswego, Buffalo, Detroit, Mil-  
 waukee, and other numerous and important  
 cities, which are of almost priceless  
 importance to the United States. It  
 may sound odd to say Canada, aided by  
 a good squadron on the great lakes,  
 could hold her own with the United  
 States, but such would be the fact if  
 hostilities were engaged in. She has  
 advantages for aggressive measures  
 which we have not. If we wanted a  
 fleet of any account on the great lakes  
 it would take some time to build it.  
 Before we could have one ship properly  
 under way the Canadians could have  
 a fleet transported from the Atlantic by  
 the way of the St. Lawrence and canals  
 wholly through Canadian territory to  
 their destination. These are facts which  
 should not be passed over too lightly.  
 We have a populous and wealthy terri-  
 tory bordering on the lakes almost  
 unprotected from a neighbor with whom  
 we have been at war and may some  
 time in the future be at war with again.  
 Canada may be taken, but she would  
 inflict before being taken such damages  
 as would make the gain to the United  
 States small indeed.

**The Wilson Scales.**  
 We would call attention to the adver-  
 tisement of the Wilson scales. We  
 seldom say anything in favor of articles  
 advertised in this paper; but we cannot  
 refrain from saying something in favor  
 of the improved Wilson scales, because  
 any person having anything to do with  
 scales will acknowledge them as a true  
 standard of correctness, and the largest  
 concern in the country are using them  
 in preference to any other make. We  
 would like every farmer to have one of  
 them in his barn, and not take the word  
 of the buyer every time he comes to  
 town to sell his grain.

**Wilson's Fly Poison Pads.**  
 One of these pads will kill more flies every  
 day for a month than can be caught upon a  
 large sheet of sticky paper. A 10c. packet  
 of Wilson's Fly Poison Pads will last a whole  
 season. Sold by all druggists.
