Different Kinds of People.

In every community there are always discriminating people who invariably get the very best value for their money. Whether it is in household furniture, clothing, or any other line, these people will get the best goods at the same price as their neighbor gets inferior articles. Of course, the results always prove the shrewdness and wisdom of the discriminating people referred to. It is a money-making discrimination. In the same way people of good judgment are readers of the Family Herald and Weekly Star, Montreal. The knowing ones are aware of the great value of the Family Herald and Weekly Star in the family. They know it is reliable, because in each department it is edited by the best men that money can secure and the result is they have a satisfactory paper, a well informed paper, a real authority upon all the questions that interest the majority of mankind. The Family Herald and Weekly Star, Montreal, has a universal circulation.

A \$750 Cottage

or its equivalent in cash will be given to the person detecting the greatest number of errors (words wrongly spelled or misplaced) in the December issue of "Our Homes." In addition will be given two cash prizes of \$200 each, four of \$100, eight of \$50, ten of \$25, twenty-five of \$10, fifty of \$5, one hundred of \$2, and one hundred and fifty of \$1, distributed in the order mentioned in rules and regulations, which will be sent with a copy of December issue on receipt of 15 cents in stamps. Special cash prizes given away almost every day during competition which closes February 1st, 1891.

The Egg Trade.

FINANCE DEPARTMENT,
Ottawa, Nov. 10th, 1890.

The Canadian export of eggs has increased with great rapidity since 1868 as is shown by the following figures:—

YEAR.	DOZENS.	VALUE.
1868.....	1,893,972	\$ 205,971
1874.....	4,407,534	587,599
1878.....	5,262,920	646,574
1882.....	10,499,082	1,643,709
1886.....	12,758,532	1,728,089
1887.....	12,955,288	1,827,143
1888.....	14,170,859	2,122,283
1889.....	14,028,893	2,159,910
1890.....	12,844,610	1,795,913

These exports were made almost entirely to the United States, which afforded a ready and convenient market at fairly remunerative rates, and so long as there was no duty imposed by that country no attempt was made to seek for markets in other quarters.

Now that a duty of 5 cents per dozen has been imposed upon eggs by the McKinley tariff, attention has been directed to the possibilities of other markets. There is little doubt but that the United States people will, even in the face of the present high duty, consume a considerable quantity of Canadian eggs, and will pay the whole or the greater part of the duty thereon, inasmuch as the home supply is not at present sufficient for their own consumption, and because peculiarities of soil, feeding and climate, make Canadian eggs superior to most, and equalled by few. It is, however, to be remarked that in the United States the prices of eggs show a considerable diminution during the past few years, thus indicating that the home supply is so far increasing on the demand as to lower the prices paid, and consequently to diminish the value of the market to Canadian exporters.

In the search for other markets for her surplus eggs, Canada naturally

turns to Great Britain where the consumption of eggs, besides being enormous, is increasing very rapidly as is shown by the fact that the import of eggs rose from 6,228,437 great hundreds (120 eggs) in 1880 to 9,432,503 great hundreds in 1889. As the home supply cannot keep pace with the demand, the import is greater every year and although the competition is keen Canada would have nothing to fear from adverse tariffs, and can be assured that the quality of her eggs would give them a rating with the best imported eggs.

For the year 1889 the number and value of eggs imported into Great Britain were as follows:—

IMPORTED FROM	NO. DOZENS.	VALUE.
Russia.....	6,230,360	\$ 810,378
Sweden.....	81,090	12,931
Denmark.....	9,467,140	1,396,329
Germany.....	30,050,550	4,359,419
Holland.....	224,060	37,084
Belgium.....	18,270,070	2,764,048
France.....	29,505,960	5,749,212
Portugal.....	178,190	30,762
Spain.....	134,960	26,966
Other foreign countries.....	8,710	1,713
Channel Islands.....	171,620	31,658
Other British possessions.....	2,520	438
Total.....	94,325,030	\$15,220,938

The Customs valuation per dozen averages 16 cents.

In 1890 the importation figures will no doubt be much larger, as the returns for the first nine months of the year, compared with those of the first nine months of 1889, show an increase of over five and one-half million dozens.

As showing the relative demand for egg imports in Great Britain and the United States, the following table of eggs imported by the United States in 1889 (according to their own returns), is instructive:—

	1,528 \$	382
Austria-Hungary.....	215,164	33,223
Belgium.....	126,300	6,425
China.....	74,950	11,899
Denmark.....	140	24
France.....	73,355	14,119
Germany.....	4,914	897
England.....	4,100	820
Scotland.....		
Nova Scotia, New Brunswick and Prince Edward Island.....	3,637,222	481,609
Quebec, Ontario, Manitoba and N. W. Territories.....	11,731,864	1,864,020
British Columbia.....	975	86
Hong Kong.....	15,219	780
Italy.....	12,468	2,078
Japan.....	20	5
Mexico.....	18,587	2,380
Netherlands.....	500	70
Cuba.....	1,503	154
Turkey in Africa.....		5
Total.....	15,918,809	\$2,418,976

The Customs valuation was an average of 15 cents per dozen.

An analysis of the above tables shows:

1. That as regards the import of eggs into the United States and Great Britain, the latter country demands about six times as many as the former;
2. That the Customs valuation in Great Britain is one cent per dozen greater;
3. That the distance of Canada from Great Britain is not a bar to successful competition; and
4. That a sea voyage across the Atlantic in the cool climates traversed by our ocean steamships does not preclude the successful prosecution of the business.

It will be seen that Russian eggs are shipped to Great Britain from the Black Sea; that Portuguese and Spanish eggs cross the Mediterranean and Bay of Biscay; that Germany gathers eggs from various parts of her Empire and transmits them by lengthened land and sea voyages to the central market.

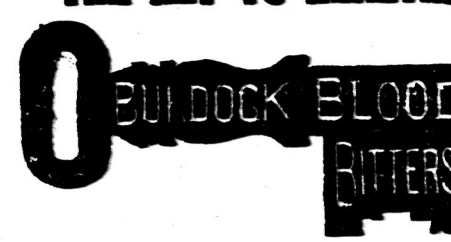

It will also be observed that quantities of eggs from Belgium, Denmark, Germany, Italy, Hong Kong and China, find their way to United States markets and compete there with the home product.
