How She Became a Missionary.

"I'm doing missionary work a good deal of the time," was the reply of one of the immost charming women of New York, to a friend, who asked how she busied herself. "I see by your looks you wonder what I mean by that. Fill tell you. A few years aggravated character for a long time, and segretated of the time, of the most aggravated character for a long time, and of thirty-three know perfectly well how a gard the doctors failed to help me. Existence aggravated character for a long time, and of thirty-three know perfectly well how a lingering, living death. One day I saw Dr. Pierce's Faverite Prescription advertised in whose early charm has passed, who does Pierce's Faverite Prescription advertised in the newspaper. Something in the advertisement impressed me favorably. I caught at the glimmer of hope it held out as the drowning man is said to catch at a straw. Still, I did not dare to hope. But I got the medicine, and behold the result! I feel so well, so strong, and oh! so thankful, that I go about telling other women what saved me. In no other way can I so well show my gratitude to God, and to the man who has proved such a benefactor of women, and my love for my suffering sisterhood."

Useful Knowledge.

To purify water hang a small bag of charcoal in it.

For toothache try oil of sassafras and apply it frequently, if necessary.

Vinegar bottles may be cleansed with crushed eggshells in a little water. To brighten carpets wipe them with warm water in which has been poured a few

drops of ammonia. If the color has been taken out of silks by fruit stains ammonia will usually restore the color.

A good liniment for inflammation, rheumatism, swellings, etc., is olive oil well saturated with camphor.

A good cement is melted alum, but it must never be used where water and heat are to come in contact with it.

To clean a stove of clinkers, put a handful of salt into it during a hot fire. When cold, remove the clinkers with a cold chisel.-Good Housekeeping.

PRETTY SUPPLETONS.

Not the Kind of Women Sensible Men

should Murry. We had thought that the cult of the pretty simpleton had died away like the cult of "sensibility" which distinguished Miss Austen's time, and with it the fear of the pretty woman of cultivation. We notice, however, that Mrs. Snoad, President of the Women's Progressive Society, at the end of a most sensible, and indeed able, letter ad-vising girls what to do if they find life too mighty pleasant when you get to it, and the monotonous, published in the Daily News of Tuesday (week), thinks it necessary to remind them and their mothers that young women with brains and energy to use them do get married. We hear, too, on many sides that the old dread which thirty years since so greatly checked the progress of women's education, has again revived, and that a wave of opinion is warning mothers and young women that culture makes the latter too "formidable" to young men, and that "the clever ones" miss the most natural and most fitting of women's careers. They get appointments sometimes, but they never get proposals. We believe that the facts are misrepresented, and that the fear, which if well founded would rightly check education, is almost entirely without foundation. Having watched the movement in favor of female education from the beginning with entire impartiality—that is, with a keen dislike for the "advanced" women who want, as Mr. Frederic Harrison says, to be "abortive men," to vote, and to ride astraddle, and to discuss "The Kreutzer Post Dispatch says: The audiences of the Sonata," and a strong sympathy for the variety theatre of the Crystal Palace of women who desire culture, and gain-Leipsic are agog at present over a feminine ful work, and control of their own money — we think we may say of the Crown Lands, having been born at confidently that to the latter, their grand Strasburg, and from the time she was 8 profession, marriage, is in no way debarred. years old she was drilled in the arts of the Attractions for attractions, they are courted circus. Loaded down with 624 the days of Helen, and will be when the pounds, a gigantic balancing rod in her hands and with heavy iron balls dangling from her body, Miss Victorina displays the days of freign, and will be when the world cools; but they are quite conscious of the advantage possessed by the sensible and the cultivated. They know what terrible her almost supernatural strength to the bores ignorant girls can be—we do not mean by "ignorance" mere want of familiarity with learning-how utterly unreasonable they often are, and how much more armor and balancing on her shoulder the liable they are in middle life to grow acrid, snappish, or positively ill-tempered. There is no one so perverse as the woman without intellectual interests whose situation hapwhose early charm has passed, who does not understand one word in six you say, and who can neither sympathize with failure nor understand why you have succeeded. Camaraderie, one of the most delightful of all the bonds of union, is impossible between the able and the silly. The men, too, are aware that it is the clever girls, not the simpletons, who are free from the senseless extravagance which is perhaps, of all the foibles which are not exactly vices, the most permanently irritating in wives. That thing, least, culture has done for the majority of cultured women, it has taught them how to count. Here and there, perhaps, may be found the "Nina" of Mr. Norris' clever story, "Matrimony," the competent and cultured woman to whose selfihsness expenditure seems a necessity, and who is only not extravagant when she has six thousand a year, who will plunder her father without remorse, and keep her mother without a shilling; but the immense majority of cultivated girls are economical. Frugality is their road to independence. They could vou to say? not live their lives if they cost their fathers too much, and they learn to know the value of pounds, to avoid debt with horror, and to see that discount is allowed them if they pay ready-money. They are not, perhaps, devoted to "housekeeping" as some of the unlettered are, meaning, three times out of five, endless and harrassing interference with their servants; but they can keep house, when they know their incomes, at an outlay well within them. The men understand that by a kind of instinct, our system of courtship allowing little chance of real knowledge-the American It is perfectly astonishing to note at what system does, and the Canadian-and prices clothing is sold. FROM THE WINDOW.

Life.

(Marie More Marsh in Chicago Times.) Yes, it is a long way up these two flights of steep stairs, and I tell you, Tom, I'm not as young as I used to be.

I'm growing kind of stout of late, and sometimes I am pretty well wind-broken air is fresh and pure up here, and there's a view from the window that somehow I'd hate to miss.

Overlook the park? Yes, the front window does. You get a pretty glimpse of the lake and trees looking out beyond the church spire and that red roof next it : but that isn't the view I meant. My favorite is from this side window here, and I'll show it to you after a bit. I keep the shade drawn most of the time, for I don't feel just at liberty to show it to every one who comes up. You see it's sort of private-in fact,

it's a peep into my neighbor's window. There, old fellow, don't look shocked. It's all right. The people don't mind it a bit, for they never draw the curtains; and sometimes they tell baby to throw kisses across at me.

You see there are only three of them in the family—a big, boyish papa, and a pretty little mamma, and a baby. He goes to bed early, baby does, and every night I sit and

watch them undress him. First, papa takes him on his knee and clumsily unfastens the little dress and tries to pull it off down over baby's feet, as though it were a pair of trousers. Then the mother screams and laughs and tells papa that he is wrong again, and then papa tries it the other way and catches the frock on the baby's head somehow. Little mother shows just how it should be done and slips the plump little arms out of the sleeves, and then she folds the garment and hangs it over a chair Then come some petticoats, and papa gets clasps her hands and baby throws kisses

I tell you it is a sight for a lonesome bachelor, old man.

Why! it must be about baby's bedtime now. They might not like having a strange spectator, so I'll fix it so that you can see without being seen.

You sit in the shadow and I'll pull up the shade—there! Why! their curtains are drawn-and Tom, come here—what's that card in baby's window? My eyes are not what they used

What's that you say? "For rent, inquire within?" That's strange! And Tom, look down at the door—isn't that a white crape

These act like magic. No griping or drenching follows, as is the case with the old-fashioned pills. The relief that follows resembles the action of Nature in her hap piest moods; the impulse given to the dormant liver is of the most salutary kind, and is speedily manifested by the disappearance of all bilious symptoms. Sick headache, wind on the stomach, pain through the right side and shoulder-blade and yellowness of the skin and eyeballs are speedily remedied by the Pellets.

PHOTOS SENT BY WIRE.

A Girl May Now Telegraph Her Picture. The transmission of pictures by electricity is one of the latest applications of the subtle but extremely useful fluid, and the principle of this new discovery is somewhat similar to that on which the telephone is based, use being made of varying degrees of light, instead of sound, as in the telephone. In order to send a picture over a wire it is first photographed on what photographers call a stripping film, composed of gelatine and bichromate of potash. After the picture is transferred to this film the film is washed with lukewarm water, by which all but the lines of the picture are removed,

leaving the photograph in relief. The point of a tracing apparatus when drawn across this film from side to side rises and falls as it strikes each line of the picture. This wave-like motion of the tracer is made use of to produce similar motion in another tracing apparatus at the other end of the line by means of complicated electrical mechanism, and each depression and elevation in the picture is reproduced in a waxen cylinder on the receiving instrument. To accomplish this it is necessary to go en-

Popularity of Blondes.

It is interesting to know that an intelligent hair-dresser claims that blondes cannot be done away with; that blondes are essentially the beauties of civilization, and that | they cannot be driven away, says the December Ladies' Home Journal. He says that the blonde can dress more effectively, and that a well-kept blonde has ten years' advantage in the point of youthful looks. You cannot expunge her in favor of the brunette even in literature, for in the novels turned out during the past year there have been 382 blondes to 82 brunettes.
