Ten Reasons

For the Wonderful Success of Hood's Sarsaparilia. the Most Popular and Most Extensively Sold Medicine in America.

Hood's Sarsaparilla possesses great medicinal merit, which it positively demonstrates when fairly tried.

2 It is most economical, being the only medicine of which " 100 Doses One Dollar" can truly be said. 3 It is prepared by a Combination, Proportion and Process Peculiar to Itself, unknown to other preparations, and by which all the medicinal value of the various ingredients is secured.

It effects remarkable cures where other medicines have utterly failed to do any good whatever.

It is a modern medicine, originated 5 by experienced pharmacists, and still carefully prepared under their personal supervision.

It is clean, clear and beautiful in sppearance, pleasant to take, and always of equal strength.

It has proven itself to be positively the best remedy for scrofula and all blood disorders, and the best tonic for that tired feeling, loss of appetite and general debility. >

8 It is unequalled for curing dyspepsia, sick headache, biliousness, catarrh, rheumatism and all diseases of the kidneys and liver.

9 It has a good name at home, there being more of Hood's Sarsaparilla sold in Lowell, Mass., where it is made, than of all other sarsaparillas and blood purifiers combined.

Its advertising is unique, original, honest, and thoroughly backed up by the medicine itself.

A Point for You.

If you want a blood purifier or strengthening medicine, you should get the best. Ask for Hood's Sarsaparilla, and insist upon having it. Do not let any argument or persuasion influence you to buy what you do not want. Be

Fattening Lambs for the British Market.

The Ontario Experiment Station at Guelph has been making some important experiments in feeding lambs for the British market. Bulletin No. 69 of this station says the lambs were a mixed lot, and take them all in all were somewhat below the average, as when they were purchased good lambs were hard to get. They were evidently the offspring of sires of the principal breeds which we have in the country. Each lot of lambs was turned into the rape fields and fed upon the rape until October 20, when one hundred of them were chosen for the experiment. In selecting, compact, medium sized animals were chosen, and especially those having dark faces so far as they could be obtained. Notwithstanding, a considerable number were not of this class. The most ungainly ones, therefore, were counted out, and but nmety of the lambs were included in the experiment proper. The ration fed was practically as follows:--

Oats, 7 parts; oat screenings, 1 part; peas, 3 parts; and bran, 1 part by weight. The grain was fed in the unground state. The quantity of the grain fed was increased from time to time, and the average amount consumed per day by each animal throughout the experiment was 1.3 lb. The lambs were given all the his they would eat. It consisted of clover and timothy, but the principal portion was clover.

The average amount consumed per day by each animal was 1.91 lb.

The roots consisted of turnips sliced in strips before being fed. The amount at first given to each animal per day was 1 lb. This was increased fro time to time until February 12, when they were given 5 lbs. each per day. and this was the quantity given until the close of the experiment.

The experiment began on Oct. 24, 1890, and closed on April 24, 1891, covering a period of 182 pays. During this time each lamb made an average increase of 50 pounds. The average weight of each lamb at the commencement of the experiment was 84.85 lbs., and at the close 135 lbs. The lambs were put on board the cars on May 1 The shipment reached Liverpool in good condition and without the loss of a single lamb. The English buyers pronounced them one of the best lots of lambs ever sent from Canada to England. They killed well, dressing 681 lbs. each, or a little more than half the live weight, which is considered a good return, especially after a journey of over 3,000 miles by land and sea. The meat brought 17 cents per pound, the highest quotation at the time in the wholestle market. The average value of the lambs at the commencement of the experiment was \$4.03, and the average price for which they were sold in the English market was \$7.76.

The cost of transportation and sale of the lambs was \$375.21 or \$4.17 per head. This was considerably more than the average outliy, which experienced shippers put at from \$2.50 to \$3 per head. This arose in part from The Most Entertaining Stories, the smallness of the shipment, which of necessity would involve more expense relatively than when done on a large scale. It is confidently believed that the cost of transportation and sale will be much reduced in the next shipment If, in this shipment, \$2.75, which is about the average cost, were charged against the lambs for shipment and sale, the financial result would be as follows:-

Total cost of lambs. . . \$ 995 30 Total value as before. 1,231 43 Gain per cent. on the

investment...... 23 72 per cent. Some of the conclusions drawn from this experiment include the following:-That average grade lambs will fatten satisfactorily in autumn and winter

when fed daily a ration consisting of some rape for a time, 1.30 lb. grain, 1.91 lbs. hay and 3.07 ib. roots. That average grade lambs when fed in winter similarly to those in this experiment will make a gain of 50 lb. in six months, that is to say, .275 lb. per day, or .825 JARVIS, - ONT. In. per month. That with the prices charged in this experiment, average grade lambs can be fattened in winter at a daily cost of 2.07 cents for food. That autumn shorn lambs are the most suitable for spring shipment, as they occupy less space on shipboard, they better resist changes of weather and present a more attractive appearance in the market. That it will pay to ship lambs to Britain at an advance of 2 cents per pound, live weight, over what can be obtained here, but the price obtained in Britain last season was not quite equal to 7 cents per pound, live weight, in Ontario. That there is room for a large and profitable trade in fat grade lambs between Canada and Britain providing they are shipped early in the season.

Does Protection Protect?

Certainly, in one instance, it does. Hood's Sarsaparilla is the great protection against the dangers of impure blood, and it will cure or prevent all diseases of this class. It has well won its name of the best blood purifier by its many remarkable cures.

The highest praise has been won by Hood's Pills for their easy vet efficient action. Sold by all druggists. Price 25 cents per box.

Entrance Literature, 1892.

The following is the list of literature selections for the high school entrance examinations of 1892:—

A Fact

WORTH knowing is that blood diseases which all other remedles fail to cure, yield to Ayer's Sarsaparilla.

tion of this statement comes to hand daily. Even such deep-seated and stubborn complaints as Rheumatism, Rheumatic Gout, and the like, are thoroughly eradicated by the use of this wonderful alterative. Mrs. R. Irving Dodge, 110 West 25th street, New York, certifies :-

About two years ago, after suffering for nearly two years from rheumatic discomfort, and having tried various remedies, including mineral waters, without relief, I saw by an advertisement in a Chicago paper that a man had been relieved of this distressing complaint, after long suffering, by taking Ayer's Sarsaparilla. I then decided to make a trial of this medicine, and took it regularly for eight months. I am pleased to say that it effected a complete cure, and that I have since had no return of the disease

Mrs. L. A. Stark, Nashua, N. H., writes: "One year ago I was taken ill with rheumatism, being confined to my sickness very much debilitated, with no appetite, and my system disordered in every way. I commenced to use Ayer's Sarsaparilla and began to improve at once, gaining in strength and soon recovering my usual health. I cannot say too much in praise of this well-known medicine."

"I have taken a great deal of medicine, but nothing has done me so much good as Ayer's Sarsaparilla. I felt its beneficial effects before I had quite finished one bottle, and I can freely testify that it is the best blood-medicine I know of."—L. W. Ward, Sr., Woodland, Texas.

Ayer's Sarsaparilla,
