An old-fashioned. ill-working furnace is a nonproducer.

It consumes the coal, but through leaks and cracks wastes the heat.

It is not economy to have such a furnace in your own home, or in your tenant's home.

If you are thinking of building you should be interested in Sunshine Furnace. It adds 100 per cent. to home comforts.

As soon as you let the contract for your house decide on your furnace. The "Sunshine" man will be pleased to tell you just how the rooms ought to be laid out with an eye to securing greatest heat from the smallest consumption of coal.

If you want to experiment with the question don't specify "Sunshine."

MERYOUS DEBILITY

### Ravages of Consumption.

The remarkable increase in deaths from consumption (tuberculosis) within the last few years is The death occurred at Brantford now attracting the attention and earnest consideration and study of the leading medical authorities of Europe, America and Canada, and the most strenuous efforts are being made to check its further developments. Many eminent men suppose that Consumption cannot be cured, but not so with Dr. T. A. with sugar beet growers, who are T. A. Slocum's PSYCHINE, who scurrying all over the country in asserts that this terrible malady of farm help now amounts to almost in its various bearings; and says that consumptives are constantly Joseph H.
