bad luck away.

We can supply you with first-class Parchment Paper, either plain or printed. It looks more business like to have them printed and costs very little more than plain. We use a special ink that water and salt will not affect. Call and get our prices.

THE RECERD, JARVIS ONT

Germs and How They Work

In a public lecture delivered by Dr. Amyot in connection with the Toronto university summer course, he said that infection was due to minute vegetable or animal organisms which formed toxins or poisons which altered the tissues of the body to enable the organism to use it as food. The disease was not buyers, held on Tuesday night, the due to the presence of the organism, but to the action of the poison. Some, like the tetanus of lockjaw bacillus, pour out large quantities Agricultural Department for an inof toxin into the system. Others moved more slowly.

Diseases caused by animal organism were mainly those prevalent in tropical countries, such as malaria, the one thing which prevents white races from living in the tropics, made the French give up the Panama Canal and which has forced the seve her four children after dis- Italian out of Italy and made him covering the house to be on fire. our navvy. Free Advertising .(Kingston Whig.)

The question of free advertising is a prolific source of worry to every publisher. He does not wish to appear mean or to offend his friends, and yet he must remember that he has to depend upon the revenue from his paper to/provide his bread and butter, and no small portion of this revenue must be made out of the advertising. The storekeeper is not expected to hand out free of charge the goods he keeps for sale; the publisher has his advertising space for sale, and he should not be expected to give it away free of charge any more than the merchant is expected to give away his goods.

The by-law to expend \$100,000 in the wells drilled by Hon. Adam Beck to increase London's water supply carried Monday by 1,800 majority. The by-law to extend the mains was defeated. It was announced that the work would be

Sloventy Packing.

Grimsby, July 23. Grimsby district fruit dealers are getting wrathy at the numerous complaints coming from customers over the contents of crates and baskets that are not up to the standard as regards packing, quality of contents, and poor measure. At a large meeting of matter was discussed from all points, and it was decided if complaints continue, to appeal to the

A great fault with shippers is the poor attention paid in fastening the covers of packages. There are seldom more than two fasteners put in, and the chances are that one cover in every ten works loose in transit and either spills a portion of the contents or disorganizes them to such an extent that there HAGERSVILLE. is very little resemblance to the genuine article that left the orchards when it arrives on the custo-

The housekeeper then raises a row with the city dealer, and the latter sits down and sends off a hot letter to the fruit district. If growers do not pay more attention to these most important details at once there is going to be something doing between them and the buyers. There is no excuse these days for such slovenly packing as is noticea- . Hamilton and Brantford marhalf handles, or no handles at all, torn covers, and with one end agape, and dirty, mouldy shrivelledup contents rushed in at the last minute in the confusion of shipping, are to be seen. These are not casual matters at all, and reflect severely on the trade to the detriment of careful shippers. A couple of over the rifles used sounded some- Methods of artificial protection lawsuits in each locality would what un-British from over here, were inoculation with anti-toxin, bring some of these growers to their It appears the bone of contention which did not kill the organism, senses, and show them that the great industry must be protected ed by it; stimulation of the natural even at the cost of some hard feelings.
