The Jarvis Record

WEDNESDAY, SEPT. 1, 1909.

Preparations are already being made at Ottawa for the next session of the Dominion Parliament, which is expected to open on Nov. 18th.

The man who discovered gold on Cripple Creek died in comparative poverty the other day. He is said to have lost his property, from which \$230,000,000 of gold has been taken, by a spree.

Of the members of the Ross Government, two are now holding honorable positions on the Bench. Another is Lieutenant-Governor, while still another, Hon. John Dryden, has just passed away amid general recognition of his personal worth and of his important services to the province. Manifestly a government containing so many good ingredients could not have been so very bad in combination.

It may not be out of place to call the attention of rural school trustees to the fact that the government gives a grant of \$100 to any section that purchases an acre of land for a school garden, and also an annual grant of \$20 to the trustees, and \$30 to the teacher where the work is carried on. A great deal could be learned, even by country children, from a competent teacher, in the way of agriculture and horticulture. More than that children might be led to take more interest in these subjects and be content to stay on the farm.

Next time you are tempted to patronize the mail order department stores consult the advertisements in your local papers and visit your home merchant. If he has not what you want he will get it for you. If it is not right he will make it right for you. Nothing can be fairer than this. You will not lose anything by the transaction, you will be the gainer in the long run and you will have the satisfaction of knowing that you are doing your share towards building up your town and keeping it in the front rank. Form a "buy at home club" join yourself and induce your neighbor to come in.

Honey, it is expected, will be remarkably plenty this year. The crop is good and there are more people in the business than formerly. During the past few years the industry has been a paying one, with the result that more have taken it up. One reason for the large supply this year is that the bees wintered well, very few of them dying. The cold weather in the spring kept them back to some extent. Because of that the clover did not bloom out as usual, but those in business fed their bees sugar in many cases. Had it not been for the late spring the supply of honey, it is said, would have been larger than ever known before.

The Toronto Star makes a sensible suggestion in regard to the teaching of French in Ontario schools. That is that the pupils should be brought into touch with the French newspapers of the country and given live French instead of "those anxious enquiries as to the whereabouts of the lead pencil of the gardener's mother which the grammarians favor." This would lead naturally to the diffusion of the newspapers of this province among the English speaking citizens of our neighbor to the east. It would increase Ontario knowledge of Quebec conditions and help in cementing the union of the two races.

The Single-tax Association of Ontario which J. W. Bengough, of Toronto, is President, are circulating a petition to the Premier and Legislative Assembly of Ontario, asking that the Assessment Act may be so amended that municipalities may tax improvement values at a lower rate than land values, business assessments, incomes and salaries to be classed with improvement values, and the difference in rates to be determined by the municipality. Reasons for the petition are that buildings and other improvements are the products of individual industry, and are beneficial to the community, and should not be discouraged by taxation, but that land values, being caused by the presence of the community as a whole, should be taxed for the benefit of all. Land speculation would thereby be discouraged and productive uses of land promoted. The cities of Ottawa and Toronto have both endorsed this petition.

County Council

Council met at the call of the Warden, pursuant to adjournment. All the members were present.

Dunnell-Parsons.—That a further sum of five thousand dollars be taken up on the credit obtained by the County from the Canadian Bank of Commerce in Cayuga and that the Warden and Treasurer sign notes for the same to apply on House of Refuge account.—Carried.

Shaver-Avery.—That a by-law be read a first time to build a bridge over the Thompson Creek at Dunnville.—Carried.

Parsons-Dunnell.—That leave be given to introduce a by-law for the purpose of building a bridge on the town line between Walpole and the Indian Reserve and that it be read a first time.—Carried.

Pyle-Avery.—That a by-law to build a bridge over Thompson Creek be now read a second time.—Carried.

Roulston-Powell.—That the by-law to build a bridge over Spring Creek on Indian Town Line be now read a second time.—Carried.

Smelser-Dills.—That the by-law to build a bridge over the Thompson Creek be read a third time, signed by the Warden and Clerk and entitled a by-law as in the original motion.—Carried.

Murray-Mino.—That the by-law to build a bridge between Haldimand and Indian Reserve be now read a third time, signed by the Warden and Clerk and the corporate seal attached and entitled a by-law as in the original motion.—Carried.

Avery-Pyle.—That the Treasurer of the County transfer to the credit of Mr. Shaver as Chairman of the Road and Bridge Committee at the Canadian Bank of Commerce, Dunnville, one thousand dollars to meet current expenses in connection with the bridge account.—Carried.

Pyle-Shaver.—That we do now adjourn to meet on the 29th of September.

Adopting Business Methods

An exchange remarks that it is pleasing to note that as years go by more farmers write letters on paper with printed letter heads and have their addresses on the envelopes they use.

It was once thought that no farmer could do this unless he was engaged in the production of some specialty or the breeder of pure-bred stock, but all this is changing. Not only a few but every farmer might use the printed letter heads, as other business men do, there being no good reason why he should not and many reasons why he should. And, furthermore, farms might be named and the names of the owners placed where they may be seen by travelers, going along the highways. Now that rural mail delivery is becoming common, with very little work the name of the owner of the farm might be painted on the mail box, or on the stand under it. Nothing gives a person so much satisfaction when driving along the roads through a township as to know the names of the persons who reside on the farms nearly everyone of which has some interesting features distinguishing it from farms adjoining it. For instance if one sees a fine herd of cattle grazing in a field one like to know to whom they belong, and the same may be said in regard to other live stock, the crop, farm buildings, etc. For purely business reasons, if for no other, farmers should use printed letter heads and have their names put in a prominent place in front of their residence.

What a Great Man Said to the Great American People.

Parisian Sage is a discovery of a celebrated scientist, who spent the best years of his life in perfecting this great hair tonic.

In giving his recipe to the American people he said, Parisian Sage is the most delightful hair dressing in the world, but it is more than a hair dressing. It cures dandruff by killing the germs that infest the roots of the hair; it stops falling hair; it gives vigor and strength to the hair roots. T. E. Morrow sells Parisian Sage at 50 cents a large bottle and guarantees it to do all that is claimed for it, or your money is refunded. If you do not reside near a druggist who sells Parisian Sage, send 50 cents to Gironi Mfg. Co., Fort Erie, Ont., and a bottle will be sent you all charges prepaid.
