WEDNESDAY, SEPT. 8, 1909.

### Experiments in Crops

Four hundred and ten farmers throughout Ontario conducted exof the counties of the Province. periments were Middlesex, Huron, \$3,000. Brant, Norfolk and Muskoka. The for the good work which they have done, not only for themselves but ed in a very concise form.

WINTER WHEAT

Four varieties of winter wheat were distributed last autumn to those farmers who wished to test some of the leading varieties on their farms. The average yields per acre of straw and of grain are us follows; Imperial Amber; 1. 4 tons, 24. 1 bus.; Abundance, 1. 3 strength to the hair. tons, 21. 9 bus.; and Nigger, 1. 4 tons, 21. 9 bus.

grentest yield per acre in the coof erative experiments throughout Ontario in 1007 and in 1998, as well as in 1909. It also came first in in popularity with the experiments in each of these years. The Impertal Amber will again be distributed T. E. Morrow will give you your throughout Ontario this autumn as money back if it fails. one of the varieties for co-operative experiments. We distributed the Dawson's Colden Chaff for cooperative experiments throughout Ontaino in each of twelve years, but not within the last three years, but within the last three years, According to eftensive inquiries which we have made this year, the Daw- to Manhood in a season son's Golden Chair is still the most ed rivals that of many city schools. Care-popular and the most extensively ful attention and individual instruction, grown variety of winter wheat in together with modern methods, taught by the Province.

Call and have your eyes and our school has every advantage that tested free of charge and should you need glasse. autumn of 1908, is as follows : Mam- goes to make up a modern Business Colexperiments throughout Ontario. the Mammouth White surpassed the Common rye by an average of 5 bushels per acre in 1907, 5. 4 Kushe's per sere m 1968, and 6 hashets per acre in 1900.

In the co-operative experiments with deferrent fortilizers applied to linter wheat the average yields of eran year as follows Mixed Fertilizer, 25, 2 bus. Nitrate of Soda, 23. Shus.: Muriate of Potash, 22. thus, ; and Superphosphate, 22. 7 bus. The unfortilized land gave an average of 10 9 bas, per acre. The Superphosphate was applied at the | x rate of 320 bounds and the Marinte of Petach and the Mitrate of Soda each 160 pounds per acre. The him & Fertilizer consisted of onethird of the quantity of each of the ther three ferulizers here mention. he and cost of the fertilizers as need in this experiment is be-

An each of six years, the seed of damy Vetelies and of Winter Rye has been distributed throughout Ontagio for no-opertive experiments: in testing these crops for fodder nurreses. In the average of six only experiments, the Halry Veters produced slightly the largest vield of system fedder per nere but In 1009 the largest yield was produce by the Winter Rye.

DISTRIBUTION OF MATERIAL.

As long as the supply lasts, material will be distributed free of charge in the order in which the numbertions spereceived from Ontario farmers wishing to experiment ad to report the results of any one if the following tests; 1, three varieties of Winter Wheat; 2 varieties of Winter Rye; 3, five fertilizers with winter Whent, 4, Autumn and Spring Applications of Nitrate of Sode and Common Salt with Winter Wheat; 5. Winter Emmer and Winter Barley; 6, Hairy Vetcher and Winter Rye as Fodder Crops. The size of each plot is to be one rod wide by two rods long. Material for numbers 3 and 4 will be sent by express and that for the others by mail. O. A. C., Guelph, Ont., Ang. 18.

### Fired Straw Stack.

Brantford, Sept. 3.—As a sequel to the destruction of the barn and contents belonging to Fred Ilett, a farmer on the Paris road, last Monday, came to-day the admission of William Hawkins, a sixteen-yearold Barnardo boy, who had worked for Hett, that he had touched a have been received from thirty-six been taken to Toronto and will be deported as an undesirable.
