OUR WHEAT

Robert Meighen Talks About the Farmer and Crops.

He Should Not Be in a Hurry to Market His Grain.

Montreal despatch: Mr. Robert Meighen, president and general manager of the Lake of the Woods Milling Company, has discussed in very interesting fashion his views upon the present crop situation.

"I am a strong believer that the farmer is at present in the same, if not in a stronger, position than he was at the corresponding period last, season," said Mr. Meighen. "He again holds the key of the position. The crucial point is simply, if he deliver his wheat in large volume as soon as threshed, and rushes it forward, having the tendency to congest the market, unquestionably values will recede for the time being.

"I firmly believe that it is not necessary for the farmer to strive to deliver all his wheat before navigation closes. History will in all probabinty repeat itsef this season, as it did last, when the grower realized a higher value after close of navigation than before. The farmer has from the present time up to, sav. the first of March or beginning of April to deliver his wheat. I do not advise the farmer to hold his entire crop to deliver at any specific period, but would advise moderate deliveries. The altimate result to him will, in my opinion, be more satisfactory.

"We are short on this continent," continued Mr. eMighen. "The outturn of the present crop on this continent will be at least 150 million bushels short of last year's. I believe it is generally admitted that Frence will be at least 50 millions short for domestic consumption. Instead of being an exporter, France this year will be an importer."

In reply to the remark that, operating a large milling plant; the Lake of the Woods people would naturally be expected to keep wheat prices down, Mr. Meighen said:

The wheat dealer is in a somewhat different position from the miller. If he buy cheap wheat and the market advances, he is likely to benefit to the full extent of the advance. If we were the only millers in the country, then it advantage of the advance in the raw material, whereas, under presest conditions, if we buy cheap wheat the other miller will do the same, and place his flour on the market equally low. If a high price is ruling for wheat, we expect to get a corresponding price for our manufactured article."

WOMAN POISONED.

Was Given Tartar Emetic By Gruggist Instead of Rochelie Salts.

Lucknow, Ont., despatch: Margaret Murray, of Detroit, aged twenty, died at the home of her uncle, Daniel Muray, in Ashfield Township, yesterday, in consequence of drinking tartar emetic, wrongly dispensed for Rochelle salts.

Miss Murray, with her brother, sister and parents, had been on an old boys' reunion visit to Lucknow. Her father and sister returned to Detroit last week. On Monday she called at the drug store of Garnett Armstrong here and asked for a small quantity of Rochelle salts. Receiving her purchase, she returned to her uncle's, and on Tuesday morning took a done of the drug, and became violently ill. Emetics were promptly administered, and medical aid summon-

ed, but without avail. Coroner Milne, of Blyth, empaneled a jury and an enquiry was conducted by-Crown Attorney Zagar, of Goderich, The evidence went to show that the error was due, not to careless dispensing, but to the accidental placing of the poisonous drug, only a few days before, on the empty shelf, in the bottle intended for Rochelle salts. This had been done by an experienced clerk.

The jury returned a verdict of aceidental poisoning, adding a recommendation that henceforth the placing of dangerous drugs on the shelves be not left to an assistant. Mr. Armstrong, who has been in business here for four years, feels his position keenly, but is quite exonerated from criminal negligence in the matter.

Miss Murray was a daughter of Mr.

LEFT ON TRACK.

Tramp at Emo.

Emo, Ont., despatch: Strage reports are in circulation with regard sary to go over the field once more to the circumstances surrounding the with a cultivator before the crops are death of a tramp here a few days , ut in and then the operation is essenago. The man's name is anknown. but he was stealing a ride from Fort Frances on a C. N. R. freight. He was under the influence of liquor and fell from the car to the track, the train severing both legs and one arm. It is asserted that a local clergyman was passing at the time and saw the man, but did not go to his assistance. the doctor's office. He was conscious, but died in two hours. The authorities decided that an inquest was unnecessary. The deceased had come from the United States and difficulty was experienced in making arrange-ment to bury him. The remains were to take charge of the service.

WIDOW WEDS.

Former Wife of the Late King of the Belgians Married.

Paris, Aug. 27.-The marriage of Baroness Vaughan, widow of King Leopold, to Emmanuel Durieux took New Cases Also Reported in Chioplace at 6.30 this morning at Arronville near Balincourt, the residence of the Baroness. The early hour did not save the couple from the photographers, who were ambushed in the Mairie, where the civil ceremony took place, and who nearly filled the church where the religious function immediately followed.

The Baroness wore a black dress, purple hat and a thick veil. She and M. Durieux, tried to balk the cameras by holding handkerchiefs to their faces. They were intensely annoyed to find that their attempts at secrecy had failed. Both ceremonies were cut as short as possible and were completed in fifteen minutes. M. Durieux donated \$100 to the

TICKET SWINDLE.

Conductors and Ticket Agents Discharged By the C., B. & Q. R.

Omaha, Neb., Aug. 27.-Half a dozen conductors and one ticket agent have been discharged by the Chicago, Burlington & Quincy Railroad, as the result of an investigation which reveals the fact that the company has been defrauded out of many thousands of dollars. The ticket agent, it is said, would sell a ticket for a certain train, give the number of the ticket to the conductor of that train, who, instead of punching the pasteboard, would return it to the ticket agent without making a report to the company. The agent would put the ticket on sale again.

It was said the receipts on some trains fell so low that an investigation was made, and developments followed. Detectives' reports show that the same ticket has been sold half a dozen differ-

HOW HE PLOUGHS

would be quite different; we could take One Southerner Plants His Crops With Dynamite.

> J. Henry Caldwell, of Spartanburg, N. C., is the first man to utilize commer cial dynamite in plowing land. The method of planting the cartridges was simple; one man walked ahead with a crowbar and stuck it into the ground about three feet; the man following affixed a percussion can to the stick of dynamite and two feet of fuse and tamped it into the hole with a rake handle, finally kaving only the white fuse protuding. Incidentally, the dynamite used was of the strength ordinarily used for blasting stumps and is not as costly as that used in quarries for the removing of rock.

After the planting of the dynamite charges a large crowd of the native population gathered near to witness what they regarded as the novel whim of their most progressive farmers. The negroes of the locality did not know what to make of the proceedings and looked with awe upon the operations calculated to wrench from nature the productive crops she refused to yield to their simplier methods. The exploding of the charged field was not without its amusing side. Many of the nearby neighbors, hearing that several hundred pounds of dynamite were to be exploded, removed household belongings and adjourned to their farthest premises, window frames were taken out and the sheriff instructed to hold up the exploding of the charged field, made a formal call upon Mr. Caldwell to cometo an agreement in regard to the inevitable damage which the neighbors felt

sure would ensue. In expleding the field, four rows were set off at a time, one man going rapidly down each row lighting fuses with a red-hot iron as he went. The result was not unlike the setting off of a great bunch of firecrackers. The explesions came thick and fast and both the sub and surface soils were sent into the air in clouds, falling on the land in a powdery mist and leaving periodical holes where the cartridges were planted about four and a half feet deep. In one case where twelve rows were set off at the same time, the effect was quite awe-inspiring, the reports blended into a continuous roar and the row of a dozen men lighting the fuses were pursued by an ever-rising wave of

After the charges are exploded the field looks not unlike a great colander et with innumerable holes where the harges of dynamite were set, and the will is broken up into unusually fine articles and well aerated. It is necesy C. B. Edwards, in Technical World scrape enough money to come to Can-Magazine for September.

GAS STRUCK AT MALTUN. Brampton despatch: There is great excitement at Malton, six miles from sage. man, but did not go to his assistance. here, ever a strike of natural gas He contented himself with informing made on Tuesday on the farm of Mr. a passing boy about it. The boy Henry Brocklebank, adjacent to the informed a doctor, but before the man willage. The flow is gradually in- she came across to seek him. She was given any attention another train creasing and the drillers believe a found him apparently prosperous and passed over him. 50 BABIES DIE

Infantile Paralysis at Seattle Moves Health Officers to Action.

The Only Specific Gure.

Seattle, Wash., Aug. 27:-Moved to speedy action by the increase in the number of fatal cases of infantile paralysis here, J. E. Crighton, health commissioner, has departed for Kansas City, St. Louis and Chicago to consult expert medical men as to the best method of stamping out the disease that is fast getting a hold on the babies of this city. Up to this week there have been fifty fatal cases, as many as three in a family, and the number of houses under quarantine for the same disease is in the hundreds.

In order to nip the plague in the bud it is the intention of the health officers to procure all the information regarding the disease possible and have special envoys sent to the largest cities to get the advice of noted men. More may be sent to St. Louis to study the disease there and to learn of safe methods of treatment. There are on an average of ten cases a day being reported here and the public generally is alarmed. TEN NEW CASES.

Des Moines, Ia., Aug. 19.-Ten new cases of infantile paralysis were yesterday reported to G. H. Sumner, secretary of the State Board of Health. Five of the cases were reported over the telephone from Mason City by Dr. Wade H. Forest, government surgeon, who has been detailed in Iowa to investigate the disease. The cases are at Aplington, in Butler county. Other cases were reported from Wilton, Pow City, Elkport, Dedham and Providence. A special convention of physicans called by Mr. Sumner will convene here to-morrow to study the increase in infant mortality in Iowa

That the worst is yet to come in Iowa is the opinion of Dr. Forest, who has been in Mason City several weeks. August and September, he declared, are the worst months for

Dr. Henry Albert, State Bacteriologist, displayed the affected portions of a human spinal chord in a recent case and said that the only specific cure known is the use of a portion of the spinal chord of a monkey which has recovered from the disease.

STILL IN JAIL.

Dr. Crippen Anxious to Get Away to England.

Quebec despatch: Contrary to general expectations, Inspector Dew did not take his prisoners, Dr. Crippen and Miss Leneve, home by the steamers Royal Edward or Lake Manitoba yesterday, and both are still at the Quebec jai'.

Both prisoners are stated to be anxious to get away. Speaking to Governor Morin yesterday, Dr. Crip-pen asked: "When do we leave?" On being informed that the time of the departure was not known, he said: "Oh, well, I suppose we will not be delayed long now.

The arrival of Detective Mitchell with the necessary papers from Ottawa is still awaited, and until he gets here there will be nothing done. Although it has not yet been officially announced, it is now understood that the two prisoners, with their custodians, will be passengers on the White Star liner Megantic. when it sails on Saturday. One of the officials of that steamship informlast week that arrangements had been made for Crippen and Miss Leneve to be conveyed to England on the Megantic's return voyage.

GOT THREE YEARS.

Too Many Men From Old Country Wed Again Here.

"There are too many Englishmen coming to this country posing as single men, marrying and leaving wives and families to shift for themselves in the old land," said Magistrate Denison in police court yesterday, in sentencing George H. Ruff to serve three years for bigamy.

No evidence was taken, but Mr. G. Prior Deacon, who defended, asked that Ruff should be dealt with lenienthearing unpleasant tales about the wife he had left behind him

Crown Attorney Corley put a different complexion on the case by stating that when Ruff became hard-up in England his wife helped him to ada, by selling all their furniture and everything that could be turned into money, and then went to work to support herself and child as there was not sufficient money to pay their pas-

Once in Canada, however, Ruff forgot her completely, never writing to

"I will wait for him until he comes cut," said Mrs. Ruff No. 2 to Crown Attorney Corley as her husband was taken away.

SOBER TORONTO.

Inspector Will Please Himself No Matter What Others Say.

Toronto despatch: Chief License In spector Johnston, stated to-day that the license law in Toronto is carried out as well as can be, that he has never tried to please anybody and will continue to please himself, no matter what people may say about the slip-shod methods or political complexion of the License Board or of the inspectors. Commiss er Lamb stated that many complaints had reached him about the inferiority of liquor sold over the bars in Toronto as being injurious to partakers. As a commissioner he said he relied upon the inspectors and the police to carry out the law, having no authority or voice in the appointment of the inspectors. Chief Grasett states that Toronto compares favorably with any city on earth as a sober and sensible one. "You can change the habits of the people," he said. "Some will drink, and some will get drunk. The majority of the drunks are found in the drinking districts, which is down town. The residential section and parks," he says, "is free

TORONTO BAKERS

Defy the Civic Authorities and the Nickle Bread Act.

Toronto despatch: The city bakers have defied the civic authorities and the Nickle bread act for the time being in appealing against their conviction before the Magistrate for selling 20ounce loaves of bread. "We will make the 20-ounce loaf, and they dare not seize it," said one of the big bakers to-

Dr. Sheard, medical health officer. who has charge of the administration of the bread act, has been advised by the city solicitor that while the cases are pending before the courts there should be no seizures. He will follow this advice and refrain from any further interference. He regards the Nickle bread act as very much in the interest of the public, and says the opposition of the bakers is one of the best evidences of that. Toronto bakers, for the most part, do not very much like the 12-ounce loaf, two of which are sold for six cents, and look very much like the regular loaf, but are smaller, and the fear of the bakers is that these loaves, which are worth only six cents, may be sold for ten, and half or twelve ounces sold for five cents.

CON. SAN.

Daughters of the Empire to Build One For Windsor.

Windsor, Ont., despatch: Negotiations have been started by Border Chapter of the Daughters of the Empire for the purchase of the Her homestead, on the Hudson line, Sandwich, as the site for the proposed tuberculosis hospital, for which the members of the Windsor Chapter have been collecting funds. The property includes ten acres, and is situated on high, sandy land. The consideration asked is in the neighborhood of \$4,000. It is expected Dr. R. W. Smith, Provincial Inspector, will come to Windsor to look over the ground before a deal is

SMASH-UP.

ed some of the incoming passengers Trainmen Badly Hurt in Collision at Black Rock Last Night.

Bridgeburg, Out., despatch: A serious accident occurred in the N. Y. C. yards at Black Rock last night. The M. C R. transfer from Bridgeburg in charge of Conductor S. Putney and Engineer Foaks had delivered a train of cars to the N. Y. C. and Conductor Putney and Brakeman Barton had just stepped on the footboard, of the engine of the tender when train No. 52 on the N. Y. C. ran into them. The tender conductor was seriously, if not fatally, injured, and Fireman Thomas of the M. C. engine was badly hurt and both were taken to the emergency hospital in Buffalo. Fireman Thomas' home is in St. Thomas, while Conductor Putney lives with his parents here. It has not been as far as yet learned why the engineer on the N. Y. C. enly as he had only remarried after gine did not stop his train in time to

MATCHES AGAIN.

One Girl Burned to Death and Two Men Badly Burnod.

Sherbrooke, ue., despatch: A fatal fire took place here yesterday afternoon when a barn belonging to John Brooks was burned to the ground a young girl, Ruth Stocks, dying last night of burns received. Buth, with three other children, about 6 years old, was playing with matches in a hay loft, where the fire started.
