Do You Realize the Advan- tages of Concrete?

THE rising price of lumber has compelled the farmer to look for a suitable substitute. Concrete, because of its cheapness, durability and the readiness with which it can be used for every farm purpose, has proven itself to be cheaper than lumber and far more durable. Our Free Book—

"What the Farmer Can Do With Concrete"

shows the farmer how he can do his own work without the aid of skilled mechanics. It demonstrates the economy of Concrete construction as compared with lumber, brick or stone.

CANADA CEMENT CO., Limited
