Becoming Educated Than Whites.

Cape Town, Dec. 5 .- Although it played no conspicuous part in the recent election campaign the native problem. will demand an increasing amount of attention from the union government and Parliament in the near future. In addition to the vexed question of the franchise, various matters afrecting relationships in general between whites and blacks are certain to call for serious consideration. Probably few South Africans are able to treat seriously the views recently pronounced by Prof. R. before the end of the century the Kaifirs will be the dominant race in the sub continent. But, so far as they indieate the progress of the blacks in civilization, his statements are of much

Remarking that the white people numberel 1,200,000 and the Kaffirs 7,200,-000, the professor asserted that one of the principal factors that was welding the natives together was religion, which was being dis-eminated by missionaries. Even is their numbers remained stationary, under the guidance of an intelligent chief the natives would be a menace to the white population. But they were increasing at an enormous rate. and in Cape Colony they were being educated to a great extent.

Nearly every native boy and girl was taught to read and write. He wished he could say the same of the white people. The school returns of the colonly showed that 120,000 natives and 80. 600 white children bad received concation. More and more black labor was being employed in the colony. In a very short time the native would have a large, skilled work he was steadily displaying and a con of S. G. Burr, of Forest, died white labor. Ultimately he would displace the farmer as well. If they gave pital. He had undergone an operation the native political equality, as some politicians had advocated, social equality was bound to follow.

In Cape Town one could see natives having their boots blacked by white men. Intermarriage between natives nally they would find that the race would become a mixture, such as they found in the United States of America. In 1950, if things went on as they were geing, there would be something like thirty millions of blacks in the union. Segregation, in Prof. Broom's opinion. was the only policy that would save white South Africa.

Calgary. Dec. 5.-At midnight last night Sergeant Tacker and another officer of the R. N. W. M. P. left Calgary in the swifterst motor car which could be found in the city for Carbon, distance of seventy miles, in order to arrest John C. Fisk, the man warm Thomas Meiville Robertson implicated by his confession in the murder of Tucker Peach. After a bitter ride through the blinding storm, with the thermometer fifteen degrees below zero, the officers arrived in Ufrion at 2.30 this morning and warred in the vicinity of the livery stable owned by Fisk. As soon as Fish arose he was arrested and a telegram was received by the authorities in Calgary at 11.30 a. m. This is one of

the quickest arrests on second. Robertson appeared before Inspector Duffus this morning, charged with the murder of Tucker Penen. The inspector told the prisoner he would remand him for eight days and he need not plead. Robertson, who looks weak and overwrought, asked only one question; Did her get the other fellow?" Winnipeg, Man., Dec. 5 .- Adjutant McElheny, of the salvation army, was he only witness heard torday at the vice investigation. The adjutant was called by the City Solicitor, and gave evidence in regard to condition in the segregated district. Most of the knowledge he had obtained in regard to those conditions was gained in the performance of his duties as a rescue officer. Much of his evidence was classified

by the Court as hearsay, but still it was interesting, because it was given from a vastly different viewpoint to that of any of the previous witnesses. The adjutant said that he had never even suggested that the police were guilty of graft or received money for protecting lisorderly houses. He also paid a tri-

oute to Magistrate Daly.
