Binds More Sheaves with Less Twine

Plymouth Binder Twine is made right. It works smoothly, ties properly, and the last of the ball feeds as freely as the first. No knots or breaks. Fifty per cent stronger than the strain of any machine actually requires.

PLYMOUTH Binder Twine

Is used more than any other twine because it is known to be the best. Made by the oldest cordage establishment in the United States, where quality and honesty are spun into every ball of twine. Farmers who insist on seeing the wheat-sheaf tag on every ball of twine save money and avoid harvest delays.

A party of twenty Dukhobors who were preparing to march through the country have been landed in Brandon Asylum as insane.

Settlers For Alberta.
 Calgary, July 16.—Mr. F. W. Brown, Publicity Commissioner for Alberta, arriving in Calgary to-day, says: "I left Toronto on Tuesday with a special of ten cars, carrying three hundred Ontario settlers destined for Alberta points. Twenty-five are business men who will open stores in new towns. Others are sons of wealthy Ontario farmers, and the majority will buy land and immediately commence development. Nothing can stop the movement from Ontario to Alberta. The influx is the result of the aggressive Provincial publicity campaign."

Census of Agriculture.
 The next Census of Agriculture will be taken under date of 1st June 1911. The area, product and value of field crops harvested in 1910 will be enumerated for fall wheat, spring wheat, barley, oats, rye, corn for husking, buckwheat, beans, peas, flax, mixed grains, hay and clover, alfalfa or lucerne, corn for forage, other forage crops, turnips, mangolds, sugar beets, other field roots, tobacco and hops; and grass seeds, red clover seed and alsike clover seed will be enumerated for product and value.

Grain and other field crops for the harvest of 1911 will be taken by areas only, as none of these crops will be ripe at the taking of the census. The products of these crops will be gathered later in the year from the reports of correspondents.

Animals and animal products, also under the head of agriculture, will include the number of horses three years old and over, horses under three years, milch cows, other horned or neat cattle, sheep, swine, turkeys, geese, ducks, hens and chickens and hives of bees held or owned by each person at the date of the census on 1st day of June of 1911.

The number of horses, milch cows, other horned or neat cattle, sheep, swine, and poultry sold in 1910, will be recorded, as well as the wool, milk, home-made butter, home-made cheese, eggs and honey products of the year, and the quantities of milk and cream sent to factory or sold.

Pure-bred animals registered, or eligible for registration, which are owned at the time of taking the census will be enumerated for horses, cattle, sheep and swine, but their number will also be counted with all other animals.

 A racing contest v. a horse and an auto last week was very exciting when in front of Alex Webb's a horse took upon himself to test the auto's speed, and came up the road ahead of the auto at a furious speed. The owner of the horse got in the auto and tried to overtake the horse, but the horse not knowing the exact distance he was to run, turned into Mr. F. Ionsen's gate and declared he won the race. Fortunately no harm was done. "He's a good one Alex."
