

Does things other Ranges cannot do

The Most Convenient Range in the World

In the Champion Interchangeable you can use coal alone, wood alone, or gas alone. You can use coal or wood and gas at the same time. You cannot do this with any other range. Champion also has a closed top for cooking with natural gas.

There cannot be an explosion in the

Champion. You light the burners direct. The oven burner cannot be lighted until the door is open. No other gas range is so absolutely safe.

Ordinary gas ranges use the oven for keeping the dishes warm. The Champion has a warming closet.

Champion INTERCHANGEABLE GAS, COAL & WOOD Range

You can change the Champion from a gas range to a coal or wood range in three seconds. And while building a coal fire you can use gas under two pot holes and the broiler burner.

When the coal fire is burning you can still use gas on two top burners and broiler burner in oven, which is an invention worth while. Truly the Champion Interchangeable Steel Range does things other ranges cannot do.

The Champion will cost you about the same as a high-grade steel range. It can be supplied with two extra burners on right hand end, or an instantaneous water heater, or a reservoir heated by gas.

The Champion takes the place of two ranges, thus saving room in the kitchen. Considering these facts it is the best range investment in the world.

The demand for the Champion Interchangeable

is already very large. There may be a scarcity later on. So we advise you to go to our agent and see this remarkable new range at once.

A booklet explaining the Champion fully will be mailed to you free if you will write to our nearest office.

Damming The St. Lawrence.

A group of American capitalists are asking the Canadian and the United States' governments for a very valuable privilege on the St. Lawrence river. They want the right to generate approximately 600,000 h. p. of electric energy by damming that river at Long Sault Rapids near Cornwall. It is a somewhat difficult matter to realize at once what that means; but when we are told that it would take nearly one half of the yearly output of all the coal mines in Canada to produce the same amount of horse power it can be readily seen how valuable such a privilege would be to the capitalists at least. To Eastern Ontario, corporation control of that enormous energy might not be so advantageous. Large corporations with monopoly privileges have ever been noted for their strict adherence to the law of monopoly price, i. e. exacting as high a price as is compatible with the greatest possible profit. With them the consuming public are but incidental to corporation profits.

But there are other more serious objections to the scheme. These have been concisely set forth by the Commission of Conservation in a report on the project made last February before the International Waterways Commission—the tribunal that is to report upon the advisability of the proposed dam. The report of the Commission of Conservation stated that Canadian interests are given a minimum consideration in the company's plans. Of the total proposed development only a small portion (one sixth) would be developed on the Canadian side of the river. The Canadian market, it states, cannot at present absorb its half of the proposed development and, should power be exported to the United States the vested interests it would create there would prevent its subsequent withdrawal to meet the future needs of Canadian industry. Moreover the company proposes a new channel for navigation on the American side of the river, the approach to which would be beset with dangerous currents. Thus, if permission were given to build the dam, not only would it be exceedingly difficult for Canada to proceed with the deepening of the navigable channel of the St. Lawrence, but an all-Canadian route from Lake Superior to the ocean would become a dream of the past.

The Toronto Globe shows an increase of 1,394 columns for the four months of 1910 over the same months of last year. The inference is two-fold: (1) The Globe is winning the increased confidence of the business public, and, (2) there is increased confidence among business men for the future outlook for trade. Canada is enjoying a season of prosperity, and The Globe is keeping step with the onward march of the country.—Bowmanville Statesman.

Victoria Day Concert.

The St. Thomas Journal has the following to say about Will Hollingshead, who will be the leading figure in the concert of May 24: "Mr. Will Hollingshead was the humorist of the evening at the concert given by Forest Rose Grange, and charmed the audience with his humorous songs and stories. He did himself great credit in the production of the humorous song, "Talk? Talk? Talk?" and also in the Patriotic song, "I Want to Be A Soldier." To one of his encores he replied by singing "The Ship That Carried Me Over," and told several stories of special interest to the ladies, Scotchmen and Irishmen. Mr. Hollingshead is, without a doubt, a star in his profession, and the people of this vicinity will be pleased to hear him at some future date.

Fort Frances citizens held a mass meeting and passed strong resolutions against allowing the export of electric power to build up the United States industries.
