Distribution of Seed Grain and Potatoes

From the Central Experimental Farm, Ottawa, 1910-11.

By instruction of the Hon. Minister of Agriculture a distribution is being made this season of samples of superior sorts of grain and potatoes to Canadian farmers for the improvement of seed. The stock for distribution has been secured mainly from the Experimental Farms at Indian Head, Sask., Brandon, Man., and Ottawa, Ont. The sample consist of oats, spring wheat, barley, field peas, Indian Corn (for ensilage only), and potatoes. The quantity of oats sent is 4 lbs., and of wheat or barley 5 lbs., sufficient in each case to sow one twentieth of an acre. The samples of Indian corn, peas and potatoes weigh 3 lbs. each. A quantity of each of the following varieties has been secured for this distribution:—

Oats.—Banner, Abundance, Danish Island, Wide-Awake, Thousand Dollar, Improved Ligowo—all white varieties.

Wheat.—Red varieties: Marquis and Early Red Fife (early beardless sorts of high baking strength) Red Fife (beardless), Preston and Huron (early bearded). White varieties:—White Fife (beardless) Bobe (early beardless).

Barley.—Six rows: Munsiey and Manchurian (a selection from Munsiey). Two rows: Standwell and Invincible.

Field Peas—Arthur and Golden Vine. Indian Corn (for ensilage). Early sorts: Angel of Midnight, Compton's Early and Longfellow. Later varieties: Selected Learning, Early Mastodon, and White Yellow Dent.

Potatoes.—Early varieties: Rochester Rose and Irish Cobbler. Medium to late varieties: Gold Coin, Carman No 1, and Money Maker. The latest varieties are, as a rule, more productive than the earlier kinds.

Only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat barley, peas, Indian corn or potatoes. Applications on printed cards or sheets, or lists of names from one individual, or applications for more than one sample for one household cannot be entertained. The samples will be sent free of charge through the mail.

Applications should be addressed to the Dominion Cereals, Experimental Farm, Ottawa, and may be sent in any time from the 1st of December to the 15th of February, after which the lists will be closed, so that the samples asked for may be sent out in good time. Applicants should mention the variety they prefer, with a second sort as an alternative. Applications will be filled in the order in which they are received, so long as the supply of seed lasts. Farmers are advised to apply early to avoid possible disappointment. Those applying for Indian corn or potatoes should bear in mind that the corn is not usually distributed until April; and that potatoes cannot be mailed until danger from frost is over. No postage is required on mail matter addressed to the Experimental Farm, Ottawa.

WM. SAUNDERS,
Director of Experimental Farms.

The ways of the duck are not well understood by men, not even by the hunters who know their ways in the marshes and study their habits. Why should they be few one year and many the next? Why is it that this year there should be more black ducks in our bays and marshes than ever before in spite of the multiplication of hunters at every resting place in their flight? Not only at Long Point is this noticeable, but at Rice Lake, the Muskoka Lakes, and at every point where ducks collect in the autumn. But the numbers do not affect the price, because the game spirit has created a large appetite in the cities. This has made a two-pound wild duck cost more than a five-pound specimen from the barn yard. To say that the wild is better than the tame is to scoff at science and reflect on civilization. But the romance in human nature counts for something, and it is well to soothe it while satisfying the craving for food even if the stomach has to suffer.

FOR SALE—One of the finest farms in Haldimand County, the property of Dugald Henderson, part lots 4 and 5, Con. 1, Walpole; fine building, productive soil, well watered and fenced: for further particulars apply T. K. Nelles, Simcoe.

Concrete Sidewalks are Safe, Sightly and Everlasting

LUMBER used in damp places and on wet ground—as, for instance, in walks—has a very short life. It requires almost constant repairing and, in a few years, needs replacing.

Concrete, on the other hand, improves with age, and the very dampness which destroys lumber calls out the best qualities of the cement by making it harder and harder—until neither time nor traffic can affect it.

The best of wooden walks keep getting out of repair, and are a continual menace to life and limb. They are also a frequent source of expensive doctor bills and lost time. Then again, they are likely to eat up the original cost

in repairs before they are replaced. Concrete walks are sightly, everlasting and safe. They cost less to build and need no repairing nor painting.

Write for our free book, "What the Farmer Can Do With Concrete."

It tells in plain, simple language, how you can save money on farm construction by using cement for Barns, Dairies, Foundations, Fence Posts, Troughs, Feeding Floors, Hitching Posts, Stalls, Silos, Stairs, and so forth. The Book is well illustrated with photographs, plans and diagrams. Fill out the coupon or send a postal to-day.

Simply address it to

From Good Roads Publicity Association

The representative of a million farmers the Hon. N. J. Balchelder, Master of the National Grange of the United States, is credited with working harder than any other man for good roads throughout the land. Speaking at the recent Convention in Cleveland, Mr. Balchelder, pointed out clearly the growth of public sentiment in favor of better roads. "Where only a few years ago the discussion of measures for road improvement were confined to farm journals and weekly country papers" said he, "we now find the subject given prominence in our leading magazines, national journals, and influential newspapers. To the voices of the farmers demanding larger appropriations for improved roads, we now have direct voice of the manufacturers, merchants, and other business men, who realize that the prosperity of our country depends on the prosperity of our agricultural interests, and that better roads will do more to improve the welfare of the farmers, and indirectly the people as a whole, than any other reform. The agitation for good roads, originating with the farmers, and for a long time conducted almost entirely by them, has broadened out into a great movement."

"The problem of substituting a comprehensive system of improved roads for the dirty roads which constitute 90% of our highways, has been advanced beyond the stage of statements showing the benefits of good roads. Everybody knows that the great majority of our country roads are a disgrace to a people professing to be highly civilized. The real question is, therefore, not that of the advantages of good roads, but the practical question of securing the enactment of legislation providing the necessary funds for the work of road improvement and maintenance."

"It would seem, therefore, beyond question, that the most essential work for good roads at the present time is the creation of public sentiment favorable to the desired legislation, and the organization of this sentiment so as to convince our legislators that their constituents are in earnest in demanding prompt action to provide the funds necessary to give us improved roads."

Kill Them off.

Blackhead, the disease which is causing alarm among farmers and poultry men by killing off flock after flock of turkeys in this country, and is causing losses of thousands of dollars, is more widespread than is generally known. To say the least, a serious state of condition prevails and unless immediate steps are taken by the Government disastrous results must surely follow. While the greatest losses are reported from eastern Canada, outbreaks are reported from various sections throughout the middle west. Once the disease finds its entry into the flocks it makes no halt until the last turkey goes the way of its predecessors. "The disease is undoubtedly making alarming progress throughout the Dominion," said Prof. Gilbert when interviewed. "It is a matter for bacteriologists and it is hoped that efforts will be made to stamp it out in time."

Apples Wanted!

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and mental systems are invigorated; all drains cease—no more vital waste from the system. You feel yourself a man and know marriage cannot be a failure. Don't let quacks and fakirs rob you of your hard earned dollars.

NO NAMES USED WITHOUT WRITTEN CONSENT
THREATENED WITH PARALYSIS

Peter E. Summers relates his experience: "I was troubled with Nervous Debility and excesses in youth. I lay it to indigestion for many years. I lay it to indigestion and excesses in youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me guessed my secret. I imagined everybody in the back of my head, hands and feet were cold, tired in the morning, poor appetite, loose memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicines, wore an electric belt for three months, but received little benefit. I was induced to consult Drs. Kennedy & Kennedy, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through the nerves. I was cured mentally and physically. I have sent them many patients and continue to do so."

CURES GUARANTEED OR NO PAY
We treat and cure VARICOSE VEINS, NERVOUS DEBILITY, BLOOD AND URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES and all Diseases peculiar to Men.
CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.
