Can a Woman Run an Apiary?— Yes, a Woman Said.

Toronto despatch: At the third session of the annual convention of the Beekeepers' Association of Ontario, at the council chamber yesterday, Mr. A. Dickinson, Lancaster, addressed the dele- National gates on "Lessons for Beginners." Amongst the points which the speaker dwelt on were the case of queen bees and the general principles of the mauagement of an apiary. Addresses were also given by Miss Ethel Robson, Ilderton; Provincial Apiarist Morley Pettit, and Homer Burk, Highland Creek. Miss Robson, who gave an able address on "Can a Woman Run an Apiary?" told her hearers that in some ways women had an advantage over men in keeping bees. Unlike the raising of poultry, the work could be performed in pleaswinter months free. At a meeting of the directors of the

association the question of honey exhibits at the Canadian National Exhibition was discussed, the general opinion of the meeting being in favor of having the association put up a honey exhibit, instead of allowing individuals to compete for prizes. Directors of the association for the ensuing year were elected as follows: Messrs. A. Dickson, Lancaster; A. McLaughlin, Cumberland: H. E. Eyre, Chantry: C. F. Edward Martin definitely announces Chisholm, Wallbridge; Jas. Stover, Lindthat he is in the field for the Winnipeg say: J. E. Byres, Mountjoy; J. E. Switzer, Orangeville: U. H. Bowen, Niagara Falla: W. J. Craig. Brantford; D. Chalm-The smallpox situation in Michigan, ers. Poole: D. Nolan, Newton Robinson

In his address on "Aviary Inspecttion," at the evening session, M. Petitt recommended a more rigid inspection of bees imported into Canada. He advocated the establishment of quarantine stations, where diseased hives could be treated or, if necessary, destroyed. An address was also given by President W. Couse. The election of officers takes place to-day.

Mr. C. C. James spoke on the work which women are doing and have done in the Province. Ashen people though of the growth of Canada they were ant The Calgary police approached Chief to think of the thousands of immigrants When modern Ontario started, in 1867. With a view to the erection of a fine there ware a million people on the farms and only =00,000 in the towns and cities. A new agricultural life was when dairying and fruit-growing was specialized. Just at that critical time the women's institutes came into existence. This year there were 600 of those organizations in the Prevince, and

PRAISE FOR STUDENTS.

Dr. Falconer said it was peculiarly fitting that such a body of women should be meeting within the walls of the university, for it gave them an pportunity of seeing the place where heir some and brothers spent several months of each year. He would say which ran aground near Grafton. is without hesitation that the students in Toronto were as well behaved, as pure and as honorable as the students of any other university. The women, he said, were doing a

great work for the home, and in so doing were guarding and enriching the nation. The home should have about it a state of permanence. This was an age of restlessness and adventure, and This was a new country, and the spirit of the men and women who came still be in their children, and still the movement was westward. This was as those of the Old Country.

Too often, continued Dr. Faiconer, people thought they would do gway with the restleseness on the farms by providing better markets, telephones, for Prestoy on arising yesterday led. It was not poverty, but the want of interest, that caused so much social trouble. Women's institutes were dofor a great work because they added

Addresses on Standards for Judging on Profits in Orchards.

Apple Show—Election of New Directors.

Association Passes Resolution Regarding Reciprocity.

Toronto despatch—The demonstrations in spraying and in fruit packing given in connection with the convention of the Ontario Fruit Growers' Association at the Ontario Horticultural Exhibition, in and weather, leaving the evenings and the St. Lawrence Arena, yesterday forenoon, proved to be an educational feature of great value. Of particular interest were the practical talks on box and barrel packing by Mr. Alex. McNeill, Chief of the Fruit Division, Ottawa; Mr. P. J. Carey, Dominion Fruit Inspector, Toronto; and Prof. J. W. Crow, O. A. C., Guelph. These experts showed by example how to pack properly, and explained the various steps in detail.

In the Temple Building in the afterroon Mr. Harold Jones, Maitland, discussed the judging of fruits, and advocated the adoption of a universal standard for the purpose. Score cards were submitted for the judging of plates, col-

lections and seedlings. Mr. W. T. Macoun, Dominion Horticulturist, Ottawa, presented the re port of a committee that had investigated the whole question of judging. The report was adopted for one year's trial, and copies of the score cards will be sent to agricultural societies and fairs in all parts of the province.

In an address on the cost of production and profits in apple culture, Mr. J. G. Mitchell, Clarksburg, told of taking over a neglected orchard last spring and making it pay in one season. In pre vious years the erop from this orehard amounted to 40 barrels, and often as low as 20. This year 170 barrels had been taken off of it, and gave a return of \$540 for marketable fruit, with \$20 for culls, a total of \$560. Expenses amounted to \$665, including rent, leaving a net profit of \$195.

Mr. R. R. Sloan. Porter's Hill, told of an orchard of trees. 17 to 20 years old, that had given an average return for four years of \$103.35 an acre. The cost per acre was \$27, leaving a net profit of \$76.35 an acre. He said that he had older orchards that had given returns as high as \$18 a tree, or \$530 an

The question of co-operation was discussed by Mr. S. E. Todd and others. The consensus of opinion was that something should be done to put the co-operative movement on a firm-

"Shipping Peaches to England," was discussed from all viewpoints by Mr. C A. Dobson, Hamilton; Robt. Thompson t. Catharines; A. Onslow. Niagara-onthe-lake; D. Johnson, Forest; W. W. Moore, Ottawa; and others.

The following directors were appoint d to represent the association in the various districts of the Province: Wm. Alford, Ottawa; Harold Jones, Maitland: W. H. Dempsey, Trenton; Wm. Stainton, Oshawa: W. H. Gibson, Newcastle; L. A. Hamilton, Lorne Park; J. W. Smith. Winona: A. Onslow. Niagaraon-the-Lake: Jos. Gilbertson, Simcoe; D. Johnson, Forest: R. R. Slean, Porter's Hill; F. M. Lewis, Burford; Adam Brown, Owen Sound, and Prof. J. W. Crow, of the Ontario Agricultural College, Guelph .

IMPORTANT RESOLUTIONS. Resolutions were passed commending the Ontario Government for extending agricultural instruction by appointing district representatives in some counies, and recommending that the system e further extended, and that special attention be given to insect pests and fungous diseases to fruit trees and fruits in the short courses that are conducted by these men.

It was resolved also that the association take steps for the holding of a national apple show in Toronto in the fall of 1911

The stand of the association on reciprocity was given in the following resolution, which was passed unanimously: "That in view of possible negotiations 37th Battalion Peterboro Rangers, was it would not be long before there would with the United States in regard to reriprocity in tariffs, the Ontario Fruit Growers' Association wish to put on record its unqualified disapproval of any reduction in the duties on fruit coming into Canada without consulting with this association, the same being now much lower on an average than the duties on manufactured goods, lower than they ought to be in view of the fact that there can be no monopoly or combine in fruits, the price being fixed absolutely by the law of supply and demand within the Dominion, which contains ample territory suitable to produce in the utmost profusion all the fruit that the country can consume for at least many decades to come, which ensures that the consumer cannot be injured in the long run and the fruit industry can be extended in proportion to the growth of the population with some assurance of a permanent market at home."

It was resolved also, "That this association respectfully eails the attention of the express companies to the annovnee, inconvenience and serious loss sustained by shippers and consumers of fruit on account of the pilfering from express fruit packages in transit, and also the careless handling, which results in the broken and damaged condition of the packages; these evils having become so notorious as to constitute a positive injury to the business, which curtails consumption and exposes the shipper to serious loss, for which compensation is practically refused by the companies."

Delore and Martin Sabourin, two brothers, of Alexandria, Ont., charged with stealing a horse and rig, the property of A. McMillan, of Avonmore, on Septemher 19, were arrested at Massena, N. Y., by Provincial Detective F. C Stone.

Skin Sufferers Cured by Cuticura Remedies

Do you suffer from skin and scalp humors that torture, disfigure, itch, burn, crust, scale, injure the hair, and destroy sleep? Then here is convincing proof of the skin health to be found in the Cuticura Remedies. Read in these remarkable statements—taken from the original letters—how others have been speedily and economically cured of eczema (or salt rheum), psoriasis, ringworm, rashes, pimples, falling hair, ulcers, sores and similar afflictions, of young and old, by these invaluable household remedies, when all else fails.

Family's fearful skin torments. Four children covered with raw, torturing eczems. Mother blind with erysipelas, sleepless and nearly mad with erysipelas, sleepless and nearly mad with worry. The hospital seemed their last resert when Cuticura Remedies made perfect cures. — Mrs. Jeanie Smith, 19, Bordwell, R. F. D. 3, Tipton, Ia.

Mildmay Rd., Romford, Essex.

Montreal woman's itching cezema lasted for seeven years. Physician treated her but she got worse. Could not sleep or even put hands in water. Tried all manner of treatment, and even a hospital, but grew worse. Found prompt relief and final cure in Cuticura Soap and Ointment. — Miss Mary A. Bentley, 93 University St., Montreal.

NOVEMBER CROP BULLETIN, 1910 from disease, but complaints have geome from some of the Lake Ontario counties of serious losses among turkeys from

The following statement of crop condi- ! the crop generally may be classed as an tions in Ontario on the 1st of November, excellent one, as to both yield and qualbased upon the returns of a large number of correspondents, has been issued by the Ontario Department of Agriculture. It is the final crop bulletin for the

Fall wheat-While a number of correspondents speak of the yield and quality of fall wheat as being the best for years, others complain of the grain being less plump than usual, owing to dry weather at the time of filling. Taken as a whole, however, fall wheat may be classed as better than an average crop. Spring wheat-Less spring wheat is be-

being the variety chiefly raised. The crop was fully up to the standard this year in every respect. The new fall wheat-An increased acreage of wheat has been sown this fall, and as most favorable conditions existed at seeding, and since that time, the crop is now looking most promising.

ng grown than formerly. Goose wheat

In fact, some correspondents express a fear that the young fall wheat may have too much top for entering the winter. Barley-This grain has turned out well, taking the Province over. The sample was generally plump, and while some discoloration was reported, that is not now considered a serious draw-

back, as most of the barley raised in this

Province is fed to live stock. Oats-Cats were rather short in the straw, but the heads were well filled with grain of good weight, and where fruits yielded well. the crop was not knocked down by rain storms just before cutting it was an unusually good one. On account of wet overstocked, have kept grazing animals weather, when harvesting oats were harder to gather than in the case of the other spring grains.

Rye-This grain is not largely raised in Ontario, but where grown it is classed this season as from fair to good. Peas-This crop has been somewhat discouraging to most growers this year. The vines suffered from drouth, and a green aphis also affected them, as a resuit the pods were but poorly filled in most cases. The pea weevil was also reported in several localities. Mixed grains-Correspondents

hardly as enthusiastic over the growing of mixed grains as they were a year ago. Mandshceuri barley and Daubeney cats are still the favorite mixture, while some prefer to add peas. Peas and oats, and oats, barley and peas, also have their advocates. Corn-While spring conditions were unfavorable for this crop, the summer

the term "splendid" is sometimes used by correspondents in describing the re-Tobacco-This crop ranges from fair to good so far as yield is concerned. Beans Beans may be described as a medium crop, the early planted fields doing better than those put in late, which were caught by rainy weather at

and fall were ideal for its growth, and

Clover Seed-Ontario farmers are paving more attention than formerly to the raising of clover seed. The season has been a favorable one for this purpose. Potatoes-This crop is credited with a large average vield, and many of the returns speak of their excellent quality.

heavy soils, however, and also among some potatoes in cellars. Turnips-This class of roots has done better than was expected when correspondents reported in August. There

There are some complaints of rot on

will be a fair vield excellent quality is reported, and all were safely placed under shelter by the end of October. Carrots—Carrots are not largely rais-

ed as a field crop, but where grown this season they were a success. Sugar Beets-These roots are increasing in popularity for feeding to live stock. They were a good crop where

grown, and were all harvested as corre-

spondents wrote. Fruit-The season of 1910 will be re membered as one of the poorest on record for apples. Some correspondents charge that there is a too general neglect of Ontario orchards, and claim that where spraying and reasonable care were given to fruit trees there were satisfactory results this season. Pears, peaches and plums were more plentiful than apples. Strawberries and other small ed the can on other todders. The abund-

Live Stock—fall pastures have been all that could be desired, and, where not abled the farmers to husband their regin fine condition. All classes of live stock have been remarkably free from serious diseases: in fact, there is practically a clean slate. Horses are in con- prices for all these commendation are siderable demand, and at higher prices high, and many farmers are new study. than formerly. Cattle did unusually weil on the grass, and all ages and classes a brisk demand for beef earthe, sheep can find a ready market at better values and hogs, all the season, and this has than for many years. Young beef ani- left less live stock on hand than usual. mals especially are hard to procure. There have also been too few sheep for the demand. A large and steady traffic has been done in swine. The recent drop in market values has checked sales somewhat, but the supply on hand is barely normal. All over the Province a larger number of silos than usual have been erected this year, many of them made of

Dairying-The milk flow was well maintained by the excellent fall pastures, thus prolonging the dairy season. Butter has gained upon cheese, taking the Province as a whole. As between butter and cheese, prices have rather favored the former, and the local demand for butter appears to be increasing. The general quality of noth creamery and home made butter has been high this

Poultry—The good prices obtained for

disease known as "blackhead." The wet weather of July also was hard upon this class of poultry. Geese and ducks have kept in good condition.

Farm labor-Heip on the farm has been scarce this season, especially in the case of experienced and capable men. The consensus of opinion is that little or no change is likely to take place in the rate of wages in the near future. Domestic servants are almost impossible to secure, the attractions of the town being greater than those of farm life for the great majority of girls.

Threshing and marketing-While some correspondents state that this shing was completed, and others say that none has been done on account of the rush of other fall work, the bulk of the re-Mangels-A good crop of mangels of ports were to the effect that grain separation was well advanced generally. Grain has been moving but slowly to market, except where some farmers have been pressed for ready money.

Fall plowing-Reports as to the progress of fall plowing vary greatly, even in same localities; but as a whole the work was fairly advanced when correspondents reported, with prespects of completion in good time.

Fodder Supplies-Farmers face winter with more assurance than for years, owing to the general sufficiency of all classes of fodder. There is a surplus of hay, ranging from \$3 t | \$16 a ton, according to the nearness to good markets, and there is plenty of fraw. The largely increased site accounted and ation, with the big corn crop, has lessenant fall pastures, and the growing of millet or Hungarian grass, have clear enular winter feeding supplies. A. usual considerable oil-cake, and bear shorts and other mill freds will be nevel sed. but more charily than tormerly, as the ing feeding equivalents. There has been
