Don't burn the leaves. Besides  
creating a nuisance of smoke and  
cinders on the neighborhood, the  
burning of fallen leaves is a mistake  
from an economic point of view.  
The dead leaves are valuable ferti-  
lizers and make good mulching ma-  
terial. To burn them is to destroy  
this value. Collect and put them  
away in a heap to rot and be re-  
turned to the soil, which they en-  
rich immeasurably.

What might have easily resulted  
in an awful calamity whereby many  
lives might have been lost was pre-  
vented by the presence of mind of  
James Banbury on Sunday. While  
walking on the railway track be-  
tween his home and the village in  
the afternoon he noticed that one  
of the rails had become broken and  
knowing that the Webank train  
would soon be due he immediately  
informed the authorities. The train  
came thundering on but was de-  
finitely in time to prevent an awful ac-  
cident. After a short delay a new  
rail was substituted and the train  
proceeded to its destination. The  
young lad certainly deserves re-  
commendation for his timely assist-  
ance.

days.

The Indians and old-timers of the  
Northwest say that the coming win-  
ter will be one of the coldest on  
record. They point to the fact that  
the fur-bearing animals are grow-  
ing thicker and longer coats than  
customary, that muskrats are building  
their houses larger and higher than  
in their custom in mid' winter,  
that the bears are starting to make  
their dens in the most protected  
places, and the little chipmunks  
and gophers are also preparing for  
a siege. They say that these signs  
never fail.

Temperance Convention  
A Convention of the Temperance  
workers of the County Haldimand  
was held in Cayuga on Tuesday af-  
ternoon. The principal speaker was  
Rev. B. H. Spence, Secretary of the  
Dominion Alliance. He spoke of  
the advances of the temperance  
cause throughout the Dominion,  
especially along the line of local op-  
tion. He also spoke of County or-  
ganization as the most effective way  
to carry on the different campaigns  
for the advance of the temperance  
cause in our midst. A resolution  
was then put to the meeting to this:  
"We, the temperance workers of the  
County of Haldimand, think the  
time has come when we should or-  
ganize, and now move that a central  
organization to be known as The  
Haldimand Temperance Alliance,  
be formed with a President, Four  
Vice Presidents, Secretary and  
Treasurer. A mass meeting was  
held in the Town Hall in the evening  
when Rev. R. F. Miller and Rev.  
B. H. Spence were the speakers.  
Mr. Miller spoke on the responsibil-  
ity that rest upon christian men and  
women to be temperate. That the  
beverage that steals away the senses  
and saps the vitality out of those  
who use it should be banished from  
out of our midst. Mr. Spence spoke  
on the Local Option by-law and  
what it meant. It does not say you  
shall not drink but no liquor shall  
be sold where the By-law is passed.

ring somewhat briefly to the gamb-  
ling and white slave evil he describ-  
ed most vividly the terrible evils  
resulting from the liquor traffic. A  
number of years in mission work in  
the slums of a great city. He was  
able to give many pathetic illus-  
trations of the degradation, shame and  
crime associated with legalized traf-

dered appropriate music. The of-

The weight of the circulating blood is  
20 pounds. The average weight of an  
adult is 150 pounds 6 ounces. The brain  
of a man exceeds twice that of any animal.  
A man breathes about 20 times a minute,  
or 1,200 times an hour. The average  
weight of the brain of a man is 3 1/2 pounds;  
of a woman, 2 pounds 11 ounces. 540  
pounds or one hoghead and one and a  
quarter pints of blood pass through the  
heart in one hour. The average height  
of an Englishman is 5 feet, 9 inches; of a  
Frenchman 5 feet, 4 inches; of a Belgian  
5 feet 8 1/2 inches. The heart sends nearly  
10 pounds of blood through the veins and  
arteries each beat, and makes four beats  
while we breathe once. 175,000,000 cells  
are in the lungs, which would cover a sur-  
face thirty times greater than a human  
body. The average of the pulse in infan-  
cy is 120 per minute; in manhood 80; at  
sixty years 60. The pulse of females is
