WEDNESDAY, SEPT. 14, 1910.

The Development of the Sheep Industry in Canada.

For a number of years it has been evident and it is now a matter of common knowledge that the sheep industry in Canada, particularly as regards the general production of market sheep and of high class wool, has been in an increasingly decadent condition. Not only has the number of sheep owned in the country been gradually lessening but the interest in sheep-raising has itself been on the wane. The census of sheep in Canada reveals the fact that the Dominion as regards the number of sheep kept compares not at all favorably with other great agricultural countries of the world. Indeed, as compared with them it has permitted sheep-raising to become a somewhat insignificant phase of its agriculture, notwithstanding its great adaptability both as regards soil and climate for the growing of mutton and wool. In 1909 according to Agricultural returns there were in the United Kingdom 31,839,833 head of sheep, in the Argentine 67,211,754 head, in Australia 37,043,296 head, in New Zealand 23,480,707 head, while the latest returns for Canada place the number at not more than 2,705,390 head. In view of the fact that sheep have not only a direct and primary value through the actual financial returns which they make to their owners, but because they represent as well in themselves a peculiarly important asset in agriculture owing to their ability to increase soil fertility and to check and destroy the growth of weeds upon the land, the situation which the above figures suggest appears to be a rather critical one and one which may well receive careful consideration.

The reasons for the decline in the sheep industry in Canada have been the subject of much comment in various ways and while these need not be discussed in this note it may be well to state that the Live Stock Branch has had its attention very urgently directed toward the present unsatisfactory status of the business and in recognition of its importance to the country generally, has now decided that the time is ripe for the Canadian Government to consider a comprehensive policy and to undertake definite and extended measures likely to operate toward the encouragement, improvement and development of the industry as a whole.

As a preliminary to the adoption of any settled policy, and in order that the Live Stock Commissioner may inform himself thoroughly as to the details of the sheep and wool trade in Great Britain and the United States, and as to conditions as they actually prevail in Canada, the Minister of Agriculture has authorized the appointment of a committee of two competent men to investigate the sheep situation in general in the three countries named. At the same time it is the expectation that, without an actual visit, they will gather as much information as possible concerning the trade of the other great sheep producing countries, in so far as it may be of interest in the development of the industry of Canada. It has been thought advisable to have this Committee consist of, in the first place a wool expert, whose special training has made him familiar with all the technical and practical phases of wool markets and woolen manufacture in the United Kingdom and Canada, and in the second place, a capable Canadian sheep breeder whose experience has given him a somewhat extended knowledge of sheep farming in this country. These gentlemen have already been appointed, and are already pursuing their investigations in Great Britain. The personnel of the Committee consists of Mr. W. T. Ritch of Manchester, England, and Mr. W. A. Dryden of Brooklin, Ontario.

Mr. Ritch though unknown to the members of the Sheep Breeders' Association, has had familiar and honorable relationship with tradespeople in Canada for a period of years, having represented while in this country certain English cloth manufacturers, whose interests he served efficiently and acceptably. Mr. Ritch's experience has made him thoroughly familiar with the woolen industry in England and Scotland, with the wool markets and manufacturing districts of that country, and has besides given a general knowledge of the woolen trade, including that in staple and shoddy articles, and in the manufactured product both of England and America. He has visited also in a business capacity Australia and New Zealand and has made careful observation concerning the growing and marketing of wool in these two countries. Combined with his technical knowledge Mr. Ritch has acquired a practical understanding of the growing and handling of wool on the farm and together with this has evidenced an enthusiastic and intelligent comprehension of what may be expected from the development of the sheep industry in Canada, thus commending himself to the attention of the Commissioner in connection with the appointment to the Committee. It is felt that Mr. Ritch will be able to place such information as the disposal of the Minister, his officers and all interested in sheep breeding in this country as is likely to be particularly

valuable in the furtherance of the scheme for the upbuilding of the industry which is now in contemplation.

The other member of the Committee, Mr. W. A. Dryden of Brooklin, Ontario, is well known to the Stock Breeders of Canada. The present owner of Maple Shade has fallen heir to a large influence in his own province and, although as yet a comparatively young man, has acquired a knowledge of the stockman's art which has already brought him to the fore amongst Canadian breeders. Mr. Dryden's Collegiate and Agricultural education has been such as to bring him in demand in a more or less public way, and in recent years, he has been about Canada a good deal in connection with judging and other work under the supervision of the Live Stock Branch. Mr. Dryden's judgment is practical and his recognized popularity speaks well for the confidence which may be expected from his fellow breeders in his ability to perform, with credit to himself and them, the work which he has now undertaken. In combining the services upon this Committee of a practical sheep man with that of a technical expert the Department has reason to believe that the problems of production and marketing, both as regards wool and mutton, will be studied and discussed in such close relationship that the results of the inquiry will most successfully serve the purpose for which it is undertaken.

After consultation with the Live Stock Commissioner the members of the Committee have of course been allowed the liberty of depending largely upon their own initiative in planning their route and in evolving the details of their investigations. The general procedure will, however, be somewhat as follows: Mr. Ritch will attend a number of important wool fairs in progress during August and September. There he will be in close association with wool merchants and with interested or engaged in the woolen trade in its several branches and will thus be enabled to discuss with them in all its phases the various details of the industry in connection with both home and foreign markets.

Both members of the Committee are arranging to be present at the big late summer and autumn sheep sales which are annually held in the latter part of August, during September and in October. They will visit Smithfield and the larger meat markets of London and of other important cities. It is possible also that they will be present at the annual ram sales at Kelso and at one or two other leading centres with sheep breeders, mutton raisers, dealers, butchers and provision men in all the important localities. It will give them an insight into conditions and methods as they prevail upon the farms throughout the country. It will direct their attention to the systems of marketing in operation in every stage of the business. It will furnish them with information concerning prices, profits and losses, and the nature of the trade, and, in short, give them a knowledge of the great Sheep Industry of the United Kingdom and of the import trade in dead mutton and lambs. It is hoped that the investigations in Great Britain will put the Branch in possession of such information and of such facts and statistics as may enable it to intelligently assist in building up a great Canadian building in the raising of sheep and also in finding a place for the Canadian products of wool and mutton in the commerce of the world.

Returning to Canada, the investigators will visit all the provinces and interview prominent sheep men and manufacturers in order to familiarize themselves with the difficulties, drawbacks and defects in connection with conditions as they now prevail, and which have hitherto operated to retard the advancement of the sheep industry in the country. It is expected that they will gather information as to the injury inflicted on our agriculture through the decline of interest in sheep raising, that they will take note of the localities where the growing of sheep could be most easily and profitably encouraged and that, bringing to bear the suggestions gleaned from their general inquiry upon the various phases of the industry, they will find it in Canada, they will draft recommendations for the guidance of the Commissioner of framing, in the very near future, such a policy as will prove in the best interests of the industry.

If time permits Mr. Ritch and Mr. Dryden will also visit the United States. In many States of the Union, as compared with Canada, almost uniform conditions prevail, particularly as regards the advantages that are possible and which may be derived from an extensive sheep trade. Many single States own more sheep than are to be found in the whole of the Dominion and although to the south of the line there may be some discouraging features in the general situation, nevertheless there may be much in the way of suggestion to be learned from that country. Further, trade relationships between the two countries must always be more or less intimate and as the United States, notwithstanding its heavy duty, imports annually from Canada a very large quantity of wool, it would seem to be of great advantage to have some specific information concerning the status of the trade in the former country and also as to its availability as a future market.

Canada has, undoubtedly, wonderful possibilities and large opportunities in connection with the development of its sheep population. The present investigations have been undertaken as preliminary to the adoption of a permanent scheme for the encouragement and upbuilding of the industry. In the belief that Canadian agriculture must of necessity suffer severely while sheep remain so few in number in the country, the Minister and his officers will not be satisfied until statistics show a return of at least ten times the present estimate, and until sheep raising has established itself as a recognized factor in promoting the national prosperity.

Great Combination Offer.

By special arrangement with the Family Herald and Weekly Star of Montreal, The Record is enabled to offer new subscribers for the balance of the year at the unprecedentedly low rate of Twenty-five Cents for both. This is a chance to secure at less than regular rates a weekly paper containing all the local news, with the best weekly magazine published in Canada thrown in for nothing. Get your order in early.

For first-class laundry work try the Simcoe Laundry. D. M. Allen is the agent for Jarvis. Basket leaves Wednesday mornings and returns Saturday.

It May Be Pneumonia

"A hard chill, pain through the chest, difficult breathing. Then fever, with great prostration." If this should be your experience, send for your doctor. You may have pneumonia! If your doctor cannot come at once, give Ayer's Cherry Pectoral. When he comes, tell him exactly what you have done. Then do as he says. No alcohol in this cough medicine. J.C. Ayer Co., Lowell, Mass.

Keep the bowels in good condition. One of Ayer's Pills at bedtime will cause an increased flow of bile, and produce a gentle laxative effect the day following.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and eruptions disappear; the eyes become bright, the nervousness, bashfulness and despondency disappear; the energy returns to the body, and the moral, physical and mental systems are invigorated; all drains cease—no more vital waste from the system. You feel yourself a man and know marriage cannot be a failure. Don't let quacks and fakirs rob you of your hard earned dollars.

NO NAMES USED WITHOUT WRITTEN CONSENT
THREATENED WITH PARALYSIS

BEFORE TREATMENT

Peter E. Summers relates his experience: "I was troubled with Nervous Debility for many years. I lay in bed, indolent and despondent and didn't care whether I worked or not. I imagined everybody who looked at me gazed at me with pity. Imaginative dreams at night, weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loss, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, but received little benefit. I was induced to consult Dr. Kennedy & Kennedy, though I had lost all faith in doctors. Like a drowning man I commenced the NEW METHOD TREATMENT and it saved my life. The improvement was like magic—I could feel the vigor going through my system. I was cured mentally and physically. I have sent them many patients and continue to do so."

AFTER TREATMENT

CURES GUARANTEED OR NO PAY
We treat and cure VARICOSE VEINS, NERVOUS DEBILITY, BLOOD AND URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES and all Diseases peculiar to Men.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.
