LESSON V.-APRIL 30, 1911.

God's Pity for the Heathen.-Foreign Missionary Lesson.-Jonah 3: 14: H.

Commentary .- I. The Prophet's Mission (3:1-4). God in mercy gave Jonah second call to carry the message to Nineveh. At the first call, instead of going the six hundred miles northeast to Nineveh he started westward to Tarshish, in Spain, a distance of two thousand miles. His disastrous experience on that trip made him willing to obey the second call, although the very conditions that turned him aside the first time still prevailed. He was sent to Nineveh, the great city of Assyria, the nation that was exceedingly hostile to Israel, and which a few decades later carried his own nation into captivity. He was called, single-handed, to carry a strong message of warning to 600,000

people. He was commissioned to enter the stronghold of heathenism, but he went declaring, "Yet forty days, and Nineveh shall be overthrown." veh was an exceedingly great city of three days' journey," and counting 20 miles a day's journey, the distance around the city was 60 miles. This was surrounded by a wall 100 feet high and broad enough for three chariots to be driven abreast. II. The Message Effective (3:5-10).

5. people . . . believed God—It was a strange sight that met the eyes of the Ninevites, and a strange message that greeted their ears, as the foreign prophet in his peculiar prophet's garb and with his denunciatory words passed throughout their city, yet with the work of the Holy Spirit the message took effect and the people believed God. proclaimed a fast-A sign of humiliation and repentance, put on sackcloth-They covered themselves with a coarse cloth made of goat's hair, which was a symbol of sorrow and mourning. The repentance seems to have been immediate and general. 6. the king of Nineveh-He placed himself upon a level with his lowest subject, and all humbled themselves because of their sins. sat in ashes-He left his costly throne and took the lowest place, expressing his deep sorrow. 7. neither man nor beast The case was one of momentous interest and demanded the deepest humiliation. Keil says, "It was the manifestation of the thought, that just as the animals which live with man are drawn into fellowship with his sin, so their sufferings might also help to appease the wrath of God." Men and women, old and young, high and low, and even the cattle themselves, all kept such a fast as the total abstinence from food implies.-Clarke. 8. cry mightily unto God-This shows the intensity of feeling that prevailed. There was a marvelous change from their sinful practices and idolatrous worship to prayer to the true God. turn . . from his evil way-Prayer to he effectual must be accompanied by turning away from all sin. 9.
who can tell if God will turn—The very
fact that Jonah's message, "Yet fortydays," showed a few days' delay in the execution of the sentence gave them hope that if they should repent and turn away from their sine the Lord would accordingly turn away His anger from them. 10. God saw their works- ment on man's sincere repentance, as it He saw as man can not see. Man sees is to execute it in the case of obstin-God sees the condition of the heart. They brought forth "fruits meet for repentence," turning from their evil ways. God repented-He changed his purpose in Reeping with their changed attitude toward him. This missionary journey of the prophet of Jonah was eminently

HI. The displeased prophet instruct. ed (4:1-11). I. Displeased Jonah. It of wrath to sinners. National antipathy seems strange that Jonah should be grieved over the success of his ministry. He had more regard for his reputation as a prophet than for the salvation of nearly a million people. 2. Therefore I fled before unto Tarshish. He named as the reason for his shrinking from duty that he knew the great mercy of God. He had experienced that merey upon his own repentance and was glad. but he was angry because the Lord had mercy upon a repenting city. 3. Let-ter for me to die than to live. It may be that Jonah thought that with Nineveh's overthrow there would be better hope of Israel's prosperity, since Assyria was her strong enemy. Missionaries are tempted to discouragement because of failure to see the results of their labors, but Jonah was disheartened because he had success, although not the kind he desired. 5. What would become of the city. He made a temporary shelter that he might wait until the forty days were ended to see if his prophesied destruction would come. 6. The Lord God prepared a gourd. The gourd vone the castor-oil plant, which had large leaves and grew quickly, making excelent shade from the hot sun. God had mercy upon Jonah in providing for his comfort and also in teaching him a much needed lesson. Though the prophet desired to die, he was glad of the gourd. 7. Smote the gourd. His pleasure in the gourd was short-lived. He had nothing to do with producing the

Sickness is usually caused by the accumulation of waste matter and impurities within the body.

Dr. Morse's Indian Root Pills.

enable the bowels, the kidneys, the lungs and the pores of the skin to throw off these impurities. Thus they prevent or cure dis-

nt each wind. "A ader out wind."-R. V. Such hot winds are of frequent occurrence in that country. We note in connection with Jonah's experience that God "prepared a great fish" (Jonah 1:17), "God prepared a gourd," "God prepared a worm," and "God prepared a vehement east wind," all for the disciplining of the prophet.

9. Doest thou well to be angry. This was a reproof administered with tenderness. Jonah, even with the gift of prophecy entrusted to him, had very pronounced weaknesses. 10. Had pity on the gourd. If Jonah so pities a plant which cost him no toil to rear, and which is so short-lived and valueless, much more must Jehovah pity these hundreds of thousands of immortal men and women in great Nineveh whom he had made with such a display of creative power, especially when many of them repent .- J., F. & B. 11. Should not I spare Nineveh. His merey would not permit him, upon the repentance of the men and women, to destroy the children of tender ages, and the cattle, for he has a regard for the brute creation.

PRACTICAL SURVEY.

Topic—God's purpose for all men.

I. Must be proclaimed by men.

II. Finds fulfilment with the penitent. III. Seeks all nations for His people. I. Must be proclaimed by men. "Preach that I bid thee." The book of Jonah is a great book with a great message and clear teaching on the nature, character and purpose of God. He is revealed as the God of all nations, and herein makes a direct and powerful protest against mere priestism and ceremonialism, and instructs all men to open their hearts to their brethren of all nations. The exclusive spirit among the Jews which regarded all nations as made to subserve the welfare of Israel was always hateful to God. This narrative strikingly illustrates God's love and we may say his eagerness to forgive sinners. He makes man his instrument in blessing man. This plan serves to deepen and stimulate man's interest in all the human family. God's thoughts (3. 2) spokn by men are a converting force. preucher's true function is to declare what God commands him. The highest and noblest success of preaching is in its constructive and saving effects, not in its destructive results. Jonah was a "sign" (Matt. 12, 39-41) to the people of Nineveh of Jehovah's power, justice

and mercy. II. Finds fulfilment with the penitent. So skilful is the Lord that with the weakest instrument he can produce the mightiest wornmanship. He gave unusual power to the message of His servant so that the inhabitants of that great ity were aroused to deep concern and bowed themselves in penitence and in prayer. It is God's immutable purpose to pardon penitent sinners. His purposes are of grace even when they seem to be nothing but proclamations of wrath to the uttermost. He did not change His purpose, only His method of working out His purpose to bring the sinner to salvation by bringing him to repentance. The promises are recorded that they may be fulfilled, while the threatenings are written to provent their fulfilment. It is as much a principle of God's gracious government to suspend the execution of a threatened punish-

into skilful workmen who will rightly sorrow and disappointment to clasten office issues to divide "the word of truth." Whosever and refine us. We may well thank God and live stock. exalteth himself, though it be in the not only for the gourd, but also for the service of a divine commission, shall be worm. humbled. Jonah wanted to be a minister and religious exclusiveness will account for Jonah's conduct toward the Gentile

world.—T. R. A.
PRACTICAL APPLICATIONS. "The preaching that I bid tuce" (3. 2.) The all-wise Father sees the world with

all its needs. He sees our little selves with our hopes, aspirations, capabilities and limitations. He sees our home town, our county, state and nation, but he sees other states and nations also. He sees the regions across the seas and yearns for the salvation of its peoples. tie souds his voice into the soul of one of his followers, and that voice echoes es word. "Go." In foreign missionary work the Master set, the needy field, calls upon his servant to go to it, and gives the message to deliver, John the Baptist had a message (Matt. 3: 2), Jesus had a message (Matt. 4: 17), and Paul had a message (2 Cor. 4: 5.) The message that God bade Jonah preach was brief and pointed, an! reached the ears and hearts of the people. It is the message that God gives now that reaches hearts. It is a fruitles- effort to try to fix up a message of our own, leaving God out of the question. Such efforts bear the impress of man and not of the

"Cry mightily unto God" (3: 8.) The effect of the message was to produce conviction, and such conviction as found its expression in deep humiliation. That beathen king took the stand that every gourd, nor with its withering and dving, right-thinking sinner should take. He humbled himself and cried unto God. The Ninevites believed the message, and, believing it, they cried unto God. There is little hope of the conversion of that seul who will not call upon the Lord. The king's exhortation denotes intense carnestness. Feeble, spasmodie efforts do not avail. The ery continud until the answer came. This heather people set an example for a more enlightened age. Two hundred years after Jonah, the last king of Assyria, prociaimed a fast of a hundred days, because an enemy was approaching and the people prayed to their sun god to deliver them, but they received no answer. The nation was

overthrown.
"God saw their works" (3: 10.) Men expect to see the fruits of repentance in those who profess to turn to the Lord. They expect to see the drunkard abandon his curs, the dishonest man his erookedness, and not that only but to restore dishonest gain; they expect the swearer to cease his profanity, the liar, his lying, and the lazy man, his laziness. God sees more deeply than man can see, for he sees the motives which actuates, discerning whether they are pure or not. Outward niety may satisfy men, but not God unless the outward works correspond with the state of the heart.

the refreshment and comfort of his child-

WONDERFUL CURE OF SKIN DISEASE

After 20 Years of Intense Suffering.

"I have been afflicted for twenty years with an obstinate skin disease, called by some M. D.'s, psoriasis, and others leprosy, commencing on my scalp; and in spite of all I could do, with the help of the most skilful doctors, it slowly but surely extended until a year ago this winter it covered my entire person in the form of dry scales. For the last three years I have been unable to do any labor, and suffering intensely all the time. Every morning there would be nearly a dust-panful of scales taken from the sheet on my bed, some of them half as large as the envelope containing this letter. In the latter part of winter my skin commenced cracking open. I tried everything, almost, that could be thought of, without any relief. The 12th of June I started West, in hopes I could reach the Hot Springs. I reached Detroit and was so low I thought I should have to go to the hospital, but finally got as far as Lansing, Mich., where I had a sister living. One Ir.——treated me about two weeks, but did me no good. All thought I had but a short time to live. I earnestly prayed to die. Cracked through the skin all over my back across my ribs, arms, hands, limbs; feet badly swollen; toe-nails came off; inger-nails dead and hard as a bone; hair dead, dry and lifeless as old straw. O my Go di how I did suffer.

"My wister, Mrs. E. H. Davis, had a small part of a box of Cuticura in the house. She wouldn't give up; said, 'We will try Cuticura.' Some was applied on one hand and arm. Eurekal there was relief; stopped the terrible burning sensation from the word go. They inment and Soap. I commenced by taking one tablespoonful of Cuticura Resolvent three times a day after meals; had a bath once a day, water about blood heat; used Cuticura Soap freely; applied Cuticura Cintment morning and evening. Result: returned to my home in just six weeks from the time I left, and my skin as smooth as this sheet of paper.

"We hereby certify that we are acquainted with the aforewaid Hiram E. Carpenter, and last three years I have been unable to do any labor, and suffering intensely all the time.

"We hereby certify that we are acquainted with the aforesaid Hiram E. Carpenter, and with the atoresaid Hiram E. Carpenter, and know his condition to have heen as stated. We believe his statement to be true in every particular." L. B. Simmons & Son, Merchants; G. A. Thompson, Merchant; A. A. Davis: Millard E. Joiner, Merchant; John Carpenter; A. M. Leffingwell, Attorney and Counselor-at-law, all of Henderson, N. Y.

Counselor-at-law, all of Henderson, N. Y.

The above remarkable testimonial was written January 19, 1880, and is republished because of the permanency of the cure. Under date of April 22, 1910, Mr. Carpenter wrote from his present home, 610 Walnut St. 80., Lansing, Mich.: "I have never suffered a return of the pooriasis and although many years have passed I have not forgotten the terrible suffering I endured before using the Cutleura Remedies."

Since this cure was made by the Cutteura.

Since this cure was made by the Cuticum. Remedies, they have made their way to every part of the civilized world. A 32-page book-let describing humors and affections of the skin will be mailed free to these desiring further information by the Potter Drug & Chemical Corporation, Hoston, U. S. &.

dirheartened prophet needed encouragement and instruction. The gourd was both to Jonah. Sometimes we, like Jonah, can not see beyond our own interests to take in the sight of a world made better by our apparent loss. We are inclined to prize too highly our ease or reputation. God lets us rest and enjoy the pleasant shade for a time that he may teach us a lesson.

"God prepared a worm" (4: 7.) For Jonah's good God "prepared a great fish" (Jonah 1: 17), "God prepared a gourd" (4: 6), "God prepared a worm." The worm was to destroy the gourd that III. Seeks all nations for His people. God loved Nineveh and desired its pre-This lesson portrays to us God's great servation. In Christian experience there mercy and man's object selfishness. We is the "gourd" of encouragement and resee what material God has to transform freshing, and there is the "worm" of

Farm News

The gardener perhaps more than anyone else engaged in agriculture should appreciate the value of stable manure for enriching the soil. As is perhaps known manure, when stacked in the yard, with no covering over it, loses its greatest quality, plant food, by washing of rains

Facts About Motherhood

trying one to most women and marks 98 understands how to

strength, and when the strain is over | west Provinces 21.377.000 bushels. her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of chilfrom an unprepared condition, women It isn't as though the experience

came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty. In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable pound makes women normal.

healthy, and strong.

ssure. On the other hand, if stored under a shed or protected, it will steam and heat thus losing another most important factor, nitrogen. The average mardener is in the habit of storing his manure in the open air, but a better plan is to pile it under a roof of some sort and trample it down tight in order that no air may penetrate through it to drive out the valuable nitrogen. The garden soil should be well treated

The garden soil should be well treated this year with fresh manure, which has beth a sufficient quantity of plant food and nitrogen. To raise good vegetables it is essential to plant them in rich soil and soil in time loses its fertility.

Many farmers keep flocks of sheep because of their ability to renovate the soil and keep down weeds and sprouts, in both of which roles they are a demonstrated success. But the men who will make the most profit from their sheep are the best farmers, who will provide their sheep with comfortable and sanitate quarters and feed them the best that the farm affords.

tary quarters and feed them the best that the farm affords.
Vining means and all other vines should have pole or similar mechanical supports. Some plant corn or sunflower for beans to vine on. This is the "lazy cardener's" method. Two thrifty plants cannot occurs the same soil space at the cannot occupy the same soil space at the same time and thrive. Plant corn and sunflowers by themselves and beans by themselves and give the beans good sup-port if you wish to secure big crop of

bert if you wish to secure big crop of beans.

A correspondent says that the proper way to preserve goose grease is to first render it, and putting it into the bottles, add 10 cents worth of camphor gum. Set it into a can of hot water and set on the back of the stove until melted. It is used to rub all sore joints or painful feet, and never gets bad. In fact, the older the better.

the better.

It is quite certain that potatoes will not mix in the hill any more than chick-ens will mix in the nest, but this does not prevent a change in potatoes in the hill, not due to mixing, but to the ten-dency of all living things to "sport." There will be occasional ears of red corn when no red kernels are planted, and red corn can be propagated by planting these red kernels; so there will be varthese red kernels; so there will be variations in petatoes, and new varieties may be propagated by planting these sperts. Ordinarily new varieties are obtained by planting these sperts. Ordinarily new varieties are obtained by planting the seeds grown on the potato tops, and these seeds will mix because they a re seeds—the potatoes are merely swollen places in the roots.

Two things should be taken into consideration in selecting the heifers which are to become the dairy cows when they grow up. First, the individuality of the calf and second its parentage. Occasionally a good calf comes from interior narentage, but the instances are rare indeed. It is generally safe to reject all offspring from scrub stock.

Horseradish is a very good vegetable for the gardener to raise. To be marketable, however, young roots only must be

able, however, young roots only must be used, and for this purpose new vines should be set out every year, instead of using the old ones, which is a general custom among gardeners. When the patch becomes old from repeated seasons of the roots the plant grows. patch becomes old from repeated seasons of backing off the roots the plant grows crooked. This hurts their value in market. The best method is to cut straight roots from the old these and set them senarately, thus insuring a straight vine with straight roots. The soil cannot be made too rich for horseradish. When allowed to grow more than one year in cultivated fields it becomes a true weed nest.

Quinces should be planted eight to ten feet apart on what would be termed good late strawberry bed—heavy and moist, but never wet or with stagnant water.

Ground bone, wood askes and manure Greund bone, wood asnes and manure are an excellent combination for quinces. They will do well planted in the poultry vard, and may also be grown in tillage land, with a crop of strawberries or vegetables. Some successful growers use a straw mulch or a stone mulch for the

of ince.

As a matter of fact barnyard menure commences to ferment and undergo changes the moment it is dropped. The cranges farmer does not get a value to exceed \$1.50 to \$2 per ton out of his manure, when he should get in increased crops, if the manure be properly handled, a valuation of from \$2.50 to \$3.50 per ton.

Southern New York dairymen are grow-Jonah's mind might be opened to receive the lesson that, as he had enjoyed the gourd and desired its preservation, so make an immense amount of silage.

CROPS AND LIVE STOCK.

The Dominion Census and Statistical Office issues to-day a builetin on crops

The reports of correspondents show that out of a yield of 149.080,000 busacts of wheat harvested just year 141,096,000 bushels, or 94 per cent., were merchantable, and that at the end of Marca 33,-042,000 bushels, or 22 per cent, of the whole, were yet in farmers' hands. The quantity held by farmers in the Maritime Provinces at that date was 488,000 bushels, in Quebec 477,000 bushels, in Ontario 5.002,000 bushels, and in Manitoba. Saskatchewan and Alberta 27,-005,000 bushels. At the same date last year the quantity in hand in all Canada was 30.484,000 bushels, or 18.28 per cent. of the total crop of 166,744,900 bushels. of which 150.868.200 bashels, or 95.87 per cent., was of merchantable quality. Oats, which last year gave a yield of 323,449,000 bushels, was merchantable to the extent of 301.773.000 bushels or 93.20 per cent., and the quantity in hand at the end of March was 127,587,000 bushcis. or 39.44 per cent. In the Maritime Provinces there was in hand at that date 6.985.000 bushels, in Quebec 17,147.-000 bushels, in Ontario 58.742.000 bushels. and in the Northwest Provinces, exeinsive of British Columbia, 52.413.000 bushels. In the preceding year the quantity in hand out of a horvest of 377.450. 000 bushels was 141.499.600 bushes, or 40.03 per cent .: and there was a total of 3:11.190.000 bushels, or 10.86 per cent. The experience of Motherhood is a of merchantable oats.

The barley yield of 1010 was 45,147,000 distinctly an epoch in their lives. Not bushels, and of this quantity there was one woman in a win-ordered is prepared or in hand at the end of March 12.135.000 bushesl, or 29 per cent. The merchantproperly care forher- able yield was 41.505,000 bushels. or 01.93 self. Of course near- per cent. The burley crop of 1900 was ly every woman now- 55.398,000 hushels and the quantity on Ladays has medical hand at the end of March last year was intreatment at the 16.517,000 bushels, 28.81 per cent. The time of child-birth, merchantable quantity of that crop was but many approach 51,499,000 bushels or 92.87 per cent. Onthe experience with tario's crop last year was 20,727,000 an organism unfitted for the trial of , bushess, and that, of the three North-

The merchantable yield of corn last year was 83.23 per cent, of the whole erop, of buckwheat \$5.63 per cent., of potatoes 77.31, of turnips and other roots 86.81 per cent., and of hay and clover 88.72 per cent., which are nearly dren, and indeed child-birth under right | the same as the percentages of the same conditions need be no hazard to health crops in the previous year. The quantior beauty. The unexplainable thing is ties of these crops on hand at the end of that, with all the evidence of shattered March were nearly the same in both nerves and broken health resulting years, except that the supply of notatoes this year is 20,000,000 bushels less and will persist in going blindly to the trial the supply of hav and clover 2,494,000 tons more.

The per cent. condition of live stock on the farms ranges close to the same figures for both years, but is a little higher for all classes this year. For the respective years 1911 and 1910 horses are 35.37 to 93.98, milch cows 93.29 to 91.42, other cattle 90.97 to 89.30, sheep 93.77 to 92.43, and swine 94.38 to 92.77. These outward piety may satisfy men, but not look unless the outward works correspond with the state of the heart.

"God prepared a gourd" (4: 6.) For he refreshment and comfort of his child.

The Provinces: they demonstrate the state of the heart.

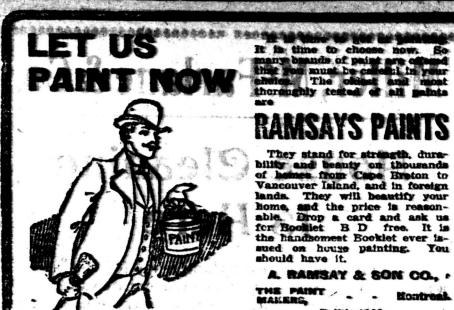

"God prepared a gourd" (4: 6.) For he refreshment and comfort of his child.

The Provinces: they demonstrate the condition of live stock as regards a healthy and thrifty state.

Any weeman who would like propertions are closely maintained throughout all the Provinces; they demonstrate the condition of live stock as regards a healthy and thrifty state.

MONTRICAL LIVES 11 (4) Montreal .- At the Canadian Pacific 6.00 Live Stock Market the otherings, in th 00 morning were 250 cattle, 50 sheep and 0.00 lambs, 515 hogs and 1,500 calves. Ther was no important change in the condition of the market for cattle, prices beunwashed fleece, 18 to 14c; rejects, 15c, ling steady on account of the continued small supplies coming forward. The demand showed no improvement owing to the fact that butchers generally had ample beef on hand for the balance of this week, consequently the offerings do., Acadia 4 65 were sufficient to fill all requirements. imperial granulated 4 55 A few extra choice steers sold at 61-20 choice at 61-4c, good at 53-1 to 6c, fairly good at 51-4 to 51-2e, fair at 434 to 5c and common at 41-2c per 1b. The do., Acadia 4 30 | market for cows was weaker and prices show a decline of 1-2 to le per lb., with sales at prices ranging from 21-2 to be

The tone of the market for hogs was Trade was good and active, with a ra- large, but as packers in most cases had mand is somewhat limited this week, after the Easter trade, they were not auxious buyers, which accounts for the further reduction in price, and sales were made at \$6.50 to \$6.75 per cut. weighted

off the cars.

Receipts of calves were fairly large for which the demand was fair, but as the quality of the stock was mostly common, prices ruled low at from \$2 to \$6 cach. There were a few sheep and spring lambs which met with a ready sele at \$5 to \$10 for the former, and be from 34 to \$9 for the latter.

At the Montreal Stock Yards, West End Market, the receipts of live stock were 250 cattle, 70 sheen and lambs, 585 hogs and 1,760 calves. The one difference in prices at this moriet was in hogs, sales of selected lots being made at \$6.75 to \$6.85 per cwi, weighed off the
