Recipes

Creamed Chicken.

Boil until tender four pounds chicken. When cold cut into small pieces as for salad. Make a dressing of one pint sweet milk, one-half cup sweet cream, one-third cup butter, juice of one lemon, salt and pepper on point of knife, scant one-half cup flour mixed smoothly in enough cold milk to be of the consistency of cream, one can mushrooms boiled until tender in the juice. Mix milk, cream, butter, salt and pepper and cook in double boiler. When boiling stir in gradually the flour which has been wet with the milk until it thickens. Strain the juice of the lemon and stir in last. Stir in the mushrooms and chicken, put in a baking dish and cover with finely rolled cracker crumbs. Bake about twenty minutes. Be sure to put in the lemon after the sauce is cooked or it will curdle.

Spoon Cornbread.

Over half a cupful of corn meal, pour a pint of hot milk, and stir well, bringing to a boil together; add a saltspoonful of salt and stir in two teaspoonfuls of butter; let stand to cool to lukewarm, then add four eggs well beaten, but not separated; turn into a buttered baking pan and cook half an hour in a quick oven. Eat with maple syrup.

Dandelion Wine.

Two quarts of the yellow flowers, four quarts of water, grated rind of two oranges, grated rind of one lemon. Boil (lukewarm), add (and thoroughly stir add four pounds of sugar. When cooled through) three-quarters of a teacup of yeast Then slice the oranges into it from which the thick rind and seeds have been removed), let it stand in an open vessel three or four days; then strain, bottle and cork tightly.

Tomato Soup.

To three pints of soup stock add one quart of fresh or stewed tomatoes and a cupful of rice, and boil for one hour. When the rice is thoroughly done, add a lump of butter the size of an egg; season with pepper and salt and a tablespoonful of sugar.

Elderberry Wine.

Over eight quarts of elderberries pour four quarts of boiling water and allow them to stand for 12 hours, stirring occasionally. At the end of that time strain, pressing out all the juice. To this add one-half ounce of cloves (powdered) one ounce of powdered cinnamon and three pounds of sugar. (These proportions are proper for four quarts of juice. Boil for five minutes and set away to ferment in a stone crock. Cover with a cloth. When fermentation ceases pour off carefully, bottle and seal.

Grape Wine.

Take 20 pounds of grapes, free from stems, wash them thoroughly, pour six quarts of water over them. Let them stand for three days, stirring them twice each day. Put them into a bag and let them hang all night and drain. Add eight pounds of sugar to the juice; set it in a cask; bottle before the winds of March. Eighty pounds of grapes will make ten gallons of wine.

Minard's Liniment Lumberman's Friend.

THE LADIES' AID.

The old church bell had long been cracked,
  Its call was but a groan;
It seemed to sound a funeral knell
  With every broken tone.
"We need a bell," the brethren said,
  "But taxes must be paid;
We have no money we can spare—
  Just ask the Ladies' Aid."

The shingles on the roof were old;
  The rain came down in rills;
The brethren slowly shook their heads
  And spoke of "monthly bills."
The chairman of the board arose,
  And said, "I am afraid
That we shall have to lay the case
  Before the Ladies' Aid.

The carpet had been patched and patched
  Till quite beyond repair,
And through the aisles and on the steps
  The boards showed hard and bare.
"It is too bad!" the brethren said;
  "An effort must be made
To raise an interest on the part
  Of members of the Aid."

The preacher's stipend was behind;
  The poor man blushed to meet
The grocer and the butcher as
  They passed him on the street;
But nobly spoke the brethren then;
  "Pastor, you shall be paid!
We'll call upon the treasurer
  Of our good Ladies' Aid.

"Ah!" said the man, "the way to heaven
  Is long and hard and steep;
With slopes of ease on either side,
  The path 'tis hard to keep.
We cannot climb the heights alone;

Our hearts are sore dismayed;
We ne'er shall get to heaven at all
  Without the Ladies' Aid."
—The Christian Endeavor World.

SCENE OF BURR'S COURTING.

There still stands in the Paramus Valley, twenty miles from New York, in Bergen county, N. J., well preserved and kept, the mansion in which Aaron Burr courted the beautiful Estelle Provost, widow of an officer of the British army, herself an ardent royalist during the Revolution.

In the days of this courtship Burr's command in the American army was stationed at White Plains, N. Y., and he was accustomed to ride from there to Paramus on horseback to the wooing of his lady love, making the journey to and fro between sunset and dawn. The mansion, known as "The Hermitage," is of rough stone with Gothic peaks. A picturesque turnstile admits visitors to the extensive grounds.

Not far away is the old church, likewise as it was in those perilous and romantic days, where Burr and the fair widow, his persistent and ardent wooing having won her, were married. Adjoining and belonging to this church is an ancient burying ground, many of those moss grown gravestones have quaint and grotesque inscriptions. One offers this cheerful invitation:

Dear Brother and Sister,
  Come visit our Tune;
Prepair for Grim Deth,
  For this is your Dume.

It's all right to get up steam, provided you don't find yourself in hot water.

Sick Headache Cured Quickly

Here is a Remedy That Stops Headache and Bilious Turns and Keeps You Strong and Healthy.

When the stomach needs cleansing, the bowels increased activity, the liver additional power, don't use mercural pills, try Dr. Hamilton's Vegetable in composition, extremely mild, yet sure to flush out all impurities and wastes, no remedy is so well adapted for family use. Positively a cure for biliousness and sick headache, unfailing in constipation and bowel trouble, exceptionally good for indigestion, no medicine is so universally needed in every home as Dr. Hamilton's Pills. Good for the young, the old, the sick and the well ones, the benefits of Dr. Hamilton's Pills are manifold. Sold everywhere in 25c boxes.

ILLEGAL VEGETABLES.

In France at the present time it is illegal to raise certain vegetables, such as celery, lettuce and other things which grow near the ground, upon sewage disposal lands, because of the supposed danger of poisonous germs being carried and introduced into the human system. Some experiments have been performed recently which have demonstrated the needlessness of this alarm. Microbes do not enter the body of the vegetable under any circumstances, although it is possible for them to be entrained along the stem and leaves, but this location does not seem to be very favorable to their lives. No evidences of typhoid or cholera were found, although a special search was made for such indications. Generally speaking, only the hardiest germs, such as tetanus, were found, and there is no danger whatever in taking these into the system through the stomach.

Literary Copyright in France.

A curious question of literary copyright has been raised in France in an action brought against Mr. Anatole France, the academician, from whom the publisher, Mr. Lemerre, acquired in 1882 rights on a two volume history of France for the sum of £120. The manuscript lay for twenty-nine years in the publisher's desk, and it was only in November last that M. Lemerre decided to publish it.

He sent the proofs to the author, who, however, refuses to correct or return them, contending that the publishing rights have lapsed, the works representing views he held three decades ago. This interesting point will be argued by the leading lights of the Paris bar. —London Evening Standard.

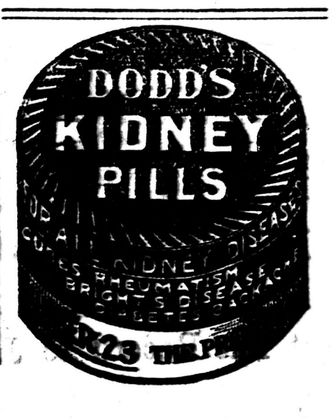
SUBSTITUTES SUGGESTED.

Sweden, according to a Paris newspaper, supplied half the pulp paper of last year's production, and in 70 years, we are told, Swedish forests will have disappeared. During the last election France required 80,000 kilograms of paper for bills alone. But, says our contemporary, means will have to be found to discover a substitute for wood. But how is it to be done? A process has been discovered of getting paper from old tar yarn or rope. Another suggestion is to make paper from the bamboo, the mulberry, the furze bush and the sugarcane. In the French Congo and Soudan, our contemporary says, there is an abundance of papyrus which lends itself to papermaking.

Minard's Liniment used by Physicians

THE REAL REASON.

Adam sat down. "I am the greatest man in the world," he said to himself; "the wisest sage, the biggest financier and captain of industry. I hold all the records from the hundred-yard dash to the Marathon; my wife is the best-dressed woman in the world; I am the best dressed man. Gadzooks, I am too good to be true; I will eat of the fruit of the tree of Evil."—Life.



CHEAP PERFUMES.

Some of the Sources From Which Musk is Obtained.

Most women who indulge freely in the use of cheap perfumes do not know of what they are compounded. The principal ingredient of low priced perfumes is musk, animal musk, which is obtained from several creatures.

The muskrat is probably the best known of these, and a few decades ago the wives and sweethearts of men who set traps around ditches and ponds in the countryside carried proudly the bags of musk obtained from this source. As an article of commerce the musk supplied by several varieties of civet cats is probably the best known to-day. The odor is strong and sweet. The strength is the particularly noticeable feature and is the reason why it is the foundation of the perfumes. In the small mammal houses at the Zoological Gardens are two sizes of civets, and any one with an investigating turn of mind may stand near the cages and catch the musky odor.

The musk is used in the cheap perfumes, as only a little is needed to give a most lasting odor to an ounce of perfumery, but the musk itself is not cheap and it is one of the duties of the attendant of the mamal house to collect it. It is then sold through regular channels and is one of the sources of revenue to the zoo, although a small one.

AN INVALUABLE MEDICINE.

Mrs. W. Arnold, Edmonton, Alta., writes: "Kindly send me a box of Baby's Own Tablets. They have been invaluable to me, and I really do not know how I ever would have got along without them. Baby was poorly; his digestion was bad, and he was constipated. I gave him the Tablets and they made a fine healthy boy of him. Now, whenever he is cross or troubled with constipation, I always give him the Tablets and they relieve him right away. I tried a lot of other medicine, but nothing seemed to agree with him till I got the Tablets. I would not be without them." The testimony of Mrs. Arnold is that of thousands of other mothers. Everyone who ever uses Baby's Own Tablets have words of praise for them. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SCOTCH SABBATARIANISM.

(From the London Chronicle.)

Looking out of the window used to be an indictable offence on Sabbath. In 1709 the Kirk Session of Edinburgh, "taking into consideration that the Lord's Day is profaned by people standing in the streets, vaguing in the fields and gardens, as also by idly gazing out of the windows, it is ordered that each session take its turn to watch the streets on Sabbath, and to visit each suspected house in each parish by elders and deacons with beadle and officers, and after sermon, when the day is long, pass through the streets, and to reprove such as transgress and inform on such as do no refrain."

An Invitation to Consumption

Everywhere you go the germ of tuberculosis is a menace. An irritable throat is the field in which it develops quickest. Catarrh is loathsome enough, but tuberculosis is awful to contemplate. Every form of catarrh is quickly subdued by "Catarrhozone," and that is why it is so universally used for throat, bronchial, lung and chest troubles. You simply inhale its soothing balms, breathe in its healing essences, and at once comes relief and cure. No possibility of disappointment with Catarrhozone. Try it for Catarrh, Bronchitis, Irritable Throat and Lung Weakness; sold everywhere in 25, 50c and $1.00 sizes.

BAKING FOR AN ARMY.

No feature of the United States manoeuvre camp at San Antonio has attracted more attention than the division bakery. The bakery can turn out 20,000 two pound loaves daily, and is at present delivering about half that quantity, and it is good bread.

This is the first time that the bakery has been called upon to feed a division of regulars, and it is performing the task without half trying. Capt. L. R. Holbrook, of the Fifth Cavalry, and Commissary Sergeant Pat Dunne invented the bakery and patented it, and then let the war department have the use of it for nothing.

Ovens and accessories are designed to fit into one wagon without exceeding the 6,000 pound limit. The ovens are built of sheet iron and asbestos. Certain parts of the ovens are collapsible, and, with other accessories, may be packed within the actual baking chambers.—Bakers' Weekly.

COMMERCE.

I sell my days and then get paid in thought;
Ships come from far deep down with precious freight;
Experts drop from heights in mighty flow.
How sweet the welcome of the radiant glow.

O, landing place of life to living soul,
New links are forged, new ties complete the whole;
To-morrow adds to life's extending chain,
And nimble fingers dissipate the pain.

My thought has wings that lift above the clouds,
Above the dull, dun, earth enwrapped shrouds;
Come, agile spirits, meet me in the air!
And we will feast at banquet rich and rare.
—H. T. Miller.

Did you hear the rattling chains?
As they clank the loud refrains,
Chains, if slaves devout and fair,
Welding links of fervent prayer.

Majesty and meekness here,
Meet in cloudless atmosphere.
Trembling waves of thought arise,
Nerved by secret, silent cries.

Answers vibrate from the throne,
Ere you call the words your own;
Chain gangs sing along the road,
We are now at home with God.
—H. T. Miller.

NOT BOYCOTTED.

(Puck.)

Labellor—Have you seen the walking delegate's bride?
Carder—Yes.
Labellor—Is she pretty?
Carder—No! Even he'll have to admit she's in the unfair list.

AN AUTHOR'S HANDWRITING.

The handwriting of literary men is supposed to have improved during recent years, but there are still a few with a fondness of hieroglyphics. At a meeting of the Methodist Conference in Melbourne the other day the Rev. Dr. Fitchett, author of "Deeds that Won the Empire," and other popular works, handed up a resolution.

The president looked at it, turned it upside down and round about, and at length gave it up in despair. The clerk was equally unable to decipher it. "I must ask Brother Fitchett," said the president "to be good enough to rewrite his resolution and try to make it readable. At present it resembles a doctor's prescription."—From the London Chronicle.

MILITARY SERVICE FOR WOMEN.

Fraulein Pauline Werner, one of the leaders of the feminist movement of Germany, has come forward as an advocate of military service for young women. Men have developed physically and intellectually, she says, by reason of military training and women are entitled to these same advantages. She is not an advocate of battlefields and manoeuvres for her sex, but recommends the domestic side of military service; she would put the women into the army kitchens, clothing stores and laundries. This training, he says, will increase rather than diminish women's marriageability and their usefulness as wives, and at the same time it will be an excellent thing for the comfort and efficiency of the army.—From "Success Magazine."

ONE DYE FOR ALL KINDS OF GOODS

Send for Sample Card and Story Booklet 89
The JOHNSON-RICHARDSON CO., Limited, Montreal Can.

With this Modern Dye all you have to do is to ask for DY-O-LA then you CAN'T make a mistake and use the Wrong Dye for the goods you have to color.

GYROSCOPES ON AEROPLANES.

In France Monsieur Girardville has been experimenting with model aeroplanes furnished with gyroscopes to insure greater stability. The principle is the same as in the application of gyroscopes to counteract the rolling of ships. In a report to the Paris Academy of Sciences, Monsieur Girardville says that his models, when used as gliders without motors, were free from periodic oscillations, and that they automatically re-established their equilibrium after being disturbed. The difficulty, of course, is that the gyroscope introduces an extra weight to be carried. With his models Monsieur Girardville used gyroscopes weighing about twelve pounds, and rotating at the rate of 6,000 turns per minute.

HOPE DEFERRED.

(Chicago Tribune.)

Weary and footsore the Wandering Jew stopped for a moment at a wayside house to get a drink of water.

"Have you raised the Maine yet?" he inquired.

"No," they answered.

With a discouraged sigh he resumed his wanderings.

ISSUE NO. 22, 1911

HELP WANTED.

LIVE MAN OR WOMAN WANTED for work at home, paying $2.00 or $3.00 per day, with opportunity to advance. Spare time can be used. Work not difficult, and requires no experience. Winston, Limited, Spadina avenue, Toronto.

WOMEN WANTED.

LADIES to do plain and light sewing at home, whole time or spare time, good pay, work sent any distance, charges paid; send stamp for particulars. National Manufacturing Company, Montreal.

WOMEN WANTED, TO TAKE Orders in spare time; no experience necessary. Our lines especially used by mothers and girls. Apply, Dept. A, British Canadian Industrial Company, 228 Albert street, Ottawa.

AGENTS WANTED.

AGENTS WANTED—A STUDY OF other agency propositions convinces us that none can equal ours. You will always regret it if you don't apply for particulars to Travellers' Dept., 228 Albert street, Ottawa.

BIG MONEY FOR AGENTS. Address Edward Castle, Hamilton, Ont. (Inclose stamps.)

Every Woman
is interested and should know about the wonderful
MARVEL Whirling Spray
The new Vaginal Syringe. Best—Most convenient. It cleanses instantly. Ask your druggist for it.

If he cannot supply the MARVEL, accept no other, but send stamp for illustrated book—sealed. It gives full particulars and directions invaluable to ladies.
WINDSOR SUPPLY CO.,
Windsor, Ont. General Agents for Canada.

THE COSTLY MONROE DOCTRINE.

It would be interesting if somebody would calculate how much it has cost Uncle Sam to perform his presumed obligations as guarantor of the Monroe Doctrine. In 1898 he fought a war, "freed" Cuba, and acquired various colonial liabilities. That war introduced him into the first circles of world powers, and the effort to travel in such society has kept his household expenses steadily advancing until now they exceed a billion a year. Before the Spanish war, a billion biennially was supposed to be scandalously high.

To mention just a few cases, the Monroe theory nearly embroiled us in a war with Great Britain over Venezuela; it made us the financial guarantors of Santa Domingo; and the same of Venezuela; it forced us to drive the dictator Zelaya out of Nicaragua; it has recently involved us in a general complication of Central American affairs; and finally, it has brought about the mobilization of a great American army on the borders of Mexico, as a warning to that country that it must be good.—From "Success Magazine."

THE SAME OLD STORY.

On Saturday last nearly every prominent fisherman in Williamsport was fishing for trout in Lycoming creek. Flies, red-worms, minnows and every kind of lure and bait was used, but no one seemed to be catching any trout—that is, anything above six or seven inches. Finally along came a small boy, Willie Rogers, aged 10 or 12 years, fishing with a crooked stick, a "penny line" and a big hook.

He baited it with an angle worm and threw it in just under the new Third street bridge. Hardly had the line gotten into the water before he had landed a big, fat trout 16 inches long. The boy never stopped to play the fish—just gave him one throw and flapped him out onto the bank. Around the lad were a dozen men fishing with expensive tackle, and they were nearly sick with envy. Every one cast into the same spot, lines got crossed and a general tangle resulted, but no one caught any fish except the smal boy, who later landed a ten-inch fish further down the stream.—From the Philadelphia Record.

Do You Feel the Pinch of Corns?

Loosen up, with twenty-five cents buy yourself about ten dollars' worth of foot comfort, which you'll get in a bottle of Putnam's Corn and Wart Extractor. Its soothing, healing balms painlessly cure any corn or wart in twenty-four hours. You'll be more than satisfied by Putnam's Painless Corn and Wart Extractor. Try it.

ELECTRIC IRRIGATION.

The long-distance transmission of electric power has had an important influence upon the development of arid and semi-arid lands in Colorado, California, Nevada, Washington and Idaho, because it makes possible the use of electric motors to operate pumps for irrigation. It is said that even where water is procurable by the gravity system, flowing down from the mountains, electric pumping is sometimes found preferable, since it can be applied in small units, thus avoiding the use of large ditches, which not only take up valuable space, but occasionally cause damage by breakage. Already electric pulps supplied with transmitted power, have turned extensive areas of arid land into flourishing gardens, orchards, meadows and grain fields.

Ask for Minard's and take no other.

MOIST SOAP FOR BITES.

The most satisfactory remedy for mosquito bites know to Dr. Howard, from his personal experience, has been moist soap. Wet the end of a piece of ordinary toilet soap and rub it gently on the puncture and the irritation will soon pass away. Others have enthusiastically recommended household ammonia, or alcohol, of glycerine. One correspondent marks the puncture with a lump of indigo; another with one of the napthaline mothballs; another idin. Rev. R. W. Anderson, of Wando, S. C., states that he has found that by holding his hand to a hot lamp chimney the irritation of mosquito punctures will be relieved instantly.—Boston Transcript.

A WINDSOR LADY'S APPEAL

To All Women: I will send free with full instructions, my home treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of the Womb, Painful or Irregular Periods, Uterine and Ovarian Tumors or Growths, also Hot Flushes, Nervousness, Melancholy Pains in the Head, Back or Bowels, Kidney and Bladder Troubles, where caused by weakness peculiar to our sex. You can continue treatment at home at a cost of only 12 cents a week. My book, "Woman's Own Medical Adviser," also sent free on request. Write to-day. Address Mrs. M. Summers, Box H. 8, Windsor, Ont.

BYRON'S GRAMMAR SCHOOL.

J. Pittendrigh Macgillivray, sculptor, has informed the committee that he will have the Byron statue for Aberdeen completed by June, 1913, so as to coincide with the jubilee year of the Grammar Schools' entry on its present buildings.

The poet was a pupil at the Grammar School when it stood on Schoolhill. The figure, which is to be of bronze, will be nine feet high and placed on a granite pedestal twelve feet high. The movement for a statue to commemorate Byron's connection with the seminary was originated by Dr. Morland Simpson, the present rector.—From the London Globe.

FLOWERS ON LAMP POSTS.

(San Francisco Chronicle.)

Ornamental lamps, gorgeous with real floral decorations, kept green and fragrant perpetually in flower boxes suspended midway between top and bottom of the lamp standards, will be erected on Kearny street, from Market to Pacific.

About three months will be required to put up the lamps and work will be commenced immediately. The flowers which will adorn the lamp standards will be watered and cared for by an automatic arrangement, the mere pressing of a button being sufficient to perform the deed.

Keep Minard's Liniment in the house.

A FINE STATE OF AFFAIRS.

"It is positively disgusting."
"What is?"
"The way people crowd to the theatre to see an improper play. Just think! They've sold out the house for three weeks in advance!"
"How do you know?"
"I tried to purchase tickets and couldn't."—Judge.

MARVELLOUS SELF RESTRAINT.

So far not a single pop bottle has been thrown at an umpire. Who says the Americans aren't a patient people?—Syracuse Herald.

IT'S YOUR PRIDE.

A DOG'S WONDERING EYES.

(Harper's Magazine.)

Many times a day Caleb comes to my armchair, as I sit studying, with no apparent purpose except just to say, "How do you do?" and, never without waiting for the word of permission, he jumps up on my knee, remains a minute, and then goes about his affairs. And many a time I have been half startled by a wondering yet wholly loving expression in the great brown eyes so inquiringly searching mine. Only asking me to drop the prosy book and go walking with him? No; that expression is quite different. Those eyes look as if they were searching for something that we two might hold in common and so have a silent understanding of each other. Is it something higher than can enter his dog consciousness? I am often moved to respond: "It's you and I, Caleb. We do know each other in some things, don't we?" Who am I, to be scrutinized so? What is man's office in the sum of things, when such great liquid eyes are gazing up at him from below?

ELECTRIC LIGHT FARMING.

(Kansas City Journal.)

Work on one particular farm in Kansas does not have to stop when daylight fails. At the Ringle ranch, in Reno County, electricity is used so freely that when there is a rush the electric current furnishes plenty of light. So completely has electricity been installed on that ranch that motors supersede windmills, and the chickens in the incubators are being heated by electricity. And, of course the farm machinery is driven by the current. The houses and the barns on the ranch are lighted by it.

IN WRONG.

(Philadelphia Record.)

The student of American history was holding forth.

"I am a great admirer of Grant," he said. "I am convinced that he was one of the greatest men we ever had."

"Aw, quit your kiddin'," replied the baseball fan. "Lobert can put it all over Grant. We got the big end of that trade, all right."
