## THE LINEN SECTION ANNOUNCES ITS READINESS FOR CHRISTMAS GIFT BUYERS.

Since we import direct, and since duplicates can be ordered before the holidays, it is not too early to make selections.

NEVER before has the Linen Section been so well and so early prepared to supply Christmas Gift needs. The increased size of the Linen Store has enabled us to import more beautiful lines than ever before.

From the foremost producers in Ireland Scotland, France and Austria we have received exclusive patterns and weaves in Table Cloths and Napkins—ideas, in fact, which we have not seen duplicated anywhere in Canada.

From other producers with whom we have dealt for years, have come Irish and Japanese hand drawn and embroidered Doylies, Centers, Tays, etc. Our collection of Damask Table Napkins and Cloths, Trays, Luncheon Sets, etc., is at the height of its completeness now.

Lace pieces in a rich profusion are now on display and sale. These Lines were gathered personally by our own buyer and include Cluny, Irish, Plauen, Brue, Renaissance, etc.

Fancy drawn and embroidered Huck and Damask Towels—also plain staple lines of simple richness—are here in a greater group than ever.

## Shareholders may not Lose

The Toronto Globe Says—It is a reasonable possibility that not a shareholder of the defunct Sovereign Bank will lose a dollar, according to a statement made in the city yesterday by one in a position to know. The assets of the bank have been taken over by the International Assets Limited, re-organized from the shareholders of the bank. It was stated that if the shareholders did not come in for a double liability assessment was inevitable, but if they join the other they will share in whatever was realized from the assets. It was also stated that the money of the bank tied up in the Chicago & Milwaukee Railway was quite possible of realization.

## Reduction in Price of Cement.

In November, 1910, it was announced that the price of Cement had been reduced. That announcement had been reduced. That announcement was corroborative of the opinion that the merging of the Cement interests in Canada would prove a good thing for the public.

The theory of a consolidation such as the Canada Cement Company is that the consolidated interests are in a position to effect economy in production and distribution.

That the Canada Cement Company are working upon the idea of increasing consumption by lowering prices, rather than curtailing production and obtaining higher prices, is clearly shown by its President's report to the Shareholders at the last Annual Meeting, when he stated: "It is confidently expected that the increased demand and increased output will result in further savings in the cost of manufacture of and distribution, and it is the policy of your Directors to give your customers the benefit of these reductions."

This is further evidenced by the announcement, which was made on November 1st, 1911, of a still further reduction in the price of cement. The reduction in some districts is 10c per barrel, and in others 5c. On the whole it will probably average 7c per barrel. This reduction with the reduction made last year—means a very large saving to the cement consumers of Canada.

We trust that the expectations of lower cost voiced by the President of the Canada Cement Company, will be realized again next year, so that the company may continue its policy of giving the benefit of these reductions to its customers—thereby enhancing the uses to which Cement may be put.
