ESCAPE FROM INDIGESTION

"Though I am an active hard working man, somehow I fell into a condition of poor digestion and disordered stomach, writes Mr. Eb. P. Whinney. "In the morning I had a very unpleasant taste in the mouth. My tongue was whitish and nothing tasted good. An hour or so after eating I experienced pain in my right side, gas formed in the stomach and caused great distress. Even in warm weather my hands felt clammy, and still worse my system was seldom regular. Brooding and despondency would now and then get hold of me and completely unman me. When unfit for work I tried Dr. Hamilton's Pills. In my case their wonderful curative power was like magic. So mildly did they work upon my system I at first thought they wouldn't benefit. But a few doses proved how much they helped the stomach, how quickly they brace up digestion. Food tasted natural, my appetite improved, my face looked clear and bright. and day by day as I gained in health, so I gained in spirits. To-day I am as sound, bealthy, vigorous and well as any man could be. Dr. Hamilton's Pills did

Beware of the dealer that may try to sell you an inferior pill to Dr. Hamilton's, which are sure to help and cure. Sold in yellow boxes, 25e per box. All dealers, or The Catarrhozone Co., King-

A READY RECKONER.

There are no cul-de-sacs for Irish wit. A "jarvey" drove Mr. Phil May, the wonderful English artist in black and white, new dead, round Dublin on his first visit to that city, and in showing him the sights stopped in front of the Bank of Ireland.

On the roof of the building are six decorative figures, and Mr. May inquired what they represented. "Begorra, sorr, they're th' twilve apos

SLEEP

It is essential. We simply must sleep. Youngsters sleep very easily.

Older folk must resort to tricks. The pring is ti sleep well and all

Pine or hop pillows help many e enward. Some who never stir wonder they

cannot eleep. Naturally one must exercise and eat

regularly to sleep well. Many find that eating a little before retiring is a great help. Others go in for a sponge bath

and more or less message. If we live properly we need offer Morpheus no inducements, SCHOOL 14.

A FAT CURE.

"Den't you find wood-chopping rath er hard, old chap?".... "It wouldn't be so had if my servant didn't sit down close to me with a eight in his mouth and grin like a house on fire,"-Fliegende Blaetter,

Ways to Cook Cucumber

STUFFED CUCUMBERS.-Take 6 nice eucumbers, about five inches in length; pure carefully and remove seeds, leaving the outer shell of cucumbers with both ends open. Prepare a nice croquette of mince meat of chicken and stuff the hellowed cucumbers with it. Have three or four potatoes mashed to close the ends of the cucumbers after stuffing. Roll the cucumbers in plenty of cracker dust, seasoned with salt and pepper and dust, seasoned with salt and pepper and dust, seasoned with salt and pepper and dust. put in a well heated oven on a deep plate and bake for twenty minutes with-out turning. Serve hot on the same

CUCUMBER FRICASEE.—Take short cucombers, peel, cut lengthwise in slices one-quarter to one-third inch thick. Boh in water with one teaspoon salt until moderately tender. Drain off water. Have ready yolks of two eggs slightly beten and a dish of rolled cracker crumbs. Dip slices of cucumbers into cracker crumbs, then into egg batter, then into crumbs again. Fry in butter until delicately brown. Serve hot.

CUCUMBER PICKLES.—Into a stone jar put one gallon of good vinegar and one cup each of salt, sugar and mustard: stir well, and add cucumbers, well wiped with a dry cioth, keeping a plate over them so they will be well under the liquor. No seum should form, If it does, take out the pickles and prepare a fresh mixture. These are ready for the table in a fortnight.

CUCUMBER SALAD—Cucumbers sliced CUCUMBER FRICASEE.-Take short

CUCUMBER SALAD--Cucumbers sliced thin, cover with water, in which has been placed one teaspoonful salt and one half seda. Stand one hour, drain, rinse, silce one onion thin, mix with cucumbers. parsley. Serve on lettuce heart.

"OLD MORTALITY."

Through the genius of Sir Walter Scott, the name of "Old Mortanty" is known far beyond the bounds of Scotland, and everyone who as beard of the persecuted Covenanters are familiar with his real name. There are few churchwards in Galloway, especially in the county of Wigtown, where his handiwork may not still be seen.

A native of Dumfries, James Patterson, was by trade a stone mason, but for the greater part of his life he exercised his craft without fee or payment.

His absorbing passion for the Covenanters led him to give up home and friends and to wander for forty years over the wild moors, in the lonely glens, and from churchyard to churchyard, to erest a stone wherever a martyr of the Covernat lay.

A sincere devotion led this venerable renovator of tombs to dedicate so many vears of his existence to perform this tribute to the memory of these suffering people. Wherever a grave existed "Old Mortality" was sure to be seen busily at work, bent en his pious task, with his chisel and mallet, and his old white pony grazing by his side.

His last peregrination was in the neighborhood of Bankend, eight miles from Dumfries, when he was suddenly taken ill and was found on the roadside in a dying state. Kind hands removed the old pilgrim to a friendly house, where he passed to his rest in a few

He was born in 1712 and died in 1901. The memorial of "Old Mortality" is in keeping with the simple tastes of him it igned to commemorate; it stands near Garpel Glen, one mile away from the village, known as St. John's Town folly of Valry. This spot was chosen as are you going to-night the persecuted "Nill Folly" of Galloway. The statue represents him in his favorite attitude when at rest, but his chise! s useless in his hand and his mailet is broken. His old pony, the sole companion of his wanderings, stands beside him, "a mute witness of the patient toil of the aged Scottish pilgrim."—Miss C. Mason in The Animals' Guardian.

A Sensible Merchant.

Bear Island, Aug. 26, 1903. Minard's Liniment Co., Limited:

the great fight over reciprocity is double sees in the current issue of the Consider Courier, showing pictures of prominent victors at the polls on Segu-Slot. Another feature suitable to the

gave his opinion that the most wonder ful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or core, such injury is insured against blood poison!

Not one species of microbe has been found that Zam-Buk does not kill.

Then again. As soon as Zam-Buk is applied to a core, or a cut, or to skin ease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again, As soon as Zam-Buk is plied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new, healthy tissue is quickly formed. This forming of fresh, healthy tissue from below is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are

Only the other day Mr. Mars, of 101 Delorimier avenue, Montreal, called months. upon the Zam-Buk Company and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores him, and in a few months it cured him. years he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a lc. stamp (to pay return postage). Adtrace of any return of the eczema!

AT THE END OF THE WAY.

Wel: they have gone and I sit Loneiy and glum, and I glower;
The years of one's youth, now they flit!
The time of one's youth—'tis an hour,
And gone like a bloom-kissing breeze
That pauses to kiss a red ruse.
Or blows the tall grass to your knees, Then tossed red petals and goes

Avc. tosses red petals and goes! And taking no note of despa It flies and it leaves you all old, will old and the dear ones all flown; The silver has smothered the gold,
It is night, and you sit all alone.

Ave, childhood's a minute, and then Young manhood's a minute or two; They are flown and come not back

again— The middle age years are for you And they are a minute as well!

And old age keeps step with your pace,
And there is so little to tell,
And all of that's graved on your face.

And then as foretold it is you And then as foretold it is you
In a garden or porch all alone;
There's little for old hands to do
When all that they love are far-flown;
Hands folded they sit in the gloom.
Unseeing they climb up the stair
To a little white bed in a room—
Eut the baby so loved is not there.

It is only a short little way
To the small covered way at the end
Childhood, manhood, age, are a day!
The shadows are starting to blend
While the blood-warming sun is on high.
While the merning in glory is dressed;
Life's a how-do-you-do and good-bye—
But the end of the journey is rest!

—Judd Mortimer Lewis.

VACCINATION FOR WHOOPING

ean Edition of N. Y. Herald course of whooping cough is so well known that numbers of doctors recommend that it should always be pen tised in such cases. The operation quite harmless and the results may be very beneficial. This has been proved by commun

cations made in recent years to the Paris Societe de Therapeutique following upon conclusive observations de-scribed by Dr. Ch. Amat. He had noticed that when whooping cough pa-tients had been successfully vaccinated, owing probably to the slight feverish eruption which accompanies it, the paroxysms of coughing ceased to number more than four or five during the twenty-four hours. Many doetors have since confirmed these statements. Success cannot constantly be counted upon to follow vaccination, but it is obtained so frequently that this method cannot be ignored.

Dr. Mehnert, practising at James-town, in Cape Colony, has recently pointed out the benefits which may be derived from vaccination by infants suffering from whooping cough at ages varying from three to nine

As soon as the diagnosis of whooping cough is determined from the first appearance of the paroxysms, or even sooner, during the course of the that he had to sleep in gloves. Four catarrhal stage, vaccination is prac-years ago Zam-Buk was introduced to tised in the usual manner. Of course this mode of treatment presupposes To-day-over three years after his that the infant has not been vaccure of a disease he had for twenty-five cinated. As the pustules develop the paroxysms of coughing begin to diminish and then disappear completely at the end of fifteen days at the maximum. Care must then be taken to avoid any reinfection.

If it is an advanced case, where little generalized congestion already exists, Dr. Mehnert considers it advisable to practise bleeding in addition to vaccination. Blood letting is to be recommended as a general rule when ever the dangerous condition of the patient calls for urgent aid, and the doctor is obliged to abandon medicamental treatment either on account of the troublesome symptoms which it may entail in the long run or on account of a real individual predisposition

MY DOG.

I have no dog, but it must be Somewhere there's one belongs to me-A little chap with wagging tail, And dark brown eyes that never quail,
But look you through and through, and
through.
With love unspeakable, but true.

Somewhere it must be, I opine,
There is a little dog of mine
With cold black nose that sniffs around
In search of what things may be found
In pocket or some nook hard by,
Where I have hi dthem from his eye..
Somewhere my doggie pulls asd tugs
The fringes of rebellious rugs,
Or with the mischlef of the pup
Chews all my shoes and shippers up,
And, when he's done it to the core
With eyes all eager, pelads for more.

Scmewhere, upon his hinder legs, My little doggie sits and begs, And in a wistful minor tone Pleads for the pleasure of the bone— I pray it be his owner's whim— To yield and grant the same to him!

Somewhere a little dog doth wait It may be by some garden gate,
With eyes alert, and tail attent—
You know the kind of tail that's meant.
With stores of yelps of glad delight
To bid me welcome home at night.

CHINESE SOLDIERS. To the west the toughness of the Chi-

nese physique may have a sinister military significance. Nobody fears lest in stand-up fight Chinese troops could whip an equal number of well-conditioned white troops. But few battles are fought by men fresh from tent and mess. In the course of a prolonged campaign involving irregular provisioning, drinking water, lying out, loss of steep, exhausting marches, exposure, excite ment and anxiety, it may be that the white soldiers would be worn down worse than the yellow soldiers. In that case the hardier men with has of the martial spirit might in the closine grapple best the better fighters with less en-durance. Professor Edward T. Hose in The Popular Science Monthly.

The people was are cappy really the hardest to start.

"Try Them. They'll Please You."

TELEPHONE PROGRESS.

The rapid growth of the use of the telephone in the United States is something enormous. There were more than eleven billion messages over United States telephone wires in 1907, an mcrease of 124.3 per cent. over the number of conversations in 1902. The total number of systems and lines was 22,971, an increase of 151.4 per cent. over 1902. The number of miles of wire was 12,999,-369, an increase of 165.2 per cent. The salaries in 1907 amounted to \$19,298,423, an increase of 95.2 over 1902. The wages paid to wage workers in the telephone service was \$48,987,704, an increase of 85.7 per cent.

The capital stock and funded debt of the United States telephone systems in 1907 was \$814,616,004, being an increase of 134.1 per cent. over 1902. The income earned in 1907 was \$184,461,747, being an increase of 112.5 per cent.

These are extraordinary figures and show a progress in the telephone industry that is little less than startling. When the United States census of 1880 was taken the telegraph companies were operating 291,213 miles of wire and the telephone companies 34,305 miles. By the census of 1902 the amount of wire for the telegraph systems had increased to 1,318,350 miles and that for the telephone systems to 4,900,451 miles. Thus in 1902 the mileage of wire devoted to the transmission of telephone messages was almost four times as great as that used for telegraph purposes. Both industries developed rapidly between 1902 and 1907, and by the end of that period the mileage of single wire devoted primarily to the telephone business was eight times as great as the mileage for the commercial telegraph business.

What will be the extent of this great industry ten years hence? Who shall fix the limits of its expansion?

NEW USE FOR ALUMINUM.

IOD SHINES FOR 10'

POLISH

Recent experiments have shown that duminum and manganese play an important part in the growth of vegetation. Professor Stoklasa of Prague, concludes that these elements possess a special function in the process of assimilation, and his experiments have shown that it is the leaves which contain the greatest quantities of them. Gabriel Bertrand has shown that vegetable production can be increased by adding manganese to the nutrition. All vegetables that contain a certain quantity of manganese always contain aluminium also. It has been found that hops, especially, need these elements in order to prosper, and in Bohemia a preparation of management and superphosphate is employed to in prove the quality of hops.

PUTNAM'S CORN EXTRACTOR DOES EASE YOUR CORNS.

Takes the sting right out-cleans 'em right off without pain. Thousands say it's the surest thing to rid the feet of calloused, sore lumps or corns. Don't suffer—that's foolish—buy a 25c bottle of Putnam's Painless Corn and Wart Extractor; it does the trick quickly and is invariably satisfactory.

AN AGE OF WASTE.

Prodigal waste marks every department of new-world life. To a person from the old world, we seem to have reversed the axiom: "Wilful waste makes woful, want." It is not only in the destruction of the timber wealth of the country that Canada and the United States have sinned; the waste permeates all industries. It invades even the home life. Perhaps it has been cultivated by the accepted economical fallacy that has crept into new world political systems. The people of America have proceeded upon the theory that economic waste gave rise to greater demand for manuincturers and for more labor. But the bills fall heaviest upon that very labor which is supposed to be benefited by extravagance, and the social unrest of the present day illutrates the speciousbut of course I, with my slender and ness of the plea. True, this is a rich athletic build, beat him easily. I nad to land, and the French peasant can live wait at every corner, and in consequence | comfortably on the waste and extravagance of the average wagecarner here; but is it well to press such a pace? Are laugh as we turned away from the closed | we not recklessly drawing upon the

future? Some great institutions see the evil and are making efforts to stem it. The unchecked waste in the operation of great railways becomes a serious matter. some years ago a United States railroad secured noticeable reduction by setting about the application of coonomy and for this trouble. Mrs. M. Summers, Box eare in the use of coupling tinks and pins W. 8, Windsor, Ont., will send free to and by charging its employees to use any mother her successful home treat- care in protecting materials from the weather. The Rock Island Railway is now impressing on its clerical ferce the" need for economy in printing and stationery. The letter which it has addressed to its clerks says:

"Will you not help save a nicke! a day on stationery and printing? Here are some preliminary suggestions: Use up old pencils before obtaining new ones. Cover ink wells when not in use to prevent evaporation. Avoid unnecessary use of rubber bands. Obtain full life of each sheet of carbon paper. Use wrapping paper or the very cheapest file boxes for filing permanent records. Use both sides of yellow clip paper. Obtain full life of typewriter ribbons. Be careful not to waste or lose pens, erasers, clips, pins, fasteners, wrapping

twine, wrapping paper, etc., etc."

This is an indication that the company has not forgotten the old maxim about taking care of the pennies. There is scarcely any large business in which many small economies could not be practised without in any manner decreasing effi-ciency. The habit of economising waste is a good one to learn. That does not mean refusing to spend money for useful purposes; that would be but another form of waste. But it does mean that we should utilize opportunities and materials to make the most of them; and not wilfully throw away money of the value for lack of caring for them or employing them to the best advantage. Sanday
