GILA MONSTERS INCREASING. Whether Bite of This Lizard is Futally Phisonous to Man Unsettled

ave desert in Arisma say that there has been an increase in the number of gila monsters in that region." said Dr. A. B. Cedron, of Prescott, Ariz.

"These lizards are of great interest
to naturalists, for in spite of investigations authorities still differ as to who

ther the bite of a gila monster is fatally poisonous. I have had several instances come under my observation where men have been bitten by gila monsters, but none ever died. In the case of a gila monster biting a guinea pig, however, the poison was fatal a few minutes after the guinea pig was bitten. The natives of the Southwest, particularly the Indians of Mexico, sincerely believe that the bit of a gila is fatal to a human being and the lizard is held in much awe by them. "It is likely, however, that this fear

is occasioned largely by the repulsive appearance of the reptile. The head is ery prominent, comprising about onefifth of the total length of the body, and like the back it is thickly covered with yellow and black tinted tubercles Its skin is very tough, and although the bones of the tail are fragile this part of the reptile is very strong, it being possible for the monster to raist itself and halance the body on the tip of the tail, thus enabling it to climb rocks, and steep ascents. There is no doubt that the teeth lead to glands containing poison. It is very slow in its movements, but it is not timed like other reptiles. If one attempts to strike the gila with a stick it will grasp the weapon in its jaws like a dog does, and when angered it emits its breath in a succession of quick gasps. It is supposed that the breath of the gila has a drug-like effect on insects, and as it can be detected at a considerable distance it is believed that this is the way it catches its food."-From the Washington Post.

#### A GENTLE LAXATIVE

FOR THE BARY

Stomach and bowel troubles is the cause of nine-tenths of the ailments from which little ones suffer. Let the little stomach and bowels be kept right and baby will be happy, healthy and strong. The only sure and safe means of keeping baby's stomach and bowels sweet and regular is to give him an occasional dose of Baby's Own Tablets. These Tablets are a gentle laxthey sweeten the stomach, regulate the bowels, expel worms, break up colds and prevent or cure the dozens of allments that afflict the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville,

VALUE OF A DREAM.

One Instance in Which a Suggestion in Slumber Was of Worth.

George Arliss, the star of "The Devil," and Hamilton Revelle, of the same company, were discussing dreams one night.

If there were only some way we could remember dreams," said Revelle. "The most brilliant ideas seems to come to us in sleep. awoke only to remember that they were brillfant, while the ideas are gone forever."
"I imagine," said Arliss, "that if

we could reproduce all our sleep thoughts they would be excerdingly disappointing and not nearly as valuable as we thought them at the time. I must say, however, that I owe much in life to a dream that I did remember. I had succeeded John Hare as the Duke St. Olpherts in 'The Notorious Mrs. Ebbsmith,' with Mrs. Patrick Campbell. I felt that here was s part that should bring out the best drawn taur in me, and give me my opportunity. Somehow, try as hard as I could, I knew I was not doing myself justice rubber strip to getting results. Something was in a story written for children how wearer and held the wearer and held the held through it cannot night I dreamt that a chap came to family horse, Raven, and sometimes beat me gripping a big stick. 'The trouble him when he was too tired to go furpert like this, he said, shaking the stick with his fist. 'What you should servant thus reproved him in words do is to hold it like this.' With that which he never forgot: After a girl has been married a year he let the cane swing gingerly bethe swilling to occupy the laminaper. The simile was lone.

It doesn't take a woman long to come to co day when I feel that I am getting my teeth in a role, I remember the stick

> debt of gratitude. It should be added that the Duke of St. Olpherts was the role that first him?" gave Arliss his standing in London as a character actor.

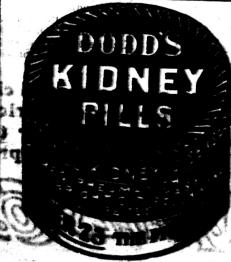

in the dream and relax. I owe my

matter of fact the guitar is almost an unknown instrument among the women of the upper classes, the becoming mantilla is rarely seen in the streets save on stood Friday, having been discarded in favor of hats in atrocious taste, and the senorita never smokes. Neither does she make a habit of attending bullfights .-Washington Herald.

Mr. C. J. Stonewall, who for years has been a most respected citizen Pemberton, writes interestingly and convincingly of a very serious sickne extending over almost two years. Through the marvellous curative power of Dr. Hamilton's Pills he made rapid and permanent recovery. "It was a puzzle to my doctor, be

cause the symptoms seemed almost as numerous as the days of the month, But one thread ran through them all, and that was utter weariness morning, noon and night. I felt flat pain changed from one part of the body to another-seemed at one time rheumatic, at others it affected the extremities like gout. Little exertion, such as going upstairs, caused breathleseness palpitation, and at times I had vague numb feelings and prickling. After Dr. Hamilton's Pills cured me, my doctor saw it wasn't the nervous system, but bowel and kidney disorders. I believe there is no pill on earth that can com-pare with Dr. Hamilton's, and in diseases that have their cause in thin or white blood, cure is inevitable with

Dr. Hamilton's Pills." Refuse a substitute for Dr. Hamilton's Pills 25 per box, all dealers, or The Catarrhozone Co., Kingston, Ont.

APPETITE FOR SNAILS.

The enail appetite of the whole world is increasing so rapidly that the snail fraternity cannot supply the demand, and the result is that some Frenchman has worked out an imposition in the shape of an artificial enail, the only genuine part of which is the shells, which are used over and over again. The artificial snail is very difficult to detect, even by those who pride themselves on their epicurean accomplishments. The second-handed shell is taken and filled with a morsel of the lung of a healthy beef, which is cut in the desired form by a piece of machinery which cuts its in a cork-screw shape. The mouth of the shell is then sealed with a coating of heated fat. These are sold to restaurant keepers, and when they are served cooked it is almost impossible to detect the fraud.

AN X SHAPED BRIDGE

In one of the southern cities of this country there has been a "Y" shaped bridge in use for a long time, and now the proposition of erecting an "X" shaped bridge over the Seine is being consid ered. As a matter of fact, the idea has been practically adopted, the only difficulty being the lack of money, and if this is successfuelly looked after the bridge will be built. One great advantage of such a structure is the fact that one pier in the middle of the streams supports both structures, while if two bridges were built the difficulties of navigating the stream would be in-

SWEETEST TO POUND

And it dissolves so quickly, too.

It is made from Pure Cane Sugar, and under the greatest care for purity im the process of manufacture. Even the jute bags are cotton lined, and the barrels which are made of efm staves, are paper lined.

A PROBLEM YET.

Nearly two hundred and fifty years ago Nearly two hundred and fifty years ago one of the greacest intellects connected with science—urned his attention to gravitation. In that two hundred and fifty years physical science has made rapid advances. A boy who has completed a year's work in an elementary physics could entertain Newton in lectricity were it possible for the great philosopher to return to earth. After learning of the great progress of electricity, I can imagine him in his eager learning for knowledge turning to the boy and expecting some light on gravitation. Also, not only the high school boy, but not even the most learned can give any definite information on gravitation. The Wilson C. Morris in The Popular Science

Well, not exactly; I went him? hine car and had them pu

London rides on state occasions has been in use since the year 1757. Returns to the railway clearing house show that 1,000 parcels a day are lost on the railways of the United Kingdom. usand eight hundred an forty-seven police constables are requir-ed to protect London and for this pro-tection the citizens pay one million three hundred thousand pounds a year.

Nearly half of all the foreigners in Great Britain reside in London. There are 22,000 in Scotland, 11,000 im Manchester, 9,000 in Liverpool, and 8,000 in

The largest cab rank in the world is situated in London, viz., at Waterloo Station, the terminus of the London and South Western railway. It is a quarter of a mile in length. More than 1,000 cabs are called in the course of 24 hours.

An enormous mass of water is used for suppressing fires in London. Last year it amounted to 29,000,000 gallons, or, expressed in weight, 129,465 tons. Of this huge quantity about one-sixth was taken from rivers and canals, and the rest from the street mains.

London has 1,000 ships and 9,000 saillors in its port every day. It has upwards of 75,000 persons annually taken into custody by the police, 27,000 persons living in its common lodging houses, 25,000 persons annually arrest ed as drunk and disorderly, and third of the crime of the country is committed within its radius.

### BABY'S TERRIBLE EGZEMA

Hands Tied to Prevent Scratching. Five Doctors Failed to Relieve, but

Zam-Buk Worked a Cure. Mrs. Charles Levere, of Prescott, North Channel, Out., tells how Lam-Buk cured her baby. She says: "My baby's head and face was one complete mass of sores. The itching and irritation were fearful, and the little one' plight was so serious that at one time we feared her ears would be eaten off by the disease.

"We had to keep her hands tied to days to prevent her rubbing and scratching the sores. Doctor after doctor treated her in vain, until we had had five doctors. They all agreed it was a frightful case of eczema, but none of

them did any permanent good. "As a last resource we were advised to try Zam-Buk. The first box did so much good that we felt sure we were at last working in the right direction. We persevered with the treatment until we had used thirteen boxes, and at the end of that time I am glad to say Zam-Buk had effected a complete cure."

For eczema, eruptions, rashes, tetter. itch, ringworm and similar skin diseases, Zam-Buk is without equal. It also cures cuts, burns, scalds, piles, absectes, chronic sores, blood poisoning, etc. All druggists and stores at 50 cents a box. or post free for price from Zam-Buk Co., Toronto. Refuse imitations.

STINGING TREES

In the southern part of Formos grows a tree, about 10 feet in height, having long leaves which possess the property of the nettle and produce a maddening irritation of the skin when incautiously touched. The natives call it chiao-jen-kou, mean-ing "man-biting dog." Mr. Toku-taro Ito, of Tokyo, who has recently made a botanical exploration in Formosa, suggests the name "viper tree" in Australia, which, says the London Globe, attains a height of 15 feet, an dthe effect of whose touch appears to be even more maddening to men and animals. Horses stung by it have to be shot, and dogs, when affected by the poison of the leaves, run about, whining and biting them-

TRUE PRAYER.

I have no doubt that the old idea of prayer as a begging of God to set aside wise laws to accommodate puny and think that all this will only prepare the way for true prayer—that prayer which seeks to get the highest spiritual good by confirming to the highest spiritual laws of our nature. This kind of prayer, I think, we shall no more outgrow than we shall outgrow hope, or love, or gratitude, or aspiration, or reverence, or the sense of dependence on a Higher Power, or the need, in our weakness and sorrow of comfort and strength from some source higher than our poor selves. . . Thus, I think, as we get away from the old, lower views, and come to

prayer which corresponds with the higher conception of God, it becomes clear that religion has nothing about it that is more perfectly rational, and certainly nothing about it that is more uplifting, and in the profoundest way helpful, to weak, erring and sorrow-laden human beings than prayer—the communion of the earthly child with the heavenly parent; the carrying of our little cups of heart-need and spirit-need to the great Fountain to get them filled; the reaching up, when we are weak and sad. and laying hold of the Infinite Source of strength and joy which is forever above

"Try Them. They'll Please You."

MONA LISA'S SMILE

Fully one-half of the fame of the picture is due to the adjectives which have been applied to that smile. It is enigmatic, ineffable, mocking, sad, entile, haunting, mysterious, significant and a number of other things, according to the degree of imaginative activity and inventiveness of the writer. Tales are told of the circumstances under which the pic-ture was painted, which are well calculated to enhance the interest of the romantic and centimental reader. Leonardo found, for example, that he could not get that enigmatic, ineffable, mocking, a d, subtle, haunting, etc., smile to appear unless somebody played some special air while he was at work; the only wonder is that we are not informed what that certain strain was and who produced it, or who manufactured the instrunent upon which it was played. The art of advertising was in its infancy in Leonardo's time.

Looking at the picture without prejudice, one discovers that La Gioconda's smile is not so very wonderful after all. It has always seemed to us sly and complacent, nothing more.—Boston Transcript.

FLOOR THAT TURNS OVER

The floor in the Apollo Theatre in Paris is reversible, one side being made for dancing, the other being the usual inclined floor equipped with the folding seats of a theatre auditorium. The floor is mounted-on a horizontal axis on which it revolves. It is built on a framework of steel girders, has an area of 2,500 square feet and weighs 100 tons. The axis, which is parallel to the front of the stage, is not in the middle of the thickness of the floor, says the Cement Age, but nearer to the seating surface than to the dancing surface. The floor swings through an excavation over thinty feet in depth.

#### A WELL-KNOWN MAN.

Minard's Liniment Co., Limited. Dear Sire. I can recommend your MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results. . Yours, truly,

T. B. LAVERS.

Versatility of the Country Editor. The country editor is easily the foremost man in the community. This is evidenced by the frequency and persistency in which he is asked, may, demanded! at any time of day or night, to sit up with the sick or officiate as pailbearer at funerals. The editor is always asked to be palibearer-it gets to be a habit with him. Perhaps it is because he habitually looks sad and mournful, He feels slighted and as though he was losing his standing in the community if he isn't asked, and if by any chance he is

also requested to drive the hearse the proffered honor raises him to the seventh heaven of editorial delight. An editor may be exempt from jury duty, he may not have to carry the mail, fight fires or officials as deputy sheriff, but there is no escape from being pailbearer: Once. during slate spring when the Pale Horse-man wate circles about the hills of Old often foolish men, will more and more the ministers were all busy and the editor was called away from a bitter editorial on the tariff to go and preach a funeral sermon. This was an honor that he had never dared to dream of, and he ing for headstones and being a pallthis day the relatives and friends of leon was entertained when he to deliver a funeral sermon, for he had understand the higher conception of already addressed political meetings and lectured a few times for church societies. It was no trouble to say something nice about Smith, for he paid his subscription rgularly. If by chance the "boss' wasn't called away for a funeral and we saw Ann Chase going by the office on printing day, we immediately stopped the press and went out to find where the ceremony was taking place. Ann never failed us-we never go "scooped" on a funeral while she was alive, for she never missed one, and never came out unless there was one.—Don Cameron Shafer in the Bohemian Magazine for March.

Origin of the Great St. Bernard Hospice.

paration.

In an article dealing with the rescue dogs of St. Bernard, a writer in the Wide World Magazine states that the famous Hospice was founded in the year 962 by Barnard de Menthon, a neighboring nobleman, for the benefit of pil-

grims journeying to Romes For many years after it was creeted it was continually being attacked by bands of robbers who mountains. In those days the brave monks were compelled at times to said so in strong and emphatic language, barricade the doors of their strong but, having done most everything else hold and wait until the weather drove barricade the doors of their strong from prescribing medicine to subscribe the besiegers away before they dated venture forth. Once it was destroyed bearer anyway, he could not refuse. To by fire, while it was here that Napo-Smith Van Denberg, of Cross Hill, say his army over the Alps into Italy in they never heard a better funeral ser the spring of 1800. One hundred and eighty of his soldiers held the pass for a year.

Tourists visiting the hospice from Western Europe naturally ascend the pass on the Swise side. The last village one passes is Bourg St. Pierre and at the inn here the landlord wall point with pride to the tiny table and cloth-covered arm-chair which were used by the great soldier as he sat at breakfast early on the morning before he set out on that memorable journey across the Alps. His army number thirty thousand men, and for miles they had literally to fight their way. foot by foot, waist-deep in snow.
Napoleon converted the hospice into barracks, and the great room travellers are now turned into a huge hospital ward.
