Some provision should be made for clearing the snow off the sidewalks where vacant lots exist or private houses at present unoccupied. I'm a little baby. I arrived at the home Mr. and Mrs. Fred Fess on Jan. 12, 1912. Although I have only been in this world a few days, I'll have you know that I am the boss at our home. Whenever I want anything all I have to do is raise my voice, then everything works overtime to find out what I want. I watch 'em and blink at 'em and crow. It's jolly fun. Father made his brag that he will have me working with him before many months, but I'll fool him. I'll miss my guess if I don't give him cold feet before the winter is over by making him get up in the middle of the night for pargorie and he will frost his ears going to the drug store for soothing syrup. There is a sweet little woman near me. She is good to me and I can see right now that we are going to get along together. I am the owner of a very nice voice which I cultivate every night.—Savvy Pousman.

There is evident need in the schools for some means of securing without dismissal the retirement of teachers outliving their usefulness. A superannuation or pension scheme is wanted, provided it does not bear too heavily on the finances of the province. The retention of teachers whose vigor is greatly impaired is an injustice to the children, yet the dismissal of such teachers after many years of hard service would be harsh. Some automatic method of retirement should be arranged.

**This Cold Weather**  
Cold is the weather here, the thermometers ranging from 10 to 22 degrees. As cold almost as might be endurable, it may have seemed to some, and for such the reports from other parts must have been nearly inconceivable. The weather on Sunday was quite normal and the citizens took full advantage of the opportunity offered to enjoy the let-up but the weather man Monday morning put a damper on their feelings by forecasting gales, blizzards, snow storms, high winds and zero weather. Ice blasts are sweeping over the Northwest. The amount of suffering brought to the poor by this exceptionally severe frigid wave must be excessive, and is lamentable. Very bleak and cheerless must be the temporary lot of the settlers on the more northern plains. Doubtless many of the Canadian farmers who have emigrated to Alberta and Manitoba long for the less rigorous climes from which they departed. The summers are warm, at times extremely hot, but the winters are long and so severe that only the hardiest plants can survive and the field and orchard crops that can be produced are limited. Snow sometimes covers the ripe fruit on the trees in the southern California orange groves. Those tropical regions actually immune from freezing temperature, generally are much of the time made cheerless and disheartening by incessant rain. Jarvis' climate the year through averages nearly as well as any. In such weather as the present, dress warmly, keep cheerful and do your part for helping those who are in distress.

**Union Literary Society Meeting**  
The second meeting of the Union Literary Society was held in the basement of the Presbyterian church on Friday evening. The attendance was most encouraging. Solos were rendered in excellent form by Misses Mabel Genser and Lillian Allen. Homer Trossdale favored the audience with a recitation and Miss Agnes Johnson with a reading. The debate, "Resolved that City Life is preferable to Country Life" proved to be a very interesting feature. J. A. Campbell, Miss Margaret Allen and A. Williamson supported the affirmative side of the question. Myrtle Honey, Miss Mabel Parkinson and Charles Stallwood the negative. Dr. Jacques, Miss Thompson and Miss Genser were appointed judges and the doctor in bringing in their report complimented the speakers, stating that the moderator for the manner in which they had presented their arguments. The decision was given by one point in favor of the affirmative.

**Hicks' Forecasts for January.**  
A reactionary storm period followed on the 24th, 25th and 26th. The moon passes the celestial equator on the 26th, which fact always brings marked tendency to higher temperature, drop in barometric pressure and electrical disturbances. Thunder and lightning even in winter, as a rule, result at the transit of the moon across the equator. Rain and snow will return on and touch the 24th and 25th, followed by a higher barometer and reaction to very cold.

**Bosfield-Howell**  
A quiet robbery took place in Moose Jaw, Sask., on Tuesday, January 8th, which will be of interest to the people of Jarvis. Ray Bosfield of Jarvis, Ont., travelled to Lorneburg, Sask., and robbed the community of a charming young lady in the person of Miss Luella Howell. On the day in question the Outlook Branch train, No. 203, was met by a former pastor of the bride, who saw the ceremony, uniting the two together, safely over. The bride was attired in a blue travelling costume and looked very charming as she made her way to the smiling bridegroom. The Western acquaintances of the bride, while not joyous over the fact that the East is claiming one of their own, too numerous fair ones, yet give the happy couple the usual Western wishes for a long and happy wedded life, knowing that if you've heard the wild goose honking. If you've seen the snail plow. If you've breathed the smell of ripe grain, dewy, wet, You may go away and leave it, say you'll never come again, But its in your blood, you never can forget.

Mr. and Mrs. Bosfield left on No. 62 at 10.30 enroute to their future home near Jarvis, Ont.—Com.
