

Weeding, Thinning, Fencing, Fundamental Principles.

"There is no part of the farm which will give bigger returns for so little expenditure of time and labor as the woodlot."

The first thing necessary is to improve the character of the crop, which can be done by cutting down and using for firewood all diseased and deformed trees, as well as such species whose presence in the woodlot is not desirable.

When the most suitable species have been selected and the woodlot removed, the woodlot must then be thinned until the crowns of the best formed remaining trees are seen to barely touch.

The third requisite in the scientific farming of the woodlot is that the cut be kept out, especially after heavy cutting, when reproduction is most desired.

WILL U. S. ANNEX CANADA?

Uncle Sam has about as much chance to do so as a cheap acid corn salve has of curing a corn.

TANTALUS.

He was almost in reach of the goal, He had pretty near captured the prize, When somebody came with the swiftness of flame

It's hard to be back in the bunch, With never a chance in the race, But it's worse to lose out when you've gone the whole route

Cured Her.

There is always a way out if one seeks in the proper direction. How the lady of the house put a stop to a telephone caller who annoyed her is told in the New York Sun.

Consider them. They're everywhere. They trim millinery. They finish neckwear. They figure on bodices.

Sanof's Diabetes

A New Remedy Which Has No Equal for

DIABETES

No diabetic should fail to give this perfectly harmless and efficacious remedy a trial: it never fails to effect wonderful results.

Price \$2.00, Leading Druggists. Free literature from The Sanof Mfg. Co., Ltd., Winnipeg, Man.

WHEEL OF TORNADO.

Beside it Rush of Cyclones Comparatively Harmless.

An uphill fight for accurate English is being waged year after year by scientific authorities on the weather who object to having the tornadoes which rip through towns now and then

The word has gained wide acceptance in describing the furious local storms which rush forward along a more or less direct path while they whirl with far greater velocity on a centre which may be only a few feet in diameter.

It is the spinning motion which is the swiftest and most destructive. The advance of the storm may not be as rapid as that of many a comparatively harmless gale.

The true cyclone of the West Indies, the China sea and other parts of the tropics is entirely different. Its force is spent in a furious wind that seems to blow almost straight ahead, while the storm revolves, more or less fully, around a circle the circumference of which may be many hundred miles.

But "cyclones" is entrenched in popular usage as the name of the typical "winter" of this country, and "tornado" has a poor chance.—Cleveland Leader.

Minard's Liniment Co., Limited—

Gentlemen—In June, '98, I had my hand and wrist bitten and badly mangled by a vicious horse. I suffered greatly for several days and the tooth cuts refused to heal until your agent gave me a bottle of MINARD'S LINIMENT, which I began using.

Yours truly, A. E. ROY, Carriage Maker.

St. Antoine, P. Q.

Give Tests for Painting.

Some methods of detecting forged old masters by chemical examination of the pigments were described in a lecture before the Paint and Varnish society last night by A. F. Laurie, professor of Chemistry at the Royal Academy.

The information based on examination of literary materials said Professor Laurie, is very imperfect and inaccurate. He then told of special methods which he had devised for examining microscopic portions of known work of art, thus identifying pigments used at various times with absolute certainty.

THE CAPABLE MAN IN LOVE

(New York Herald)

Some titled women in England have made the interesting announcement, as told in a special cable despatch to the Herald, that in love affairs the capable man, even though he have but little time to devote to demonstrations of affection, is to be preferred to the incapable one whose sole purpose in life is to please the fair sex.

Records of romantic sentiment go back about as far as any other historical data that we have, and the capable man from earliest days has been successful in love at the same time that he has been making his less gifted brother jump through hoops and "play dead."

Politeness Pays.

Mrs. Jordan had "ideas" on the way children should be reared. Her young hopeful Tommy caused her a little anxiety in this respect. Now and again, therefore, a serious "politeness" lecture was administered.

Caring for Mattings.

Never use soap on matting. Wiping it with a cloth dampened with salt water prevents its turning yellow.

DODD'S KIDNEY PILLS

23 THE

AVERAGE YIELDS

Why Not Try to Do Better Than That?

A common question round the factory receiving platform is "How are the cows doing?" What a volume of thought that suggests. If they are doing well it is because of good feed and careful attention; or may it be despite the feed and care they deserve, but do not get?

The ordinary factory patron's herd keyed up to the pitch of creditable performance, or is it just juggling along in the old rut of "average yields?"

Average cows do vastly better if their owners train them and train themselves for better results. If each lot of 100 cows in the Dominion gave an additional 500 pounds of fat per month, would that not make a startling difference in the amount of the patron's cheques.

For Women's Ailments

Dr. Martel's Female Pills have been the Standard for 20 years and for 40 years prescribed and recommended by Physicians. Accept no other. At all druggists.

A Puzzle in Metals.

Brass, as every one knows, has an awful odor, yet the two things of which brass consists, zinc and copper, give no odor whatever in their separate states.

To arrive at the general law it has been found that almost all alloys, or mixtures of two metals, will give an odor, while the two metals themselves do not.

The explanation is as follows: All substances, including metals, are always giving off small particles of their substance to the air—that is, evaporating. Some solids give these off so rapidly as soon to disappear. Gum camphor is a conspicuous example.

WOMEN VOTERS AND VOTING.

(Buffalo Courier)

The city of Portland, Oregon, recently elected commissioners, and the women in that State were given the right to vote.
