DOES IT MATTER?

Does it matter to you that of all the men, women and children who die each year in Canada one in seven is a victim of Consumption?

Does it matter that one in every three of these is cut off in the full glow of life, with plans and hopes and loves that must be given up?

Does it matter that a few persons have joined hands and within a few short years have saved thousands of these unhappy ones and are saving them all if only there is a little more help and a little more money?

Perhaps it doesn't matter. It is all very interesting but it is no immediate concern of yours.

But would it matter if instead of entering somebody else's house and carrying off their loved ones, Consumption came into your home and laid its hand on the one you love the best in all the world?

Would it matter then if you saw your husband, wife, child or friend dying for lack of a little bit of the money some other fellow was throwing away?

Would it matter when Christmas comes if there were nothing for you to do but sit on the edge of the bed and stroke the white hand on the forehead and realize that this was the last Christmas?

This is how much it matters in thousands of homes in Canada this year and will continue to matter until enough people like you take the burden and feel how crushing it is.

It does matter—it is the most important thing in the life of some unfortunate sufferers—what you do with the attached form.

To help the thousands who are hospitalized for consumption, could you do the sum of \$.....

BANK OF HAMILTON

Save Your Money

WHAT a man earns is not as important as what he saves. An office boy making \$6 a week, of which amount he saves \$1, is actually earning more than the \$25 a week man who saves nothing. The boy's business is paying a dividend; the man's is a failure.

No matter how small your salary may be, you make a serious mistake when you fail to save part of it. When you get your next week's salary, make up your mind to deposit a certain percentage of it in the bank, where it will draw interest at the highest current rate.
