A SIMPLE CEREMONY

"President Jefferson's act of riding up Pennsylvania avenue on horse back, has heen decided, but the people who have studied history have realized that he did it in a dignified manner, and that his inauguration had at least, as much real dignity and true simplicity as that of any President." The subscriptions to the \$150,000 fund for the inaugural atfair are growing fast, and it undoubtedly will be over-subscribed.

Rare Specimen Found In Canadian Waters.

Ottawa, Dec. 30.—The Commissionera of Fisheries have just received interesting specimens of a remarkable little fish never before found in Canada, although rare specimens have been caught in the United States and Europe. It is a small silvery fish not unlike a small herring, but has two rows of pearl organs along the eide of the body.

The fish were caught by fishermen or Grand Manan, and they are scientifical ly valuable and interesting. The most wonderful feature is the fact that each of the pearl organs gives out a brilliant light, similar to a small electric lamp.

The fish are called the "pearl sides and belong to a group of very rare fish that are luminous. Very little is known about the life history of these small fish, but scientific authorities are of the opinion that they inhabit the deepest vaters of the ocean and that the light they give out enables them to procure their food, and may also protect them by frightening away their ene-

Gruesome Find In Woods Above North Bay.

Body, Badly Beaten, Was Frozen Stiff.

North Bay, Ont., despatch: On Christmas Eve, in the great north woods, a grim tragedy was uncovered which has all the appearances of murder, terrible and sordid. Teamsters engaged in drawing supplies to construction camps of the Canadian Northern Railway from the main line of the C .P. R. at Chapleau, found the body of a man in the snow, frozen stiff. All around were marks of a struggle in the snow, indicating that the man had fought for his life against odds, until at last, beaten down by force of superior numbers, he had fallen and been left to die in the bitter cold of the northern winter. The body was brought to Chapleau, where it was taken possession of by Dr. Sheehan, who found that the man had been battered and bruised to death, with every evidence of premeditated and brutal murder. Investigation thus far has revealed the identity of the man as Chas. Elson, sub-contractor of Foley Bres. contractors on the Canadian Northern transcontinental line. Elson left camp some days ago, with three other men, to walk 25 miles to Demegos Station, on the C. P. R., where he intended to take headquarters, and this money is missing. Three men, who left camp with him have disappeared, and are being sought for by the police, thus far without success. The tragedy has caused great excitement in Chapleau, where no foubt is felt but that Elson was brutally murdered.

OUR INDUSTRIES

Census of Manufactures Indicates Great Growth.

Enormous Production of Some Big Plants.

Ottaws, Dec. 30.—The information of tained from the census of the manufactures of Canada taken in June, 1911, has inst made its appearance in a bulletin from the census branch. Some of the information was given the public by Mr. Archibeld Blue in a speech at the annual meeting of the Manufacturers' Accordation in September, but much is

entirely new. The returns show that at the time of the census (anada had 19,218 manufacturing establishments, with a capital of \$1,247,873,600; with 215,193 employees; with a pay roll of \$645,289,723; using raw material to the value of \$601, 509.018, and turning out products to the value of \$1,165,976,689.

In ten years the number of establishments increased by 4,568; capital by \$890,000,000; employees by 176,000; wages by \$128,000,000; raw material handled by \$235,000,000, and finished products by \$685,000,000.

The extensive development of Can-ada's industries is indicated by the immense production of some of the establishments. One in Nova Scotia in 1910 turned out more than eight million dollars' worth of products, one in Ontario more than nine million dollars' worth, and two in Quebec more than ten million dollars' worth. There were fourteen establishments which had a production just under seven million dollars each for the year.

Ontario continues the banner Province for manufacturing, having 6,543 establishments, Quebec being next, with 4.845; Nova Scotia following with 1, 188: New Erunswick, 919; British Columbia, 392; Prince Edward Island, 334; Manitoba, 324, and Alberta and Saskatchewan together 105.

The figures indicate that amalgamation was practised in Ontario to a very large extent. as during the last, five years the number of manufacturing, establishments increased by only five. while the total capitalization of the Ontario manufacturing companies increased by 200,000,000, the number of employees by fifty thousand, the amount of wages paid by \$55,000,000, and the total production by \$210,000,000. Among the cities. Montreal continues

in the first place as a manufacturing centre, with Toronto gaining. Hamilton takes third place as a Canadian manufacturing centre, with a production of \$65.125,000.

Chinese Government Wants Support In Crusade.

Pekin, Dec. 30 .- In view of the unsatisfactory position of the opium question the Chinese Government has issued manifesto reiterating its desire to suppress the evil and save the people from

a life of degredation. The manifesto expresses the fear that although the Government is in earnest the people are evasive. Riots Greet Return of Con-

The Democrats replied with an equally imposing counter demonstration. The Government, alarmed at the possibilities of trouble, turned out all'available police and troops. As soon as the steamer aboard which Almeida was a passenger was docked, there was a tremendous uproar of cheers and groans, and the Democrats made a determined rush with the object of capturing the
