Soak your gas mantles in vinegar before using them. Put a hat-pin through the loop at the top, and place across another jar to drip and in the usual way. When dry, fix in the usual way, and it will be found that the mantle will last twice as long, give a better light, and will stand a breeze from an open door or window.

Last week Wm. E. Mason of Tyrrell sold three of his holsteins cows for the sum of \$2700 one of them selling for \$800. This same gentleman purchased last week a calf two weeks old for which he paid \$800. This is going some.

Newspapers are being reduced in number each year. Galt has a population 12,000 and now has only one newspaper. No activity has been harder hit by the advanced cost of running a business than the newspaper business. One solution of the difficulties facing newspaper publishers and one which is growing in favor with them, is the adoption of the pay-in-advance system. In the business world to-day trend is toward cash trade, and the foot prints on the sands of time are heading that way.

It has been suggested that an effort be made to get systems of farm accounting into the schools of the country, and let the farmer's boy, as part of his school work, keep the accounts of the home farm. If there is any better line of mathematics than this to teach in rural schools, we should like to know what it is. When shall we get down to brass tacks in rural education?

The Nanticoke Methodist have their bills out for their Annual lawn festival which is being held on the church lawn on Thursday, July 24. A good program is in store as they have engaged W. J. White as their entertainer. Everybody is welcome and will surely have a good time if they go. Only 25c and 35c seats to gain admittance and get your tea. There will be a booth on the lawn for extras.

Capt. James A. Low, aged 60, was struck by a train at the G. T. R. depot here at 11.30 Friday morning, and died two hours later from his injuries. Capt. Lowe apparently did not notice the approaching train, and started to walk across to one side, alighting in the marsh alongside the track, sustaining a fractured skull and broken arm. Capt. Lowe was a popular and respected citizen.

Mr. Fred Pursell has closed the Lyric for a few weeks and has a force of carpenters making extensive alterations. The upper part, forming a part of McKnight's Hall, is to be thrown into the theatre, making a gallery possible. The building is to be extended in the rear so as to provide large exits on either side; three other emergency exits will also be made, so that every person can feel safe in respect to fire. There will be a gallery, and altogether the seating capacity of the place will be paid nearly doubled. Special attention is to be paid to the ventilation. Mr. Pursell claims he will have the finest nickel theatre of any town in Ontario.—Simcoe Reformer

The young fellows who spend their time standing on street corners, discussing the merits of prize fighters or trying which can whistle "rag-time" the loudest are not in the way of making any very deep footprints in the sands of time. The time will surely come when opportunity knocks at their door, and they have not the equipment or chance good "when they will sorrow or make good" in the days gone by. Says the Stratford Beacon: "The advice given by President Finley of the College of New York to the students is very good. It is 'to take a long walk, read a good book, and make a new friend.'"

Our happiness in this life depends not so much on circumstances and surroundings as in our determined efforts to do our best in all conditions in which we are placed. Our common heritage is more or less allied to sorrows and pain, but we have within ourselves the antidote—the sunshine of the heart that will alleviate, if not remove many of our troubles. But we persistently reject the means of happiness that lie within our reach, by ignoring present—all pleasures in hopes of enjoying greater ones in the future good time coming, which always keeps just ahead, and is unattainable. We cultivate little cares till they sometimes attain enormous growth by constantly dwelling on them and dolefully rehearsing them to our friends when we should do our best to rise above them. In the most difficult and trying conditions there will often be a brighter side.

CHIROPRACTIC

Is the science of removing pressure from nerves. The spinal column is the only place nerves pass between two hard bony surfaces, that are movable, therefore, practically the only place nerves can be impinged or the nerve constricted, and it matters not what part of the body or organ is affected, the cause may be in the spinal column. Chiropactic is the only science that removes the cause of diseases without pain, medicine or surgery; nothing but the hands. The whole object is accomplished when the nerves are released. Paralysis, deafness, loss of voice, catarrh, gall stones, overweight, rheumatism, appendicitis, neuralgia, neurasthenia, eye, ear, throat, lung, stomach, liver, kidney, bladder trouble, and all diseases quickly and permanently disappear under Chiropactic adjustments properly given.

Analysis and consultation free. Let me tell you where you are affected by examining your spine.

Because it is new to you, do not say, "it is impossible."

At Mrs. R. Sharp's, Jarvis, (next to Bank of Hamilton) on Mondays, Wednesdays and Fridays from 10 a.m. to 12 noon.

He is but a shallow thinker, or one who cannot bear to think, who forsakes the rural home because of its "isolation." In this lies one of its chief charms.
