I muse on what the printers tell, Of work they do and work they sell; And, my, how cute the things they do, And yet how kindly hearted, too; They do not want to see another Do more than they would for a brother Who needs the printers' art to dress Or boost his goods and bring success.

In solemn conclave printers sit And with discretion, tinged with wit, Debate how best to make this sphere A better place because there here. Long may they flourish, talk and boom The printing trade—there's lots of room. Let every booster lend a hand And whoop her up to beat the band For that's the notion so they say That justifies Typothetae.

CHIROPRACTIC

Is the science of removing pressure from nerves. The spinal column is the only place nerves pass between two hard bony surfaces, that are movable, therefore, practically the only place nerves can be impinged or the nerve constricted, and it matters not what part of the body or organ is affected, the cause may be in the spinal column. Chiropractic is the only science that removes the cause of diseases without pain, medicine or surgery; nothing but the hands. The whole object is accomplished when the nerves are released. Paralysis, deafness, loss of voice, catarrh, pallid stones, overweight, rheumatism, appendicitis, neuralgia, neurasthenia, eye, ear, throat, lung, stomach, liver, kidney, bladder trouble, and all diseases quickly and permanently disappear under Chiropractic adjustments properly given.

Analysis and consultation free. Let me tell you where you are affected by examining your spine.
