

SANOL'S ANTI-DIABETES

SANOL is the "RELIABLE CURE" for Gall Stones, Kidney Trouble, Kidney Stones, Bladder Stones, Gravel, Lumbago and all diseases arising from Uric Acid. Price \$1.50.

SANOL'S ANTI-DIABETES is the only remedy which has a record of complete cures of Diabetes. Price \$2.00.

For sale at all leading druggists. Send for free literature.

The Sanol Manufacturing Co., Ltd. Winnipeg, Man.

The Housekeeper

Before washing lace collars bathe them on a piece of muslin to keep them from being stretched or torn.

To keep cake fresh put it in a tall or large glass jar with a tight cover. The best thing to clean window screens with is kerosene oil. Use nothing but oil and a stiff brush. Water will not remove the dirt and grease half so well.

Peanuts, shelled and chopped fine, then added to apple and celery, makes a nice salad.

In cleaning mopboards the wall paper often becomes badly soiled. This can be prevented by using a piece of cardboard held at the edge of the board and moved along as each portion of the base is cleaned.

Fumice, soap and sweet oil will clean pewter.

If iodine is spilled on linen or cotton pour boiling hot starch over the stain. Repeat twice within an hour and the stain will disappear.

Ivory-handled knives may be whitened considerably, and kept so, if they are occasionally soaked in alum water.

In packing away valuable books which are not in use, pack camphor gum among them and mice will not go near them.

For the common small wart often found on the hands of children, use onion and salt. Rub them several times a day with half an onion dipped in salt.

A lace yoke in a dress may be cleaned by covering it with thick cold starch. The starch will absorb the grease and dust, and can be brushed out.

Ask for Minard's and take no other.

AN AID TO DIVERS.

Invention Makes Him Independent of the Surface.

An important improvement has been recently made by a German inventor which makes it possible for the diver to remain several hours under water without any connection with the upper world. The invention is a self-contained diving suit in which a supply of fresh air is generated and supplied to the diver as wanted, the supply being entirely under his own control. The expired air is purified automatically by passing over cartridges of chemical which absorb the impurities. In the place of the usual lead ballast the diver carries on his chest a weight constituted by steel bottles where compressed air or highly compressed oxygen is accumulated. Whenever the diver wishes to reach the surface without any outside help, he simply opens the valve of these bottles, thus causing air to flow into his outfit and to impart to the latter the required buoyancy. This is how, in cases of emergency, he will from any normal depth reach, in a few moments, the surface of the water. A safety valve actuated with any excess pressure prevents the diving outfit from bursting with any accidental rise from considerable depths. The apparatus has been subjected to a number of severe tests and is said to have satisfactorily answered all requirements.

WHY WOMEN FALL.

(Detroit Free Press)

Low wages, environment, love of finery, evil associates, help break down the social restraint that holds women from immorality. But the real, underlying cause, lies in the woman instinct that craves love. Nine out of ten of those who "go wrong" do so through the best but unfortunately the weakest part of their nature, their affections. They crave love, the desire is divinely implanted. The working girl is lonely, has perhaps no outlet for her affections. The man who seems to take an interest in her becomes a hero. Having won her love and trust he gradually undermines her moral resistance. The attack upon virtue is made through the affections. Then society affixes the stamp of degradation. Our investigators seem to think women must be morally degraded until sex immorality becomes impossible. That can never happen, because we have to explain the erring woman in exactly the same terms we use to explain the erring man.

SOME COMBINATIONS.

Black and blue.
Blue and coral.
Black and cerise.
Soft green with blue.
Brown and soft salmon.
Gray with tones of pink.

Most any dark color with cerise, purple, yellow and green.

STORY OF COTTONSEED

Years Ago It Was Considered Merely as Garbage.

The history of the cottonseed is in itself interesting and marks an age of wonderful progress. For many years the seed was despised as a nuisance and was burned and dumped as garbage. Then it was discovered to be the very food for which the soil was hungering, and reluctantly admitted to the ranks of utilities, some degree of respect being accorded to it.

Cottonseed was next found to be nutritious food for the beasts, and then this formerly resplendent product was discovered to hold a considerable quantity of pure oil to the tune, worth at the time \$10 to the ton, representing \$40,000,000 for the whole crop. The refined oil is now worth much more than that.

But a new wonder was to come. Experience showed that the ton of cottonseed was a better fertilizer and better stock food after it has been robbed of its oil than it was before; that the hulls of the seed made the best of fuel for the oil-mill engine; that the ashes of the hulls had the highest commercial value as potash; and that the "crude" oil made excellent soap stock.

The history of cottonseed has, perhaps been paralleled by that of petroleum, which in its crude state, including acid and smelting, has proved a mine of enormous wealth in the wonderful substances that have been produced from it.

The manufacture of the cottonseed products on a commercial scale has items beginning in England, and as late as 1870, when the country with an annual crust of \$90,000,000 was the leading in the world.

Now, however, to the heating and consequent deterioration in which cottonseed is liable in transit and in storage, a tendency naturally developed to locate the oil mills as near as practicable to the source of seed supply.

The annual crush of cottonseed in this country is now nearly 4,000,000 tons. The country purchasing the largest quantity of seed in America, cottonseed oil is the Netherlands, following in order of importance by Great Britain, Mexico, Canada, Italy, Germany and Norway.

ARCTIC HAWK CAUGHT

Took Refuge in Ship's Rigging in Mid-Pacific.

When the steamship Minnesota arrived from the Orient yesterday she had on board a strange passenger, who took passage in mid-Pacific, and was not entered on the purser's list, says the Seattle Times.

A large Arctic hawk, measuring nearly four feet from tip to tip, joined the Minnesota on March 17, south of the Aleutian Islands, followed the wake of the ship many hours and finally alighted on the topmast.

Heavy gales which had swept the Alaskan coast a few days before drove hundreds of small birds to sea, and as these sought refuge in the rigging they became prey to the great hawk. After feasting all afternoon the hawk perched on the mainmast, where it prepared to spend the night.

The Japanese boy in the steamer's crew planned otherwise. Equipped with a gunnysack, he mounted the mast and slipped the sack over the bird's head. Capt. Thomas W. Garlick presented the hawk to the Seattle Park Board, which will place it in one of the city parks.

A SAFE MEDICINE FOR THE BABY

Baby's Own Tablets are a safe medicine for little ones. In fact, they are guaranteed by a government analyst to be absolutely free from opiates or any of the drugs so harmful to the lives of little ones. The Tablets never do harm—always good and may be given to the newborn babe or growing child with equal safety. They never fail to cure constipation, indigestion, colic, break up colds and fevers and make teething easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WORKERS THE ARISTOCRATS.

The passion for acquisition is a sign of ignobility. All those consumed with a lust to become rich, to own more than anyone else, are second rate men. No real noblemen could endure excessive wealth.

Genuine nobility accepts no unearned privilege, but insists upon earning its money in a fair field and no favor, and, if it earns more than it can use in simplicity, delights to give it away.

So far from nobility being connected with inheritance, the inheritance of wealth has done more than anything else to destroy true nobleness and corrupt the world.

What is called the aristocracy of the upper class is as a rule an excellent illustration of what aristocracy is not. It is marked by pride, over-wealth, display, idleness and exclusiveness, and each one of these qualities is contemptible.

The very poor are also usually ignoble because necessity and want tend to imbrute.

But it is among the honest workmen, among free and earnest professional men, shopkeepers, clerks, artists, and all who work for a living in cheer and fidelity that are generally to be found the true aristocrats of soul.—Dr. Frank Crane in Woman's World for April.

THE AGES OF MAN.

While relatives all bid him hail,
He comes into this fearful vale,
And with a weak and puny wail
Respires.

In youth the world delightful seems,
He has his high exalted dreams,
And while he follows shining gleams,
Aspires.

He finds to make his visions true
He has to root as porkers do,
And with his heart and brain and stew,
Persepires.

But quick his fleeting scene will run,
And when his toiling day is done,
Then man, when sets his little sun,
Expires.

If nobly he has lived his life,
And battled fairly in the strife,
His memory, with goodness rife,
Inspires.

—Melanburg Wilson in New York Times.

Mantell had no idea that Banks was worth more than ten millions. Dunlop—He wants to fill the Government dissolved his trust—Brooklyn Life.

Any Headache Cured, Tired Systems Re-Toned

When You're Dull, Tired, Restless Day and Night, Something is Wrong in the Stomach.

A Prominent Publishing Man Says the Quickest Cure is Dr. Hamilton's Pills.

Headaches never come to those who use Dr. Hamilton's Pills, and this fact is vouched for by the Assistant Manager of the Poultry Success Magazine, of Springfield, O., Mr. J. H. Callender, who writes: "No better medicine than Dr. Hamilton's Pills. We use them regularly and know of marvelous cures that resisted everything else. They cleanse the whole system, act as a tonic on the blood, enliven digestion, help the stomach, and make you feel strong and well. For headaches, indigestion and stomach disorders I am confident that the one prescription is Dr. Hamilton's Pills."

Being composed of natural vegetable remedies, Dr. Hamilton's Pills possess great power, yet they are harmless. They aid all organs connected with the stomach, liver, and bowels. In consequence, food is properly digested, the blood is pure and nourishing, the body is kept strong and resists disease. All druggists and storekeepers sell Dr. Hamilton's Pills, 25c. per box. 5 for \$1.00, or by mail from the Catarthozone Co., Buffalo, N. Y., and Kingston, Canada.

HUMANITY'S GOOD EXAMPLE.

(Toronto Star)

Differences of race, language, and custom are largely on the surface. The human hearts are much the same everywhere. National enmities are founded upon ignorance and prejudice, and wrong-headed traditions. They can be removed by steady effort on the part of those who help to mould public opinion. The importance of the celebration of the peace anniversary lies in the example that is furnished for the whole world.

PHILANTHROPY PAYS.

(Philadelphia Record)

Poverty is not a new condition. Vice is as old as mankind. As it used to be the custom to attribute all economic ills to vice, so now there is a disposition to attribute all vice to economic conditions. Neither is true, but there is a closer relation between the two than is generally recognized. The man who is intemperate dooms his wife in spite of anything he does, there is a great deal of suffering that is not attributable to vice—not even to the vice of others. The community is busily searching for remedies, and the most hopeful fact about this is that sound economics is on the side of philanthropy. It is no true friend of the labor of the individual, but of the labor of the community. We are never likely to realize the dreams of the more extreme of the social reformers, but we are certain to make the world a better place for working men and women, and play more and grow up healthier, since the world has ceased to ask the question of Gain and frankly acknowledges that it is its brother's keeper.

MINARD'S LINIMENT is the only Liniment asked for at my store and the only one we keep for sale. All the people use it.

HARLIN FULTON, Pleasant Bay, C. B.

WOMAN'S SLAVERY TO CLOTHES.

(Philadelphia Record)

Truth is often expressed in a jest; and Representative Bowdler's suggestion, that the political emancipation of woman should wait on her emancipation from the look and eye, was not all a joke. Woman's slavery to clothes which she cannot put on unaided involves the slavery of all mankind. A cartoonist not long ago in picturing the torture of hades represented a pair of eyes without end and bristling with an endless row of eyes which a perspiring slave was uniting with an endless row of hooks, under the persuasion of a fiend armed with a pitchfork. The army of male hookers-up will testify to the horrors of the form of eternal punishment and the protest of victimized men will have to be considered before all is lost by giving vent to a voting majority and fastening this slavery on humanity forever.

Fattery is a sort of bad memory, to which our vanity gives currency, by which our vanity gives currency, by which our vanity gives currency.

FLEET FOOT Outing Shoes

THE PERFECT SHOE FOR SUMMER SPORTS ASK YOUR DEALER.

85 BELOW ZERO.

Maximum Reached in Northeast Siberia City.

Verkhoyansk, a good sized city in Northeastern Siberia, boasts the distinction of being the coldest inhabited city on the globe. It is in north latitude 67 degrees on the arctic plane and scarcely more than a hundred and fifty feet above the sea level.

Its annual temperature is 3 above zero and in winter the maximum is 85 below zero. The Russian government owns the town and is interested in having an administrative centre where clever and industrious Yukuts, fur traders and Siberians, carry on their operations.

All the inhabitants of Verkhoyansk, with the exception of a few officials and Russian traders are Yukuts. The Yukuts are such ambitious and aggressive people that they do not seem to mind the fact that the rivers freeze to the bottom and that small trees have been known to snap and split from the biting force of the cold.

Still many Russians even seem to prefer it to warmer parts. Its atmosphere is always clear and the air still, and there are no blizzards or snow storms. Then the Siberian dress adds considerably to the enjoyment of this arctic city. It consists of two suits of fur, an outer and an inner, and a huge hood to pull over the face so that there is just enough space to see and breathe through.

The summer is hotter than might be reasonably expected, the average temperature being 50 above zero in July. The earth is green and vegetation thrives, but the surface of the ground is scarcely thawed.

For Women's Ailments

D. Martel's Female Pills have been the Standard for 40 years and for 40 years prescribed and recommended by Physicians. Accept no other. At all druggists.

CREAM SPONGE—A COMPANY DESSERT.

(Tested and used by Caroline Coe)

Separate the yolks from the whites of five eggs, place yolks in deep bowl, and whites aside to keep cool. Beat the yolks until light and foamy, add one cup of granulated sugar and beat this at least ten minutes, add one cup of flour that has been sifted six times, with one teaspoon of baking powder. Beat at least ten minutes. Whip the egg whites to a stiff, dry froth, fold lightly into the other mixture. Add flavoring.

This will make two medium layers or one baked in square pan. Bake slowly about twenty-five minutes. Put together with whipped cream, sweetened and flavored with a layer of whipped cream on top. Half the recipe will serve five people.

Minard's Liniment Used by Physicians

To Hang in the Laundry.

Soak ink stains on white goods in sour milk. If a dark stain remains, rinse in a weak solution of chloride of lime.

Saturate grass stains thoroughly with kerosene, then put in the wash as usual.

Wash iodine stains with alcohol, then rinse with a soapy water.

Soak iron rust stains thoroughly with lemon juice, sprinkle with salt and bleach for several hours in the sun.

Hot water and soap will generally remove great spots.

Soft pitch, wheel grease or tar stains with lard and soak in turpentine.

Soak mildew in buttermilk or a weak solution of chloride of lime for several hours. Rinse in cold water, then wash.

Rub sewing machine oil stains with lard, let stand for several hours, and wash with cold water and soap.

To remove scorch stains, wet the scorched place, rub with soap and starch, then bleach in the sun.

Wash chocolate and cocoa stains with soap in tepid water, not hot water.

To remove fruit stains, stretch the fabric over the mouth of a basin and pour boiling water through the stain.

CALIFORNIA'S COURSE.

(New York Herald)

While there is little reason to believe Japan has in contemplation anything like the political annexation of California, the feeling of deep resentment in that country, based on the continuance of the cordial and friendly relations that have so long existed between the two countries, and have meant so much for good to both the United States and Japan, is a foreboding action reflects wanton disregard of the national sentiment and the national interest. If there were the slightest reason for discriminatory legislation of the character enacted there could be no possible excuse for enacting it at a time when the national government is under severe handicap.

FIGHT THE SOCIAL EVIL.

(Rochester Herald)

Upon such a subject as the use, in moderation of alcohol and tobacco, there is room for different of opinion, but upon such a subject as the "social evil" there is absolutely none. No man or woman who has the interest of the human species at heart can afford to be indifferent to this great social cancer which is eating into the very vitals of the country. Whether we are able to extricate it or not, it must be removed, and it is upon it, and if any rational remedy should be found for ridding the land of its most terrible curse, all rational men and women should, and will, advocate its employment.

CUTER THAN THE MAN.

(New York Sun)

It is not given to mere man, victim of the perpendicular drinking habit or abstemious through the intervention of his physical director, to understand the ways of women. Miss Mary Shaw reveals a custom of libation that we had not suspected.

It is perfectly possible, as many society women know, to get drinks now in the fashionable millinery and dressmaking parlors. The lady touches madame's arm, she goes behind a screen, and the price of her drinks is added to her gown or hat."

Barker for eight-seeing car—See New York—the whole thing for 50 cents. "You're wrong on the price, young fellow. I've only lived here three years, and it's cost me fifty thousand."—Life

2 IN 1 SHOE POLISH

Easy to Use, Good for the Shoes

SECOND HAND ORANGE SKINS.

Now and then one sees in the English papers advertisements announcing that so-and-so has a large stock of orange skins for sale. As a matter of recommendation as to quality the advertisement concludes with the statement that they are from such and such a music hall.

There is a big business in second hand orange skins, lemon peel, etc., on the other side of the Atlantic. Most of them are bought by makers of jams and marmalade. This was brought out when there was an investigation of the preserving industry in England not long ago.

In certain portions of the theatres and music halls of London and other large British cities the seats are not reserved. Admission to the pit is generally sixpence. Once a person leaves his seat it is immediately grabbed by some one else. In order to get a good seat one must come early. One grows hungry as the hours go by before the performance ends. The favorite sustenance of those who sit in these cheap seats is oranges.

They consume them in large quantities and throw the skins on the floor. After each performance the skins are carefully gathered up and sold to dealers.

PILES CURED AT HOME BY NEW ABSORPTION METHOD

If you suffer from bleeding, itching, blind or protruding piles, send me your address, and I will tell you how to cure yourself at home by the new absorption method; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. Summers, box P S, Windsor, Ont.

TEMPERATURE OF OVEN FOR CAKE BAKING.

Put a piece of writing paper in the oven and if it browns a light brown in five minutes the oven is the right heat for loaf cake. Small cakes and layer cakes require a hotter oven. If the paper is dark brown at the end of five minutes partly cool the oven and start again just before putting the cake in.

Another test is to hold the hand in the oven and count twenty. If this can be done comfortably, the temperature is right for the loaf cake baking.

If the gas oven is used the cake should be put in the centre on the top grate. Open and shut the doors of the oven very carefully after the cake is in. Do not stir the cake until it is into the oven until it is nearly done. Some good bakers advise never turning the cake, even if it is baking unevenly. If the cake seems to be browning too fast cover with a piece of writing paper, after it has been in the oven at least twenty minutes.—Woman's World for June.

THE AGONIES OF HADES

Arnot supposed to be worse than a bad corn. For years the standard remedy has been Putnam's Corn Extractor. It painlessly removes the worst corn in 24 hours; try Putnam's Extractor, 25c. at all dealers.

Shorthand in Cicero's Day.

Shorthand is now so well known and so widely practiced that he is apt to think of it merely as a product of our own bustling times. Nevertheless, the history of the art of shorthand writing extends over a period of some thousands of years, and its origin, in spite of much discussion and the production of a enormous amount of literature on the subject, is obscured in the mists of antiquity. It is a history filled with humor, with romance, and even with tragedy.

The first question of which we have definite knowledge has to do with a romantic story. It is the system of Marcus Tullius Tiro, originally a slave of the illustrious Cicero. Whether Tiro was the inventor of the method he used, whether it was devised by Cicero, or whether the system was much older than either, are points upon which historians have squabbled for centuries, but the fact remains that Tiro became so proficient in the art of it that he had not been for this gifted slave many of the famous orators' most treasured speeches would never have been recorded, and so he used to the master Cicero, being given his freedom by Cicero that he was given his private secretary and a staunch friend.

This is romance. There are both humor and tragedy in the fate of Cassianus, who was a teacher of shorthand at Imola during the fourth century. Whether it was the fault of the teacher or the system we are not told, but the class one day became so exasperated that they attacked and killed the unfortunate Cassianus with their styluses. The system he used was that of Tiro, which survived for many centuries, and only a better method, it did not always lead to that accuracy which could be desired, as a certain unhappy notary found when the Emperor Severus ordered that the sinews of the fingers of his right hand should be cut on account of some inaccuracy! Nevertheless, Tiro's system survived in a more or less imperfect state down to mediæval times.—From "The Story of Shorthand" in the Strand.

THE BEST WAY

Suggestions for the Busy Housewife's Scrapbook.

To remove typewriting ink from linen, soak the inked parts in turpentine 24 hours, then pour boiling soda water on it, rinse thoroughly and dry.

To clean the bone handles of knives or any bone article, rub first with lemon juice and then with salt. This will remove grease spots and all kinds of stains.

To keep a silverlike lustre on your saucen lids and tin goods, dip them in boiling water into which soda has been dissolved, to remove all grease; then rinse with cold water and polish with a cabbage or with a rubber leaf and rinse again with cold water. Do not wipe them, but put them before a fire to dry.

To remove old wall paper use the following solution: Make a thick paste solution by adding flour and salt to boiling water, and add to this a few ounces of acetic acid (which may be purchased at any drug store). Apply this with a brush to the old wall paper. After the paper has been removed very easily in big strips and with very little dirt.

NEW CHEMICAL GUN TESTED.

Ernest Welsh, of Hull, has invented a new chemical gun for which remarkable claims are made and which has undergone a Government test. The gun weighs three hundred weight and is said to throw its projectiles, which ignite upon impact, to a distance of five miles.

The mechanism, as briefly explained by Mr. Welsh, consists in part of three generators which manufacture three distinct gases. In the stopper there is a small sponge saturated with a certain fluid which also gives off a gas, while there is further a supply of oxygen and hydrogen inside the cylinder.

The cylinder rests on a plate and by the setting into motion of a small electric motor situated on the right-hand side of the gun the gases are exploded and the projectile is expelled.

Mr. Welsh says that there is no recoil and there is no pressure on the outside of the cylinder. All pressure is felt forward. The nature of the gases is a secret, but Mr. Welsh says that the gun has been tested with results satisfactory to all who witnessed the demonstration.—London Letter.

Minard's Liniment Lumberman's Friend.

PANAMA CANAL QUIBBLING.

(Montreal Herald)

The latest argument put forward tentatively by the United States for the settlement of the Panama Canal. The objection that purely domestic trade should be exempted, should this concession be granted, might be why not to forego exemption on oceanic trade. But this will hardly satisfy other nations. A cargo from Halifax to Vancouver might be purely domestic Canadian trade as one for New York to Boston or from New Orleans to San Diego. Similarly Great Britain might claim exemption for purely domestic trade with one of her Pacific possessions were the United States to extend the meaning of "domestic trade" to cover commerce, say from New York to the Philippines. The only way in which Uncle Sam can avoid this and the imposition of double dealing is to wipe out tolls altogether as it was originally agreed to do.

EDUCATE THE PEOPLE.

(London Advertiser)

Education is too important a factor in moral improvement to be neglected. Laws are of value in a free country only in so far as they crystallize the sentiment of the majority of the people. When the people are individually educated to the idea that it is an offense to drink liquor, there will be no difficulty in enforcing them. In fact, when education has done its full work, there will be little need for laws. When the people do not want liquor no one will manufacture it. The traffic will be abolished. If there ceases to be a demand, there will no longer be a supply.

"When is the man coming to white-wash the fence? To-morrow." "Always to-morrow. As an artist, he is a futurist of the worst type."—Washington Herald.
