Ancient Greek Not as Painted

It is very hard for most of us to think of the ancient Greeks as anything but rather elegant fellows who enjoyed a balmy climate few clothes and "went in" with inexplicable enthusiaem for esthetic matters.

A recent writer attributes much of this conception to Winckelmann, who, in turn, got it from studying too exclusively the art life of the Greeks. This writer, R. W. Livingston, in "The Greek Genius and Its Meaning for Us," puts it very keenly:

'The Greeks, it appeared, were beyond all things beauty lovers. They stripped at their sports, they gave prizes for beauty; Lais fascinated them; they spent their days in games and festivals; they studied to 'observe propriety both in feature and action', so that 'even a quick walk was regarded as opposed to their sense of decorum.'

"Winckelmann had looked upon the tranguil beauty of Greek art. . . until he was led almost to fancy that the serene figures in the Parthenon marbles were portraits of the ordinary Greek, and that the streets of Athens were full of well draped, statuesque men, pacing reposefully through an august life. This view (Goethe himself at times encouraged it). colored the glasses through which Europe looked at Greece for many generations, and has been corrupted into a watery estheticism very different from what Kinchelmann meant by it."

This view of Athenian society will probably be a long time disappearing even among well-read people. But it is tially false. Critics used to tall about the archaeological fidelity of the pictures of the late Sir Lawrence Alma-Tadema, but we are beginning to see that they are all fundamentally untrue. They portray a life that was too clean, too pretty, too leisurely to be quite true. There was grime in Athens; there was rudeness and bluster, things were in a constant state of being mussed up. But the gentle figures of Alma-Tadema's paintings live in serene and classic detachment It is the spirit of Winckel-

mann over again. But we confess to considerable please are in the attempt which another creek cholar, A. E. Zimmern, has made to eve a realistic picture of Athens. His not a more bit of literary portraiture, but a serious attempt at one which has wen the approval of such men as Prof. best Mussey. It is a good cure for the corrupted Winckelmannism from which most of us suffer:

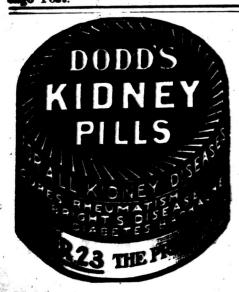

We think of the Greeks as the pioneers of civilization, and unconsciously and comforts in which we moderns have codit them with the material blessings en taught—and are trying to teach Aciatics and Africans to think that dvalization consists. We forget that they were far more innocent of most of se than the upcountry Greeks of today or than most Englishmen were before the industrial revolution.

"It is easy to think away railways and telegraphs and gas works and tea and advertisements and bananas, but we must peel off far more than this.

"We must imagine houses without drains, beds without sheets or springs. sooms as cold or as hot as the open air, only draughten; meals that began and ended with pudding, and cities that sould boast neither gentry nor million-

"We must learn to tell the time without watches, to cross rivers without bridges and seas without a compass; to fasten our clothes (or, rather, our two pieces of cloth) with two pins instead of rows of buttons; to wear our shoes or sandals without stockings; to warm ourselves over a pot of ashes, to judge open-air plays or law-suits on a cold winter's morning, to study poetry without books, geography without maps and politics without newspapers. In a word, we must learn to be civ

ilized without being comfortable." All this will be hard for those who take Greek life as full warrant for indulgence in the pretty-pretty. But the suit of the pretty-pretty has already persisted far too long. Whatever helps to speed it should be welcome. Chi-

APPLES AT 40c EACH.

Missouri apples were listed on the menu cards of two or three exclusive New York hotels the past winter at forty cents each, which was about the cost of half a bushel of apples anywhere in the open market. The difference in cost represents, very largely, exclusiveness and profit, with a little additional expense for packing, says A. A. Coult in March Technical World Mag-

When the early prospects of a large apple crop in all sections of America became assured in mid-summer, a grower at Lebanon, Missouri, with an orchard of one hundred acres, realized that something unusual would have to be done to get more than a living price for his erop. He went to New York to solicit orders. He had the idea that an exclusive offering would command high prices, and suggested to some of the commission men that they try a few individual boxed apples for the trade, in addition to their order for several thousand barrels of apples for the general market. One New York commission man thereupon signed a contract for 6,000 apples for which he was to pay fifteen cents each at Lebanon, the number being limited to make them sufficiently exclusive. Each apple was perfectly sound, of

high color and uniform shape, not less than three and one-half inches in diameter, nor more than a quarter of an inch larger. Each stem had at least two perfect leaves attached and each apple was packed in an attractive pasteboard box and the top sealed.

Young ladies cut the selected apples from the trees with scissors, to protect the leaves on the stems. The apples were placed on a cloth-covered table for inspection, and those that passed muster were dipped, leaves and all. in a solution which closed the pores of the skin and leaves, causing the latter to retain their natural color, and conserving in the apple the original flavor. After the solution had dried, each apple was wrapped in soft tissue paper to hold it firmly in its box in which it was immediately placed. The leaves were carefully arranged on top of the wrapping paper so that they would not be folded or crumpled, and the top was sealed.

UNCONSCIOUS CHILD HUMOR. A change of tenors had been made in the church choir. Upon little Lola's return from morning service she exclaimed: "Oh, mamma, they've got a new

terror in the choir!" "Do you ever see the President?" asked Willie of his uncle, who lived in

Washington. "Yes: nearly every day," was the "And does he ever see you!" queried

the little fellow. day Stella accompanied her

mother on a shopping tour. They sighted the candy department in a large store. and Stella said:

"Mamma, I'm afraid you'll have to buy me some peppermint-I feel awfully faint."-Chicago News.

\$1,000 **REWARD**

For information that will lead to the discovery or whereabouts of the person or persons suffering from Nervous Debility, Fits, Skin Disease, Blood Poison, Genito Urinary Troubles, and Chronic or Special Complaints that cannot be cured at The Ontario Medical Institute. 263-265 Yonge Street, Toronto.

THE GREATER SUCCESS.

(Montreal Heraid) The wife of a prominent young tenor has obtained a divorce from him because thorough his suider tise to fame, they have drifted apart and his sudden love for her has died. While he has been winning plaudits in London and Vienna she she has been living quietly at Muncle, indiana, devoting herself to their three little children. He calmly declares that doesn't care for any more as "their station in life have eash wider separ-ated." Wonder which one of them has been the greater "success."

BLESSED IS WORK.

(Woodstock Sentinel Review) There are worse evils in the world than work. Lucky is the man who is able to work. Lucky in the man of a kind suited to his tastes and his abilities. It would be a better and a happier world if every-body acquired a taste for work of some kind, if not for the sake of making a then for the sake of the work it self and the satisfaction it brings. One of the great mistakes of life is to look upon work as merely a means to an end, the end being the making of a living. For most people the work itself is almost as necessary a condition of a happy life as food and clothing.

YES, LET'S HAVE IT.

THE WAY OF THE ANT.

The tropical w'se ant builds large cities formed of mounds of hard earth from two to three metres in height. In each one of these ant cities there is only one female, the queen, who is the mother of the entire family. If an ant shows a disposition not to work, or is unable, he is conveyed to the "policeman," and the jawbone of this official puts the incompetent out of the world. Rest appears to be unknown in the ant hill, says Harper's Weekly. The bodyguard installed at the top of the house exercises ceaseless vigilance against the coming of enemies or the entrance of undesirables. There seems to be a sentinel system, and the ants are relieved at intervals. In case of necessity they convey daring warnings. These forces on guard at the top of the ant hall are changed with such regularity as to make it probable that they have something in their calculations which answers to time.

Minard's Liniment Cures Burns. Etc. LOBBIES PACK OF PANAMA BILL (Philadelphia Record)

quite possible that the interests of the railroads and the obligations of the Government coincide in the matter of the free-to-coasters provisions of the Panama Canal act. The existence of a railroad lobby at Washington, however, would not be an argument in favor of reaty violations; and the pledge of this Government will respect to equality of Government will respect to equality of treatments of the ships of all nations desiring passage thorough the canal would remain as binding as ever. If Senator O'Gorman would be a little more specific in stating the grounds of his suspicton of railroad lobby in favor of Senator Root's repealer of the free toll sect ator Root's repealer of the free toll sect-ion of canal law it might lead to a dis-closure of ship subsidist and other lob-bies, which are working to retain favors for this coastwise shipping combine.

BETTER THAN SPANKING

Snanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. S. Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't biame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine dif-ficulties by day or night.

An English beer vender wrote over his shop door: "Bear sold here." Tom Hood who saw it, said it was spelled right.

THE BEST WAY

To Attend to Things Around the House.

To protect the bottom of a muslin or any light-weight cotton dress skirt, sew narrow Valenciennes lace along the under edge of the hem so that it shows a quarter of an inch or less below. This gives a dainty finish to the frock also.

In order to protect your brown shoes polish them with a good russet shoe polish before wearing. Spots then can be cleaned off easily, as all the pores of the leather are filled with the polish.

To convert a small upstairs porch into eleeping porch, place half inch brase rods at the top and bottom of the opening on each side and on these shir curtains of light silkoline or similar material. There can be slipped back and forth on the rods like eash curtains.

To prevent sea sickness and car sickness in a simple manner, try chewing gum.

To give an ordinary chest, closet or bureau drawers the virtues of a cedar chest, soak pieces of wood in cedar oil and lay them in the drawers, chest or

To prevent strands of beads strung ou string breaking easily, string them an dental floss. It is the most durable of thrdeads for this purpose.

To hold a tack where it is difficult to hold it with the fingers, thrust it through a strip of paper and hammer away on it without annoyance or danger to your

HEROISM STILL PLENTIFUL.

(Ottawa Citizen) Heroism expresses itself in myriad ways. It is vastly common that is confessed. Now and then some deed like fessed. Now and then some deed like that of the Scott party is published for and wide, thrilling humanity by its splendor. But for every one of the five who died in the Antartic a year ago, there has been in that period a countless number who have faced great perils for great causes, and who have yielded life rather than fail of their commonplace duty. THE IDEAL HUSBAND. (Philadelphia Record)

The mystery of the ideal husband has been explained. He is the product of the ideal wife, and as this information comes from the ideal wife herself there can be no doubt about the fact. Dr. Adeline Goodrich Soule, of Kansas City, has been talking about the ideal husband, of which she is in possession, and an envious woman asked her: "Will you tell us where you found this ideal husband who has helped make it possible for you, so far, to solve this great domestic question" "I made him largely myself," replied Dr. Adeline. "Ah, wives," she exclaimed in a recent address, "there can never be an ideal husband without there being an ideal wife." As Isaac C. Soule is an ideal wife." As Isaac C. Soule is an ideal husband, we have the indisputable evidence of Adeline Goodrich Soule that she is an ideal wife.

Dr. Adeline Goodrich Soule tells us that "the model husband has no time or debr. Isaac C. Soule, the idea! husband, "spends his nights largely in his well equipped workshop in the home, making labor-saving devices and articles that are useful in the home, which he enjoy. The ideal husband, the right sort of a man, never has time to run about nights, and is as interesting in the domestic question as the women. He will do his share of the work, and, what is best, will be cheerful about it. He will plan

work of house keeping a divided one. Yes, but what is she doing? He is to work all day earning a living and spend his evenings helping his wife about the housework. Is she going to reciprocate by helping him to lay bricks, or make up his accounts, or sell goods? He is to do all his own work and half of hers. She no longer spends her afternoons in calls, matinees, shopping, at her club and attending meeting for the elevation of the human race. He works in his shop or factory all day, and sits up late at nights making domestic devices to save his wife's labor. Couldn't the ideal wife give the ideal husband one of two nights a week off?

Dr. Morse's Indian Root Pills

are not a new and untried remedyour grandfathers used them. Half a century ago, before Confederation, they were on sale in nearly every drug or general store in the Canada of that day, and were the recognized cure in thousands of homes for Constipation, Indigestion, Biliousness, Rheumatism and Kidney and Liver Troubles. Today they are just as effective, just as reliable as ever, and nothing better has yet been devised to

Cure Common Ills

MAKING GREAT STRIDES.

Miss Virginia Brooks, of West Hammond, Ill., is out as a candidate for polce magistrate in opposition to two men, whom she claims are undesirables. She further says the town is going to see the liveliest campaign in its Probably it will, for this is the day when women can make a noise in the public life as well as the men. The women suffragists of the neighboring republic are making great stride forward, and their advance is not marked by violence. Their arguments must be convincing.

Minard's Liniment for sale everywhere AN UNWISE GOVERNOR

(Kingston Whig) Twenty-six murderers have had their sentences commuted by retiring Governor
Deneen, of Illinois, altogether. Perhaps
if the sympathy that goes out to slayers of men in certain parts of this continent were transferred to their victims, were translation that the charge might make some individuals think twice before seeking revenge with murderous weapons. Making things easier for the shedders of blood is not calculated to discourage crime or violence.

HURTING A GOOD CAUSE. (Chatham News.)

It is rather too much to hope that the It is rather too much to hope that the folly of the British Suffragettes will not react against the good cause in which they are misguidedly working. Women ought to have votes; but after Wednesday's spectacular demonstration, even the most ardent friends of woman's franchis most argent friends of woman's franchis will feel like stipulating that a certain class of women should be so excluded.

LEATHER BAGS.

Which They Can Be Ways in Renovated.

A brown leather bag can be cleaned in several ways. The simplest, perhaps, is to apply sweet oil, afterward cleaning the leather by rubbing it froo from oil with clean cloths. Benzine or methylated spirits rubbed on with a soft flannel are effective; afterward polish. A favorite way is ot rub the bag with a sponge dipped in a mixture of two parts of best cream and one part of linseed oil, mixed

when both are lukewarm. Black leather bags should be sponged with a strong, warm solution of soda. When the bag is soaked apply a coat of black ink and let it dry in; follow this with another coat of ink and let it get perfectly dry. When dry rub off the superfluous ink with a damp rag and then brush the bag lightly with the white of an egg. There are some good qualities of black leather polishes that

retone bags nicely. Patent leather can be cleaned by rubbing it with a slice of orange, polishing it when dry with a soft dry cloth.

WAITING TO HEAR.

THE HIGHEST RAILROAD.

Between the Mulato River in Chile and Potosi in Bolivio a railroad line whose highest point is 15.000 feet above sea level has ben constructed. This is the highest railroad in the world. The road connecting Argentina and Chile reaches almost the same height. An English company proposes to construct a road still sigher to mite Mexico City with Pueblo, and ascend Mt. Popocatapetl, this volcano being 17.500 feet above see level. This new lane will serve principally to transport sulphur from a bed in the mountains containing, according to the estimate of experts, millions of tons .- Harper's

Remove Those Unsightly Warts By applying Putnam's Corn and Wart Extractor. It cures corns, warts and bunious permanently, painlessly and surely. Every druggist in America recommends and sells Putnam's Extractor; it's the best, 25c. per bottle.

Devoted Brothers.

Not long since a gentlemen was pass ing through a certain town in which his only child, an attractive girl, well advanced in her teens, was finishing her education. Having a little time on his hands, he decided to have some conversation with the principal of the school. He was received with great cordiality, and his daughter's attainments were

duly described. "I think," said the lady principal to the proud parent, just as he was about to take his departure. "that you ought to be very happy, my dear sir, to be the father of such a large family, all the members of which appear to be perfectly devoted to one another. I think it is most charming that it should be so."

"Large family! Devoted to one another!" gasped the visitor, in undisguised amazement. "What can you possibly mean, madam?"

"Oh, but I am sure they are devoted to one another,' responded the principal. beaming through her glasses. "Why. no less than seven of Hilda's brothers have been here during the term to take her out, and she tells me she expects the tall one with the dark blue eyes again to-morrow."-New Fun.

MOTHER AND BABY

A mother's greatest care is the health of her baby-the prevention of constipation, colds, worms and other childhood ailments and the keeping of her baby happy and strong. Baby's Own Tablets are the mother's best friend in earing for the baby. They are absolutely the best medicine in the world for little ones. Concerning them, Mrs. Jos. Poitras, Mont Louis, Que., bec. says: "I am well satisfied with Baby's Own Tablets, having used them for my baby, with great benefit. They are the best medicine in the world for little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THE NEW COLORINGS.

How about them?

Why so gorgeous?

And why so primitive? A child is responsible. A designer's baby made drawings. It also colored fruits and flowers. The efforts were altogether crude and

Yet these crude colors had a peculiar attraction.

So much so that they presently appeared upon printed fabrics. And now we see the most astonishing looking lot of silks ever displayed.
