APOCRYPHA.

Books Formerly Found in All Old Bibles.

In Harper's, James Thompson Bixby tells the story of the 14 books which in the days of our grandfathers appeared in the Bible between the old and new testaments.

The name Apochypha now attached to these 14 books means primarily Apocryphal meant simply the books whose origin was obscure or whose usage and meaning were secret. Neither among Hebrew scholars nor in the early Christian church did the word imply that these books were either untrustworthy, spurious, or unworthy of religious use and reverence. They have been printed, therefore, as part of the Holy Scripture in the Septuagint, the Vulgate and most Roman Catholic Bibles up to the present time. In the Lutheran, Reformed and English Bibles for nearly three centuries after Luther's break with Rome they were printed, and they have been read in Protestant pulpits during the same period as useful and good for edification, although not autheritative in proof of Christian doctrine. The homilies of the Anglican (hurch are still full of citations from the Aposrypha on an equal level with the canonical Old Testament.

It was not till the year 1826 that the British and American Bible societies banished them as uninspired from the company of the other biblical writings. with which for 18 centuries they have been contributing to the moral instruction and spiritual nurture of Christen-

Have these ancient books between the testaments deserved this sentence of banishment from Christian knowledge and service? The customary reason has been that they were "uncannonical." Many Christian scholars, however,

doubt both the wisdom and the justice of this sentence. For with the rise of modern biblical criticism the reasons on which theologians had learned, such tion, have one by one lost their former force. Modern scholars think that the Divine Spirit was quite as likely to dictate religious revelation in Greek as in Hebrew, and that, in respect to scholarly knowledge and judgment of what is spiritual truth, modern critics and theologians are as competent to judge as ancient rabbis or the doctor of divinity of one or two hundred years

FASHION HAS A MORAL SIDE.

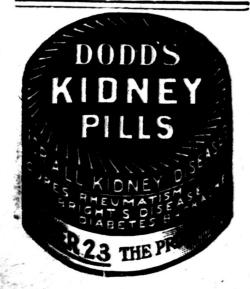

(Detroit Frees Press)

Mr. Basil King, of Cambridge, Mass. makes a contribution to the current dis-cussion of prevailing feminine fashions by remarking that the modes of the day saver of the madhouse and that a woman's clothing must more of less influ ence her spiritual nature for good or for evil accordingly as it appeals to the finer or to the grosses senses.

The sanitary issue can take care of it-Anyone with even limited powers of observation can form a fairly correct opinion as to the justness or the unjustness of Mr. King's censure of styles on this point. And the observation need mat long be extended, nor need many samples of evidence be examined.

As to the spiritual influence point there

may wee be some careful thinking. For if styles are to injuciously affect the natures of budding women they become matter of racial and moral concern. But if is questionable whether much think-ing and conversational denunciation will be affective to alter the situation. be affective to after the situation. If it is to be altered it must be altered by wo-men themselves. And if they are to con-tinue to be the lure to higher and better endeavor on the part of men they will not be remiss in rectifying the obligations of fashion-surely not.

NEWEST CORSETS

Come High, But Are a Vast Improvement.

Corsets have undergone an entire transformation, not only in shape but in materials, in the last few years. No longer does a woman have to buy one of a few styles and try to fit her figure to the corset. She now may choose from as many styles as if she particular type of figure she can by a only remedy which has a record of she needs, even in details that will cor-

rect faults of proportion Whether a corset is long above the waist or not depends very much on the figure. If the top edge cuts into the flesh it is a sign that it is not the right height, even though a brassiere be worn with it. On the other hand, every corset is long below the waist, some so long as to be skirtlike. Of course the inset supports of whalebone or other sustaining fabrication do not descend much below the hips, but they are not needed below, the material holding the surplus flesh firmly in

To-day a stout woman need not be imprisoned in heavy coutil, as the strong open mesh tricot weave may be used and is much more hygienic than the closely woven material. Besides, most of it launders, and a corset can be kept in good condition.

There are those, however, who like the prettiness of the pale pink and "The Hidden." Originally the word blue batiste corsets or the white ones embroidered with a little colored flower or fleur de lis. In these corsets, to get elasticity in certain parts, matching silk elastic webbing is insometimes a band is placed inside in ston. Canada. front to give extra support to the ab-

domen. The brassieres are made to match the corsets or of evelet worked linen. and have seams stayed by tubular bias bands into which little supports may be inserted, removable for laundering. Those to wear with a low neckgown are on quite different lines from those for daytime wear, in some cases being attached to the corset top and not over the shoulders.

It goes without saying that these corsets cost more than the ordinary ready made kind, but, fitting the figure, they last much longer, and therefore are not more expensive in the end. The expense is more in the time taken to find the right corset for the figure, as a number of shops must be visited in order to make comparisons. It is necessary also to get used to the new silhouette with the undefined waist line and the symmetrical but unaccentuated curve that gives the fasrionable figure of to-day. The latest corset designs shows a slight variation from the straight front pinched in a little below the bust, curving outward slightly below.

There unto others as we would have others do are others, however, who fight to proteet themselves and their young. Speaking of the fights among fishes in the aquarium, the balletin says: "The angel fishes, beautiful as they are in appearance, have perhaps the most devilish disposition of all. A tank of angel fishes reminds one of the notorione, even-tempered family who were all mad all the time." The watchfulness of attendants usually prevents the fatal termination of these misunderstandings, but occasionally a fatal injury is inflicted. TO PURIFY WATER.

Advice .

Campers.

(By A Physician). How shall we be sure that the drinking water we use, while on a vacation

trip, is pure and wholesome? The question is bound to come up when you and I and the folks next door "pick up" and start for the mountains this summer. There is nothing more important than this little matter, either.

It is quite out of the question to hope to get good water at every summer resort. And if you are planning to go camping, it is not certain that the mountain stream will be uncontamianated. Neither is it possible to have an expert, or a chemical laboratory at hand to correct the shortcomings.

So, this being the ease, it will be wise to know some easy, simple way of purifying the drinking water yourselves. Read this little suggestion, carefully; eut it out and paste it in the memorandum book you are planning to take with you when you start for the summer rest. Follow this procedure:

No one but a blind pessimist can fail to see that in every department of life three has been progress. We need only to go back a few centuries when war meant slaughter and ratine to the non combatant as well as to the soldier; when in the highest society there was the lowest standard of purity; when religiouss seats thought more ow their dogmas, than of Christianity; when politics was a game of corruption in which every man had his price; when the masses were degraded and rich. How can a thoughtful man compare the past with the present and not realize that everywhere there has been improvement? everywhere there has been improvement?
