Pauper Snobs of India.

One-fourth of the Anglo-Indian population in India is supported by charity. For the Anglo-Indian thinks that work is beneath him, and really at heart he is born a sndb. It isn't drunkenness which makes him an object of charity, for there is comparatively little drunkenthe seasonal trades, as it is continuous the year round. Neither is it the monotony of a dreary home or daily toil that drives him to drink and then to poverty. For there are people of one social gade, but the homes of the poor social gade, but the homes of the poor are interspersed

with the rich.

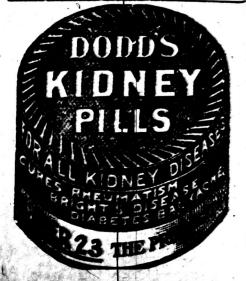

He is a pauper purely and simply because he is an aristocrat. He has English blood in his veins and he wants to live like the English, and the English in India are the successful and the rich. They have their well appointed homes, their servants and every luxury. The Englishman who works with his hands, the men in the factories, the day laborers, to frontiersmen, the farmers are not found in India. The beggar snob does not know of their existence. He knows only the coolies and the Hindus, who work with their hands, and he will not be one of them. He wishes to pattern his life after the Englishman whom he knows. He wants to have a servant and be waited on, and if he cannot he will not work. To dig with a shovel is a disgrace in his eyes and begging is infinitely more respectable.

the Anglo-Indian pauper is supportso the Anglo-Indian pauper is supported on a scale better than that of the faithful workmen among the Hindus and coolies, and the burden of the charity falls
on the rich English. The wealthy Hindus
will take none of the
They say that the Englishman created
this class and that on him falls the
weight of support.
There is another course of this

There is another cause of this pover-There is another cause of this pover-tv also, apart from this strong false senti-ment. That is tions of life which cause the death of the father of the house sold at an early age. This reduces the family to pauper-ism at once, as the lines of work open to the Anglo-Indian women which she will accept are practically none.—Chicago Tribune.

WANTS GOOD ROADS NOW.

(Brantford Expositor) Good roads mean to the agriculturist a great saving of time and temper and machinery, more of the comforts of life, and an enhanced value for his lands. and an enhanced value for his lands.
These things are certainly worth having and it is better that men now living should be able to enjoy them rather than that their enjoyment shall be handed over entirely to prosperity.

DON'T TRUST STRANGERS

And Don't Be Angry if They Don't Trust You.

Especially should girls heed this warning. It has been given over and over, but here is a story which illustrates afresh this ancient advice: On a steamer which reached our

shores only a few weeks ago, was young woman from the west, who had been abroad for study. She was anxious to stop a week or two in the metropolis before going on to her distant home, but her funds were limited and she could not afford to stay at an expensive hotel. On board the ship she and become acquainted with a man who seemed to be a perfect gentleman

-quiet, refined and cultured. He told her that he knew of just the place for her-a fine boardinghouse where the rates were most reasonable. She gladly put down the number, and prepared to go there upon landing.

Fortunately she had become what intimate during the voyage with a young woman of about her own age. This person said that she knew well the man who had charge of the cabs on the dock. He had worked in an office of one of her relatives in his youth, and was always glad to do favors for her

When the two girls mentioned the number to which the stranger had directed his confiding young friend, this man threw up his hands in horror. "On no account go there!" he cried. "It is one of the worst and most notorious are sold by medicine dealers or by places in the city." He was able to dir-Williams Medicine Co., Brockville, Ont ect her to a respectable house; but you can see by what a mere chance she was saved from an appalling fate.

There is a converse truth to this valuable adage, "Do not trust Strangers."

It is, "Do not expect strangers to trust you." We have all seen people who were very angry because strangers seemed to regard them with suspicion, and we have even been irritated in that way ourselves, no doubt. But we have no business to expect confidence from those who do not know us. We may feel that our very appearance ought to show that we are good; but far more respectable looking people than any of us, have turned out to be scoundrels. Satan is sometimes disguised as an angel of light.

Let this absolutely true story, which in spite of all the warnings of which the papers are full, has just occurred, carry a lesson to every girl who reads it, and let her tell her friends. It is thus that the awful "white slave" traffic is often assisted. And do not get angry if strangers do not always trust you. They ought not to, until they know something about you.—Kate Up-son Clark in Leslie's Weekly.

SPECIAL CARE OF THE HAIR.

The condition of the scalp and hair de ends first upon the general health. Attention having been given to the minor details of this fundamental requisite, local treatment of the hair and of the scaip.

Allow the hair to hand loose ten or fif-Allow the hair to hand loose ten or fifteen minutes, while you are dressing in the morning. Did it ever occure to you that perhaps your head needs a rest? Change the mode of arranging the hair. While you are writing a letter, or reading, or perhaps mending take the pins out of your hair, and sit in the sun. If your scalp is itchy or irrated, the sun and will help to heal it and will give life to the scalp. An hour once a week, where the sun and a mild wind will reach the head, will keep the head odorless and the hair fluffy.

One should never retire at night without brushing and combing the hair—to

out brushing and combing the hair—to remove the day's dust. A thorough brush remove the day's dust. A thorough brushing serve to stimulate the scalp, distribute the natural oil, and cleanse the hair. The old rule was to brush the hair a hundreds strokes each night, if you would have a beautiful "crown of glory." Perhars you will not have to blind yourself to so strict a rule, but certainly you should not allow the hair to remain over night, just as it was during the day.

should not allow the hair to remain over night, just as it was during the day. The habit of alowing the hair to fail loose over the pillow ht night, is a good one, if your hair is too long or thick.

If your hair is falling out badly, a scalp mssage will do wonders to stimulate the circulation and loosen the scalp from the head. Each hair receives its nourishment through a tiny tube which extends from the scalp to the end of the hair. Therefore, the more yigouriously the scalp is massaged, the greater are the circulation. A good hair tonic can also while the massage is being given—Mme. Jeanne La Place in Women's World for Movember.

A COSTLY WINK.

(Ottawa Evening Journal.) A young man in Pittsburg winked at a pretty girl on the street. The young lady made a poke at him with her umbrella. A passing fireman then beat him up. They took him to a hospital, where it was found necessary to remove his eye. Then they haled him before a magistrate who sent him down for thirty days for attempting to flirt. That was a mighty costly wink. But winks at strange girls are quite unnecessary.

Minard's Liniment Cures Garget in Cows

THE ETERNAL FEMININE.

(Detroit Free Press) Even yet, at the end of centuries, men have not learned the secret of managing women. They scold and sneer, ridicule and legislate; she laughs and pays no heed. There is something of the naughtiness noticed. If she wishes to anchor a miniature Christmas tree on the outer periphery of her hat, or scrape the clouds with a "stick-up", or wear slits in her skirts til she looks like a perambulating penwiper, depends upon it in the House of Bishops cannot stop her. Nothing can—but a change of fashions.

A BAD SHOWING

(Stratford Beacon) (Strationd Beacon)

The number of illegitimate births in the Province last year was at the rate of 21.3 per 1.000. This is a serious thing. In Ottawa it was 31 per thousand, in London 63.2 in Kingston 58.2, and considerably lower in Toronto and Hamilton. There will be a disposition to blame part of this on outside districts, and it is quite likely the series.

An idle rumor always gains currency, which is more than can be said of an

THE BEILISS TRIAL (Philadelphia Record)

The secontial of Beiliss has saved Russia form a discrete so great that it is almost inconseivable. In no other country in Christmeon could a Jew have been ured on a charge of killing a Christian in order to get his blood for ritual ups. The charge was made by pagans against Christians, and in the darknest ages it was sometimes made by Christians Remines Jaws. But centuries ago the history substitute of the Roman Catholic Charact repudiated this accusation against Jaws. Said official evidence of this fact was obtained from Rome for use in this trial. The Protestant communions have resultated the slighest suspicion that Jaws could have been convicted of ritual murder in Russia that country would have been branded with the ismorance and superstition of the darkest ages in European history. European history.

STERILIZING MILK WITH ULTRA-VIOLET RAYS.

The Bureau of Animal Industry has been carrying on a number of experi-ments at Washington D. C., in the use of ultra-violet rays for the sterilization of milk. The milk is spread out in a thin layer by means of a drum revolving at high speed, which picks up the milk from one trought and conveys it to another. While on the drum it is subjected to the ultra violet rays. Then it is picked up from the second trough by a second drum and conveyed to a sterile flack. A quartz mercury vapor lamp generates the ultra violet rays to which the thin film of milk is exposed. It has been found that by this treatment the bacterial contents is greatly reduced. However, when the milk is exposed for a sufficient length of time or in a film thin enough to produce a much larger reduction in the bacteriae content, it is given a disagreeable flabor, which renders it unfit for the market.

THE DEALTH' PENALTY (Rochester Post-Express) Without reviewing the arguments against the death penality, it may be pointed out that it could be defended in former ages as an imperative necessity. Nomadic peoples could not confine their criminals .nor could they wisely set them free to hang on the outskirts of the tribe,

robbing and murdering at will. Executions were therefore essential to the maintenance of order and the security of life. Later, when races located permanently enough to build prisons, there was so little humanity and so little knowledge of sanitation that the dungeom were death traps, and the offender who was probably more fortunate than

who was probably more fortunate than a long-termer or a "lifer."

But all this is changing now, and civilization can sequester its law breakers under conditions which make reformation and moral, mental and physical improvement possible. That this can be done, is accepted by many people as a conclusive reason why it should be done, especially as the theory that a criminal tendency is a curable disease is gaining ground.
