Keeps Up Appearances

Our submission to the whimsy of appearances is not to be discredited as it seems. If we were not somewhat concerned with keeping them up, we should be very soon reduced to a state of nature. To have no regard for appearances is to be a barbarian. No matter how simply we may live, we always have the opportunity to show in our manners, our dress, and our dwellings and appreciation of the dignity and appreciation of life. We may have to postpone indefinitely getting the house painted, but we can always see that the grass plot in front of it is always trim and neat. Our children come when we undertake to keep up appearances that are apt to be a nuisance. The man with two thousand dollars a year, has appearances to keep up, as well as the man with ten thousand a year; but the two thousand dollar man's appearances should not emulate those of the ten thousand dollar man. The hardest struggle of the modern life is, indeed, involved in keeping up a proper appearance on a limited income but in many cases the struggle is hard because the conception of a proper appearance is improper. The most idiotic surrender of individuality is the common one of feeling that you must have possessions similar to your neighbor's, or it is possible a little better than his. How unintelligent is the unthinking family that must at pecuniary sacrifice have a piano as a parlor ornament simply because there is a piano in the house on either side. A good many persons make extravagant purchases because they cannot bear not to have something that someone else "no better than ourselves" miraculously seems able to possess. The thing to remember about keeping up appearances is that they should be your own—not those of some one else.

Silly Brantford Girl

Woodstock, Oct. 25.—Losing her cap while riding, dressed as a man, on a freight train, brought about the end of a Brantford girl's adventure and probably saved her from getting into trouble last night. The fifteen-year-old girl landed here on a freight train, and, having lost her cap, her long hair, which was twisted on the top of her head, would give her away, she left the train and called at a house near the G. T. R. station, asking for someone to cut off her hair. The woman of the house took her in and telephoned for the police. Chief Killing found the girl had boarded the train at Brantford as a result of having read of

other girls dressing up and having adventures. She took her brother's clothes. It was arranged that she should stay at a private home over night and her parents, a respectable couple in Brantford, were notified. The mother came and took her home to-day.

The Sanitation of Soda Fountains

An urgent and apparently neglected question is discussed by Dr. W. S. Rankin in the Bulletin of the North Carolina Board of Health. This writer finds the solution of the problem in the use of paper paraffine cups and saucers. These can be sold at about half a cent apiece. In the process of manufacture they are dipped into melted paraffine, and are practically sterile; they are put up in stacks, and in using them at the fountain the attendant does not touch the inside of the cup or the upper third of it. (Of course the cup is thrown away after once being used. The spoons used with the ice cream should be dipped into an antiseptic solution before the customer is served.)

Two Additional East River Tunnels

It is only a few years since the construction of a subway tunnel below the East River excited wide-spread interest because of the difficulty and magnitude of the undertaking; but to-day we have got into the habit of building tunnels under that river almost as though they were commonplace forms of engineering work. Two new tunnels are to be built in connection with the dual subway. The Interborough tunnel leaves Manhattan at Old Slip and runs along East River to Clark Street, Brooklyn; the other tunnel to be built by the New York Municipal Corporation will extend from Manhattan at Whitehall street below the East River to Montague street, Brooklyn. When these two tunnels are completed, Manhattan and Long Island will be joined by twelve separate tube tunnels and by four of the greatest bridges of the world, thru and over which will be about 50 separate lines of track.

Worth Gold to Sufferers

Why suffer from Piles? Get rid of them quickly by using Burton's Celebrated Pile Remedy. Send \$1 now for full prepaid treatment. Address: Burton's Supply Company, Box 136, Brantford, Ont.

A Million Dollars for Good Roads

One of the most important of the many road improvement plans now under way in various parts of Canada, is that just launched in Essex County, Ontario. At a meeting of the Council, on Thursday, October 15th, a By-Law was drawn up for presentation to the voters next January. This By-Law calls for the raising of a million dollars to provide for concrete roadways covering no less than 150 miles, and connecting all important communities of Essex County. The proposed routes of concrete roads will completely encircle the County and afford the finest type of highway connection to the farmers reaching Windsor or any of the smaller towns. With the assistance of Engineer Huber, of the Ontario Government, the committee appointed at the last session of the council, went over the different roads proposed for paving. Having his recommendation upon the fact that the route will be used for much heavy traffic, Mr. Huber made his report in favor of using Concrete throughout. An interesting feature of the plan as outlined, is the provision of a continuous route of good roads. There have been instances in other communities where otherwise excellent road development ideas were, in measure, spoiled by failure to have the good road a continuous good road. The Essex County Council have shown their wisdom and foresightedness by providing for the complete connecting up of the proposed concrete stretches, so that in the completed project will appear no interruptions of unimproved or bad roads. While not in a straight line, the completed series of roads will be, in effect, one long continuous highway all of concrete, and taking in practically the whole of Essex County. There would seem to be a peculiarly enterprising spirit in the vicinity of the Detroit River. On one side of the River we have Wayne County, Michigan (the county of which Detroit is the principal centre) with approximately 100 miles of concrete County highways. This magnificent series of highways has been a model for other communities, and has attracted visitors on inspection tours from all over the world. Now comes Essex County, a sister community, on our side of the River, with a plan that bids fair to fully equal that of Wayne County, and which will perhaps, eventually eclipse the splendid road system that is the pride of Michigan. The building of 150 miles of concrete highways such as Essex County is to have means a model country from the view-point of inter-communication between towns. Doubtless we will find deputations of municipal officers visiting Essex County to obtain on how best to link together the farm communities with the market places. The eyes of all North America will turn toward Essex County and watch with growing interest the completion of this project.

The following is a letter received by Mr. J. C. Sanderson from the General Sales Offices, Montreal of the Canada Cement Company, Limited.

Dear Sir:—The following is a copy of telegram just received from our Toronto office, which explains itself:—"County Council of Essex decided last night to submit a by-law for one million dollars on January 1st for concrete roads. You are quite familiar with the work that we have been doing in connection with concrete roads, and this is probably one of the biggest appropriations ever considered, and certainly the largest in Canada for concrete roads. It is particularly gratifying, as Essex County is right across from Detroit, where the people know all about concrete roads, therefore, this cannot be taken, in any way, as an experiment. Yours truly, General Sales Manager."

One Death Every Four Hours "Consumption" the Cause

Six people die every day in Ontario from Tuberculosis—at the rate of one person every four hours—a total of over 2300 deaths every year—equivalent to the wiping out and loss to the community of a good sized town.

An appalling loss of life. The pity is that this continual sacrifice is unnecessary. These lives, or most of them, might be saved.

Pioneer work in the Crusade against Consumption has been done by the National Sanitarium Association. The hospitals at Muskoka and Weston are to-day standing monuments of the magnificent achievements of the Association.

One branch of the Association work—a free illustrated Lecture with seventy-five lantern views—is delivered by Mr. J. B. Watson, Field Secretary of the Association.

This lecture will be given on Tuesday evening, Nov. 19 inst., in the Lecture hall of the Presbyterian Church. A collection will be taken at the close in aid of the Muskoka Free Hospital for Consumptives.

"The amount of information which Mr. Watson was able to convey to his hearers in a short time was marvellous. His style of delivery was excellent."

"Those who heard Mr. Watson's lecture were interested, informed and pleased. The wonderful lecturer gave most valuable information in a manner most thoroughly entertaining."

"Admirably practical and instructive." "A speaker of unusual ability."

"A most thrilling lecturer."

Such is the chorus of praise, without any note of dissent, which has greeted Mr. Watson's lecture during the past two years.

The lecture explains in a simple, interesting and complete way exactly what the disease is, how to avoid it and how to treat it.

Parents, especially should know how to protect themselves and their children. Every private individual—man, woman, and child—is in danger and should know how to combat it.

It is not too much to say that this lecture has been the means of saving many lives. It answers questions everybody is asking. It is in simplicity itself—a child can understand.

To attend such a lecture is a privilege. We heartily commend it to our readers.

All women are not as other women think they are. A hypochondriac is a person who is suffering from enlargement of the imagination.

Hamilton

Jan. Dr. W. H. Hamilton is visiting friends in this locality. Wm. Dr. W. H. Hamilton is visiting friends in this locality. Wm. Dr. W. H. Hamilton is visiting friends in this locality.

Nanticoke

Miss E. Bryant and Messrs. C. and L. Brewer, returned from a visit to Toronto last Tuesday. C. Brewer has hired to E. Slater, Brantford, for one year. E. Forrist of Toronto, is visiting friends in the neighborhood. Mr. and Mrs. Alice Grant, are now settled in their new home. The A. Y. P. A. intend holding a concert in the hall, on or about Nov. 25th. Mr. and Mrs. S. Field spent Sunday at the home of Mr. and Mrs. H. Saunders. The Post Office has been transferred to C. Ross. The Women's Auxiliary met at the Rectory, on Wednesday afternoon, when the report of the Caledonia Convention, was read by Mrs. R. J. Evans.

Renton

Lots of wet weather these days it makes the plowing go better and the fall wheat grow. Mrs. John Rowntree from Nelles Corners spent Thanksgiving with her son on the Rolling Valley Farm. Mr. and Mrs. E. Austin of Tyrrell spent Sunday with Mr. and Mrs. R. Yeager. Daniel Kinders of Nanticoke is drilling a new well for J. J. McCawell. Mrs. Hagan and daughter of Hamilton and Mrs. Geo. Andrews from Wiggins School spent one day last week with Mr. and Mrs. R. Yeager. Mr. and Mrs. A. J. Wilkie spent one evening last week with Mr. N. J. Campbell.

Springvale

R. Walker and wife of Villa Nova and Miss Hodgins of DeCewville spent Sunday with S. W. Winger. Mrs. John Teal is seriously ill from heart trouble. Raymond McKee who returned to St. Joseph's Hospital is not improving as was hoped for. Sim Bann and wife of Grimsby spent a few days with A. S. Benn. E. McKee made a business trip to Jarvis on Saturday. Herb Bates met with a painful accident by being hit in the eye with a stick. Owing to Quarterly service in Hagersville next Sunday afternoon service is withdrawn here. There will be service in the evening at seven instead. Billy Hopkins of Gull Lake, Sask., is spending a couple of months with his grand father, R. Elmore. Lew Green is placing the steel on the site preparatory to the erection of a steel barn. Apple picking is progressing very slowly owing to unfavorable weather. If a man is square it is easy to put up with his sharp corners.

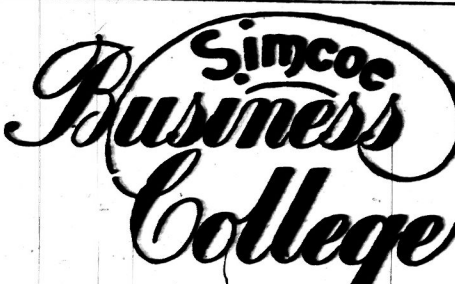

BANK OF HAMILTON

The Small Depositor

SMALL depositors in this bank are given the same courteous treatment and thorough consideration that are given customers with large accounts. The aim of this institution is to encourage systematic saving. Many a fortune began with a single dollar, which furnishes evidence that the amount of the first deposit is not as important as the fact that it is a beginning. Every six months the highest current interest will be credited to your account.
