Dear Sirs:-

SANOL not only cured me, but it put new life in me and no one but a person who has suffered with their Kidneys, like I have, could appreciate what it is to take a medicine that is a cure after years of torture.

I will be pleased to answer enquiries from anyone who writes me.

> Yours gratefully. G. DENBIG.

& Lansdowne Ave., Winnipeg. SANOL, not only cures Gall Stones, Kidney Stones, or Gravel, but will strengthen the Kidneys and build up the system as the above letter shows. Price

Hard work will not spoil the hands if this simple rule is followed: After washing, rinse the hands in clear water air at 3,000 feet, scientists say, that and rub them over with a piece of lemon, ringe again and rub over with giveer. ine and rose water.

CHILDHOOD AILMENTS

Ailments such as constipation, colic. vomiting, etc., seize children of all ages and the mother should be on her guard against these troubles by keeping a box of Baby's Own Tablets in the house. If any of these troubles come on suddenly the Tablets will cure them, or if the little one is given an occasional dose of the Tablets he will escape these troubles. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

ARE YOU TOO STOUT?

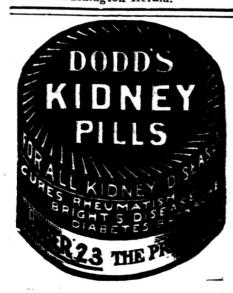

Here's the Latest Cure for Your Trouble.

The latest remedy for obesity has been set forth by Dr. Galish, a German physician. He claims one of the main causes for an increase of weight is the late dinner hour. Food taken in the evening and then followed by the repose of the night is the best thing in the world for the forming of adipose tissue, and those who lament their increasing weight should stop that particular form of pleasure the first thing.

His treatment in a dietary is as follows: In the morning the patient must take a cup of tea with buttered toast, and if he is too hungry to wait for luncheon he may take an egg and some bread and butter at 10 o'clock. At 1 o'clock the meal consists of meat, vegetables, salad and a little compote. In the afternoon some coffee with a little white bread and butter. And in the evening there is only a small piece of bread and butter.

For the first two or three days the patient will feel extremely hungry in the evening, but this soon passes off and he gets into the habit of eating more at the first two meals, this being counteracted by exercise in the afterneon. It is claimed for Dr. Galish that his patients lose one or two pounds a week.

"A man may adore every hair on his wife's head." "Well?" "But he regards those on her dresser with mixed emotions."-Washington Herald.

Picturesque.

(By Maybelle Mortimer.) The autumn styles are exceedingly picturesque, but they do not show many startling changes from the summer modes.

Gowns are caught up either in front or back so that they will accentuate the so-called natural figure which is flat in the back and slightly rounded from below the bust to knees in front.

All the velvety pile clothes will be worn much and the wool velvets are they are as velvety as the "skin of a

Tailored gowns will be worn more

Black promises to be the most popular of all colors for tailored frocks with brown and dark blue coming next. Young women will wear plaids but they must be worn with great discretion to give a chic effect.

Fur will be worn more than ever: evening gowns as well as street dresses being profusely trimmed with it. All kinds of fur will be used and as the higher grades are so expensive as to be almost prohibitive the cheaper grades will be very popular even with the best dressers.

Hats will be larger and turned back from the face—a rather trying fashion. I The "slash" will still remain with us. All tailored skirts will be slashed somewhere about the hem. Shoes and stockings will match the gowns and druggists, or The Catarrhozone Co. except when black is worn, then one Euffalo, N. Y. may expect to see fancy hose with black low shoes.

Fancy waistcoats will be worn much with dark coats and skirt and belts. Sashes will be seen on almost all

MOUNTAIN AIR.

British Invention Supplies Its Effects to Invalids.

Get your mountains by machinery! That is, if you cannot travel hurdreds of miles to get them and their wonderful effects, for it is not the quality of benefits people with lung troubles, but the quantity, the rareness of the atmosphere requiring strenuous effort on the part of the lungs to keep the system supplied, and the exercise involved strengthening them just as boxing blind or protruding piles, send me your

makes for big biceps.

The English device in question consists essentially of two parts-a closed recervoir through which the individual breathes, inhaling against the weight of this home treatment free for trial, with four to six inches of water, and a vacuum or suction equivalent to twenty to twenty-five inches of mercury, into which the individual exhales. A suction | manent cure assured. Send no money, mask for fitting over the nose and but tell others of this offer. Write tomouth connects by rubber tubes with the vacuum and the water.

Until one has attempted to derive his sor, Ont. air supply from this apparatus he is unable to appreciate how simple an affair is the natural manner of air getting. In the first place, it is extremely easy to fill the lungs with air when no obstacle intervenes, but when one must pull against six inches of water the breathing is truly labored. Exhaling by machinery is no less complicated, though a great deal easier, for one breathes into half-inch tubes having a vacuum pull equal to twenty to twenty-five inches of mercury, which insures rapid and complete emptying of the lungs.

For people with small lung capacity, equally with cases having weak lungs, the device is said to be invaluable, for its continued use in doses of fifteen to twenty minutes twice a day increases to a remarkable degree the capacity of these organs. It also is of great value for persons whose work keeps them bent over a desk all day, serving to correct the evil effects upon the lungs of sedentary labor.

Minard's Liniment Cures Dandruff.

What Hands Are Made For.

> Yours truly. DR. JOS. AUG. SIROIS,

BLAMING THE GIRLS.

(Montreal Telegraph) We believe that the present day young women are as much to blame as the men. There is no blinking the fact we are in an age of revolt against domesticity on the part of our women. The majority of our girls refuse to take an interest in household work. They scorn economy and the quiet life. They want a "position" in the city. They have expensive tastes. Their beau ideal is a young man with plenty of money, an automobile, and a never-ending capacity of giving them "a good time." The average young man is unable to fill this roll, and rather than attempt to do so he remains a bachelor. in fustice to the girls, however, it must be said that young men have the same tastes and tendencies, and prefer to be Inxurious and extravagant on what will suffice for one, rather than be force to economy by dividing it between two.

MUST EDUCATE EUGENICALLY.

(Buffalo Express) Not everything that is done in the name of eugenics is eugenical. Some of the new laws are travesties on eugenic principles. Doubtless the young people of Pittsburg are going elsewhere to be married. That is always the effect of any increase stringency in licensing requirements. Education must precede quirements. Education must precede popular acquiescence in such statutes. There should be no haste in adopting the new system and when it comes it should be adopted by all the states, so that persons who would be refused a license at home may not go elsewhere and be married, as occurs under our beautiful lack of divorce system.

The Doctor's Guess.

They were speaking of the doctor's diagnosis, and the remarkable causes sometimes held responsible for certain ils, the other day, when Congressman Dudley Doollitle of Kan-s broadly smil-ed. He said he was reminded of a cer-

tain case in his home state.

Some time ago, according to the story told by the senator, a member of a brass band that was playing at a summer re-sort, suffered with a sore throat and consulted the local physician. Just as soon as the patient mentioned that he played in a brass band an enlightened look swept over the features of the doctor. Giving the patient some medicine, he told him that he must have absolute rest for one week, and at the end of that time to call again.

A week later the musician appeared at the office of the doctor and announced that he was quite well.

"Good!" gleefully exclaimed the doctor.
"I thought if you refrained from playing the cornet for a week your throat would the cornet for a week your throat would come all right."
"But doctor," interposed th wondering patient, "I don't play the cornet."
"Well, the horn then," smilled the satisfied doctor. "It's just the same."
"Neither do I play a horn, doctor," was

the startling rejoinder of the nusician. "I play the kettledrum." —Philadelphia Minard's Liniment for sale everywhere

NOT STARVING YET. (Philadelphia Record) An English scientist has raised the old cry that population is outstripping the production of food, and that in the not distant future, perhaps before the end of

the century, posterity will be hard push ed to secure wheat enough for its daily bread. Why worry so much about posbread. Why worry so much about pos-terity? Does not the Englishman know that the Canadian Northwest, which is not yet producing 200,000,000 bushels of wheat a year, can, when more fully developed, easily grow five times that amount? Then there is Siberia, whose possibilities are enormous, not to speak of Australia and other countries whose resources have hardly been scratched With better agricultural methods the Un-With better agricultural methods the Unnited States could produce vastly more when than it does. Every generation has its own problems, it must solve for itself, and the present seems to have more than its fair share. Let the people of the twenty-first century tackle thier own troubles when they arise.

Presence of Mind.

An Englishman in travelling through Cevlon was the guest of a dockyard official at Trincomalee.

"The dinner was excellent," he says. "but when it was about half over I was startled by hearing the wife of my host tell the native servant to place a bowl of milk on a deer skin near her chair.

"Althouh she spoke as calmly as if giving an ordinary order, I knew at one there was a snake somewhere in room, for they prefer milk to an meant certain death, we all statues; but, for all that, my eyes were inspecting every nook and corner, with a peep under the table. However, it was not until the milk was placed on the deer-skin that the snake appeared. And then to our amazement a large cobra uncoiled itself from my hostess' ankle and glided toward the bowl, when, of

course, it was immediately killed. "But, just fancy the nerve of the woman, though she fainted when the thing lay dead on the floor. How many could have remained motionless in such circumstances?"

Cheese Aged by Electricity.

A Dutch electrician in Rotterdam has nit upon a unique way of aging cheese. If you are going to have a party, for instance, and you do want some nice old cheese, go right and make it fresh.

and then apply electricity. It seems that if currents are passed through a fresh cheese for twenty-four hours, that cheese at the end of the time is "just as good as old."

Later on much is expected from this in the way of being able, through electricity, to give any cheese any age or any taste that is desired.
