CARE FOR YOUR HAIR

By Frequent Shampoos with Cuticura Soap. Trial Free.

Precede shampeos by touches of Cutions Ointment it needed to spots of dandruff, itching and irritation of the scalp. Nothing better for the complexion, hair, ands or skin than these fragant super greamy emollients. Also as substi for expensive toilet preparations.

Sample Each Free by Mail With 32-p. Skin Book. Address post wird, Cuticura, Dept. L., Boston, U.S.A., Sold throughout the world.

CARDINAL FACTS

This is Canada's war.

What will the harvest be?

Increase of knowledge means increase of production.

The first essential for the highest Field is good seed.

Not only grain growers, but breeders and all producers are making history at this juncture.

Value of the crop is increased treated for smut prevention.

Failure to secure suitable varieties is a frequent cause of poor ensilage. All grain intended for seed should be cleaned and graded, in order to re-

tain only the strong kernels. Farmers who have separate houses for their laborers have no difficulty in securing help.

Good labor is worthy employment in winter as well as in spring, summer and autumn.

If labor is scarce now, it will not be more plentiful in another year, so it is wise to encourage present help. A bureau of employment could find

useful work in every town of size. Austria has decreed that every acre must be utilized for production. Wasting land is the worst form of extra-

Live stock is the foundation of permanently successful farming to-day, as it has always been. The farmer who conserves his best

stock for breeding will profit greatly in the future. When manure is piled and allowed

to heat, the vitality of most of the seeds is destroyed; but when drawn to the field from the stable, or not left long enough in the pile to become well rotted, manure is one of the most imortant means of seed dispersal Canada is many times larger in

area than Belgium, but in population there is not a great deal of difference, that is, considering Belgium before the wear. Britain is the protector of small states. The greater the area and variety of area, the more protection is needed when emergency arises.

AN EXCELLENT REMEDY FOR LITTLE ONES

Mrs. Sidney Dalby, Audley, Ont., writes: "I have used Baby's Own Tablets for the past twelve months and have found them an excellent medicine for my little girl." Thousands of other mothers say the same thing-once a mother has used the Tablets she would use nothing else. They are pleasant to take; the result is sure, and above all they are guarasteed by a government analyst to be absolutely free from injurious drugs. The Tablets are sold be medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Shoes in Olden Days.

Early Britons wore shoes of raw cowhide, with their hairy surface outward. The Anglo-Saxons showed an advance, for they were black and laced by a leather thong. Then came what might almost be termed the bag shoe of the Merovingian period, tied around the ankle, a similar easy sort of covering obtaining in Germany, and so by gradual stages from the mediaeval shoes to the poulaine shoes. a queer early German specimen, the band round the ankle being of engraved brass.-London Spectator.

Minard's Liniment Relieves Neuralgia THE OLD MAID.

(Buffalo News) Married people—and what ungenerous spirit ever prompted it?—long ago fashioned a legend about celibates that pictures them chochety, graceless, ugly and selfish. Little boys and little girls—yes, and grown-up jesters—fashioned and silly story to the ones least able to defend themselves.

and ship story to the ones least able to defend themselves, the unmarried women of middle age or more.

Now the little boys have grown to be bigger boys, with work to do, with moments to pause along the way and stawhile with the recollection of other

days.

The light of hallowed memory shines meat kindly around a shawled figure in the garden path. A face softened rather than embittered, by sweet melancholy; and similing through solitude to sacred for the world to share—a creature altogether lovely, giving her spacious heart to the roses and the children of her Avenue.

dreams.

The boy loved her-loves her still-because she saw with his eyes, yet with larger eyes than his. In his boyish-pranks be found a staunch and faithful ally-first a defender, then a good comrade who smuggled bread and jam upstairs to the supperless. Now she stands apart in memory as the friend of his individuality.

Most men who have reached high places have some such mentor to thank. One of the tragedies of life is that man may never know just how much he has been helped by her blessed memory, her prayers and her hopes. And for no reward sther, then grateful remembrance. ndividuality. Most men who have reached high places

Facts for Heaith Seekers

Nearly every disease can be traced to clogged or inactive stomachs, livers or intestines. Indigestion, biliousness, headaches and insomnia all emanate from this cause. Keep these organs in working order and you'll have continuous good health. No case was ever treated with Dr. Hamilton's Pills and not cured; their record is one of marvellous success. Dr. Hamilton's Pills are very mild, yet they cleanse the bowels promptly and establish healthy regularity. You'll eat plenty, digest well, sleep soundly, feel like new after using Dr. Hamilton's Pills-one a dose -25c. a box everywhere. Be sure you get the genuine Dr. Hamilton's Pills, in a yellow box always.

AGRICULTURAL BULLETINS.

So great has been the demand for bulletins, pamphlets, records and reports upon the publications branch of the Department of Agriculture at Ottawa as a result of the Patriotism and Production Movement, that it has been found impossible to comply with all the applications as promptly as could be desired. Of some of the bulletins the supply has been exhausted and no time has been afforded for reprinting, while of others the quantity asked for individually has been such that instant compliance would mean many applications might have to go without. This nas meant extra correspondence and consequent delay. The situation is, of course, satisfactory as indicating the success of the campaign, and the widespread interest created, but the inability to respond on the instant with the multitude of applications is greatly regretted. At the same time demand could have been foreseen. As fast as possible the requests will be attended to, but in the meantime there will have to be reprinting and in cases revising. In such circumstances patience appears to be a desirable and necessary quality.

Minard's Liniment Cures Burns, etc.

WAR-TIME AND TANGO. (Philadelphia Record)

The impending inhibition of the tango The impending inhibition of the tango in Paris is probably a part of the increasing seriousness of the people in the presence of an appalling war. It is impossible that a whole nation should go into mourning, or that it should wholly shandon its recreations. But there are considerations of propriety, and the tango may well be looked upon as an unsuitable recreation under present conditions. recreation under present conditions. nation struggling for its existence, and in which almost every family has been bereaved, may very well proscribe the wilder manifestations of mirth and the wilder manifestations of mirth and the gross forms of distination.

Matches may be made in heaven, but there are lots of match-making mammas here, too.

Danger Signals Warn You of Approaching Paralysis

Slowly and Surely Exhaustion Goes on Until Collapse of the Nerves is the Natural Result.

You may be restless, nervous, irri- lic. This has been proven in many table and sleepless, but you think there is nothing to be alarmed at. You have no appetite, digestion is impair.

ed, and there is weakness and irregularity of other bodily organs. You feel tired in body and mind, and find that you lack the energy to attend to the daily task. You may not roalize that these

are the symptoms of nervous prostration and the danger signals which MRS. ALLAN. warn you that some form of paralysis is the next step of development.

Dr. Chase's Nerve Food is the most successful restorative for the nerves that has ever been offered to the pub- ronto.

described in this letter.

Mrs. Thos. Allan, R.F.D., 2. Sombra

Ont., writes:- "Five years ago I suffered a complete breakdown, and frequently had palpitation of the heart. Since that illness I have had dizze spells, had no power over my limbs (locomotor ataxia) and could not walk straight. At night I would have severe nervous spells, with heart palpitation, and would shake as though had the ague. I felt improvement after using the first box of Dr. Chase's Nerve Food, and after continuing the treatment can now walk, eat and sleep weil, have no nervous spells and do not require heart medicine. I have told several of my neighbors of the splendid results obtained from the use of Dr. Chase's Nerve Food." Dr. Chase's Nerve Food, 50 cents a box, 6 for \$2.50, all dealers, or Ed-

DEATH HOOK OF THE AIR.

erican to Destroy Dirigibles.

The horrors of the Zeppelin dirigiles seem now to have encountered an invention that will put them out of action and end their apparently irresistible bomb dropping. It is an American invention, that of Joseph A. Steinmetz, president of he Aero Club of Philadelphia. It is a destroyer of aircraft, said to be farther reaching than any bomb dropping device or aerial gun invented. It bears the same relation that the torpedo destroyer does to a navy.

An aeroplane cannot carry the fully with soap and water, seeing to amount of explosive that a dirigible it that not a drop runs inside, or dip | can, but it is faster and the Steinmetz a piece of soft silk in paraffin oil and device is to destroy dirigibles as well is a bomb with contact devices, hooks springing out on all sides.

It is let down by a slender wire from the aeroplane, which swiftly mounts above the slower dirigible. When the latter comes in contact with the wire this draws up until the hooks of the bombs, like the tentacles of a spider, become attached, and the explosion follows. The apparatus is simple and is characterized as one of the most terrible of death dealing devices.

NO SQUEALER. (Detroit Free Press)

Johnson may have lived like a dog. but he died like a man. His most bitter hater, white or black, can do him that honor. There have been champions of

honor. There have been champions of the Caucasian race who say their laurels stripped from them with less commendable bearing.

And he took his defeat man-fashion. Excuse, no plea that he was drugged. "I was beaten by a better man," was his only comment. It is the fitting farewell of a champion to his honors. champion to his honors.

BETTER THAN SPANKING

wetting. There is a constitutional cause for this trouble, Mrs. M. Summers, Box. W. 8. Windson, Ont. will apply the contract of the con ment, with full instructions. Send no money but write her to-day if your children trouble you in this wny. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Safest of Vaults.

The bank vault in the new office of J. P. Morgan, at Broad and Wall streets, New York, is the largest in as much as an equal volume of ordinthe world, and, it is sought, the most ary air. When air is liquefied it secure. It represents an expenditure of \$200,000, and the door alone, which was made of Harveyized armor steel, cost \$75,000. The vestibule of the door is 11 feet 6 inches in diameter, and the door itself 9 feet in diameter, with it is impossible that the size of the a thickness of 45½ inches. It is controlled by two 5-inch bolts, which in turn are controlled by two combination locks, and these by a time lock. The door swings on a crane hinge with heavy-pressure mechanisms to force it to its seat and to make the joint tight. This prevents the introduction of any explosive of a liquid nature. The plates are made of the full thickness, and are not held together by screws or bolts, but are dovetailed on the inner edges. After being fitted tightly together wedges are driven on the inside to hold the plates solidly to their place. The door and vestibule attached to it weign 120 tons. Despite its enormous size, the door has been so accurately constructed that when closed it will make an air-tight and water-tight joint. Minard's Liniment Cures Dandruff.

Metals at Absolute Zero. Prof. Dien has recently published some interesting observations on the behaviour of metals at the absolute zero of temperature. The infinite electrical conductivity of metals at absolute zero, which has been rendered very probable by the work of Kamerlingh Onnes, is explained if we assume that the distribution of molecules at the lowest temperature is perfectly regular, so that the displacement of electrons along certain lines encounters no resistance. By increasing the temperature the molecules are set in a state of thermal agitation and the free path of the electrons is reduced; whence the electric conductivity is reduced also. It appears probable that temperature evaporation affects only the mean free path and not the number of electrons nor their mean velo-

WEIGHT OF AIR.

One Cubic Foot of Atmosphere Weighs More Than an Ounce.

The common belief that air weighs nothing or almost nothing, a belief which has given rise to the simile, 'light as air." needs correction. A toy balloon filled with a cubic

foot of air weighs 564 grains more than the same balloon collapsed. This shows that the weight of a cubic foot of air is 564 grains, which is a good W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no taining 2,250 cubic feet of air would weigh 2,900 ounces, or 183.7 pounds avoirdupois, as much as a large man. Could you lift a room full of air?

The air in an automobile tire under pressure of 150 pounds a square inch weight proportionately ten times as much, while air under the pressure of fifty atmospheres weighs fifty times volume is reduced to one sixteen-hundredth normal, so that the liquid is .600 times as heavy as gaseous air, or about as heavy as water.—St. Louis Post Dispatch.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required, and have never failed to get the desired effect.

C. A. KING, M. D.

Why We Oppose Pockets for Women.

1. Because pockets are not a natural right. 2. Because the great majority of wo-

men did not want pockets. If they did, they would have them. 3. Because whenever women have had pockets they have not used them.

4: Because women are expected to carry enough things as it is, without the additional burden of pockets. 5. Because it would make dissension between husband and wife as to whose pockets were to be filled. 6. Because it would destroy man's

pockets. 7. Because men are men and women are women. We must not fly in the face of nature.

chivalry toward woman if he did not

have to carry all her things in his

8. Because pockets have been used by men to carry tobacco, pipes, whiskey flasks, chewing-gum and compromising letters. We see no reason to suppose that women would use them more wisely.—New York Tribune. Minard's Liniment for sale

THE JITNEY BUS

Live Subject Treated by a Die

San Francisco paper printed this utiful and touching poem:
It was raining. And it was late. And a jitney bus. Came along. And I got in And some more got in And it was full.
But they went right on Picking 'em up Till there were four On the running boards. On the running boards, And a tall man And a tail man.
with whiskers
on my side
Put his head in.
And the rain
Dripped from his beard.
Into my lap,
And he said: And he said:
"I've been going about.
For years.
In crowded cars.
And I'm thankful.
To the man.
Who started.
These jitney buses.
And just then
We stopped.
In a hurry.
And he did a pivot.
On the running board. On the running board And very nearly Tore his head off In the framework On the top, And we started again And he said: there ought to be a law make a street Car company Give everybody And he put his head in And dripped water All over me Again
And said:
"Would you mind
Reaching out
And taking hold
Of the sleeve Of my coat? I can't hold on Any longer."
And I did.
And we got off

EFFERVESCENT DRINKS.

At the same corner And he kept me standing

In the rain
While he roasted the

Street-ear company.

They Allay Thirst Quickly, but the Effect is Not Lasting.

The reason why we like effervescent drinks is that the slightest stinging or pricking of the palate that follows on drinking liquids charged with carbonic acid gas produces immediately an increased flow of saliva and thus diminishes for the moment the sensation of thirst.

But the relief they bring is only temporary and is followed by a reaction in which the thirst is actually increased. The salivary glands are not more susceptible to respetual stimulation than any other, and after each period of excitement one of depression supervenes. Young soldiers en route marches quickly come maerstand this and to discover that the more water they drink the more thirsty they get and that it is best, therefore. to limit the quantity of liquil swallowed. Moreover, the saliva contains matters of great importance for the digestion of feed particularly of starchy foods, and if it all be washed down the throat into the bowels as soon as it is secreted a great part of its vsefulness is loct.

It would therefore seem that a less wasteful way, physiologically, of promoting the flow of saliva might be adorted with porfit. The consumption of fruit containing subacid juices is about the most excellent way.-St. Louis Post Dispatch.

DON'T WASTE TIME.

Many Men Have Accomplished

Wonders in Their Spare Moments. Great men are economical in their use of time. They not only work hard for hours together, but they also save the spare minutes which most persons waste in profitiess employment.

As the distinguished naturalist Cuvier rone from places to place he read and thought, and the results of his saving these oda quarter nours "Poetry for Poetry's Sake" is the are seen in his books. Napoleon, as he hurried over Eu-

> Elihu Burritt learned no less than by the economical use of

> a day at his trade of a blacksmith

he found a few minutes each morning

and evening to study Latin or French. His Greek grammar would fit into the crown of his straw hat, and as he stood at his furnace, waiting for the fusing of the metal, he would catch it up and commit to memory a

part of a Greek verb. Sir William Jones, the Oriental scholar and a judge in the suprema court of India, had so well insproved his time that before he reached the age of twenty one he knew Greek. Latin, several modern languages and had studied the Arabic and the Persian. His use of the spare minutes made him both learned and farious. John Wesley said: "Never be unemployed; never be triflingly employ-

ed; never while away time." So Goethe, the great German peet and thinker, said: "Do not wait for extraordinary op-portunities, but make use of common

situations. Be careful of the minutes, and the hours will take care of themselves.

Odd Effects of Hydrochloric Acid

Some very singular and unexplainfirst. As Miss Lowell's reviewer (and ed effects of hydrochloric acid upon silica are brought out in M.
