Would Burn. Suffered Great Pain. Grandchild Also Afflicted. Used Cuticura. Now Perfectly Well.

Poulamon, N. S.—"I had eczema on my sight wrist for over a year. It broke out like a rash. It would itch and burn and I had to scratch. The skin was broken and the blood came through. Sometimes is spread all over my hands and I suffered great pain when I put them in water. I legan to use Cuticura Soap and Ointment and they gave me quick relief, healing my

went and hand in a few months.

"My grandchild was also afflicted with that trouble. He had it on his head, face and hands. We began to treat him with Cuticura Soap and Ointment and he began to improve. So we continued the treatment for a few months and he is perfectly well." (Signed) Mrs. Joseph Fougere, May 28, '14. Sample Each Free by Mail

With 32-p. Skin Book on request. Address post-card "Cutieurs, Dept. D. Beaston, U. S. A." Sold throughout the world.

A Pretty Experiment.

How quickly the body eliminates waste matter may be seen by the following simple and pretty experiment: Eat a tablet of lithium citrate. Then take a clean platinum wire, hold it in a colorless flame of a Bunsen burner and note that it gives no coloration to the flame. Now cool the wire and pass it along the skin of the forehead, or after rinsing the hand in distilled water draw the wire across the paim and again hold it to the colorless Bunsen flame. Note the beautiful yellow color, due to the presence of the sodium. Next take blue glass and observe the yellow flame through this. The cobait glass absorbs the yellow sodium rays, and the lilac flame of potassium now shows. About a half hour after taking the lithia tablet make the same test as above with a clean platinum wire. The vivid red flame of lithium is now obtained. In one short half hour the lithium entering at the mouth has been absorbed into the blood and carried to all parts of the body and is being excreted through the skin.-New York World.

Differences in Fuel.

Fuel commences to burn when it has reached what is called the ignitation soint which varies greatly with the different kinds of fuel. Coal gas does not burn below a red-heat of iron, and carbon, such as charcoal, has a still higher igniting point. A piece of iron heated dim red will ont ignite a gas jet, but if the iron is heated till is approaches orange color it will lit the gas. The igniting temperature of coal burned in locamotive fire boxes is about 1.500 degrees Fahrenheit. Fire box temperature is about 3.000 degrees Fahrenheit.

THE FARMERS AND THE RED CROSS SOCIETY

We publish to-day an appeal on behalf of the Red Cross Society, by Dr. James W. Robertson.

Dr. Robertson is still best known to the farmers of Canada as Professor Robertson. He began his official public service at the Ontario Agriculture College nearly thirty years ago. Twenty-five years ago he went to Ottawa as Dairy Commissioner for the Dominion. The Dairying Service of the Department of Agriculture soon became known and trusted throughout Canada. From Prince Edward Island to Alberta, farmers profited by the Illustration Dairy Stations and the Travelling Instructors. The output of cheese and butter in Canada added to the reputation of its rural workers. and growing value were inaugurated, while Professor Robertson was commissioner of Agriculture. Among them were the Live Stock Branch, the Cold Storage Service, the Seed Grain Competitions, Trial Shipments of Fruit to the United Kingdom, and Extensions of Markets. Besides there were the Manual

training Movement, the School Gardens, Household Science, and the Consolidated Rural Schools.

In more recent years, Dr. Robertson was chairman of the Royal Commission on Industrial Training and Technical Education. Farmers in all provinces are familiar with the Survey of Farms by the Commission of Conservation and the Illustration Farms of its Committee on Lands, of which he is chairman.

In these and many other ways, Dr. Robertson has given the farmers of Canada the best that was in him. He says he is their debtor, for many opportunities, for much kindness and for warm appreciations. But they are his debtors too. And he now reminds them of that for the first time in order to establish his right and privilege to appeal to them for this worthy

Minard's Liniment Cures Dandruff.

His Last Look.

A church in the north of Scotland requiring a pastor had a beadle who took an active interest in all that concerned the church. One of the candidates after the last service for the day was over stepped into the vestry to put off his gown. He thought he would have a look at the church and, meeting the worthy beadle putting things to rights, said:

"I was just taking a look at the "Aye, tak' a guid look at it," mid the headle, "for it's no likely ye'll ever

The Hanselteeper

Fine ginghams and percales will emerge from the tub with gloss and dressing of new material if dipped in sweet milk instead of starch.

Roast turkey lest from dinner makes delicious salad, mixed with celery seasoned with capers and dressed with mayonnaise The usual directions call for equal parts of meat and celery, but there is no hard and fast rule. The amount of the meat on hand and the taste of the family are strong considerations.

The meat from roast fowl of any kind makes a delicious souffle. An old rule calls for two cupfuls of meat chopped fine, a cupful of bread crumbs, a cupful of white sauce beaten creamy and added to the mixture and the whites beaten stiff, folded in at the last minute. Bake about 15 or 20 minutes and send directly from the oven to the table.

To polish kitchen knives nicely, mix a little bicarbonate of soda with the brick dust, and rub them thoroughly. When a roast is small it is best to start it on top of the stove. Heat the pan very hot, put the roast in and turn it frequently. The quick searing holds

the juices. Heat your plates before putting hot pies on them when first taken from the oven, says an exchange. The hot pies on cold plates cause a sweat that makes soggy under crust.

If when preparing carrots they are boiled briskly five minutes then put under the faucet and cold water run on them a minute, the skins will slip off as do those of boiled beets. Then they can be cooked in the usual way. This does away with the task of scraping them.

In Tropical Countries Liver Chill Very Common

In northern latitudes also the liver is a very unruly organ and requires careful watching. The concentrated vegetables juices in Dr. Hamilton's Pills act directly upon the liver and stimulate its action to a normal basis. The blood is purified, the skin grows clear, headaches disappear and robust health is firmly established. No medicine for the stomach, liver or kidneys can compare with Dr. Hamilton's Pills, 25c. box at all dealers.

THE FARMERS

Our country, with its allies, is waging a great war for justice, for the protection of small nations in the employment of their rights, for continued and growing freedom, and for the ance of its pledged word of honor. Much destruction and desolation are being caused. Lives are being lost by the thousand. Canada's first contingent is now in the thick of it. Some will fall sick; many will be wounded; some will pay the last full measure of devotion to their

country and its cause. The Red Cross Society exists to succor the sick and wounded in war. It needs more money to provide more beds and hospitals in Great Britain and France; it needs more money to pay more Red Cross nurses; it needs more money, and more things made by women, to supply to Clearing Hospitals; Pase Hospitals and Recovering

fospitals.
I appeal to farmers to send me sums from \$1 to \$50, during the first week in May. Every \$50 provides one additional hospital bed with the giver's name over it. By sending me about \$10,000, you would serve your country well, bring credit to yourselves, and make us all very proud of you. For the sake of the wounded boys, make the gift substantial. It will be an investment towards the recovery of Other public services of continuing some Canadian soldier who stood in our stead that our cause might be up-

> Faithfully your friend, James W. Robertson, Chairman, Red Cross Society at Ottawa.

Safety Lights.

The use of matches and candles. etc., by repair men in making alterations or repairs in buildings is a dangerous practice. Numerous fires have been started by their use, and one of the most serious of recent fire losses is charged to the use of a candle to supply light while changing a gas meter. The gas pipe was broken, the gas caught fire from the lighted candle, and caused a loss to property of over \$150,000. For work of the above nature, the use of the storage battery electric lamp is strongly advocated. It is portable, the light is ample, and it is safe even amidst dangerous gases. Minard's Liniment Cures Burns, etc.

SEMMER'S COMING!

(Detroit Free Press) Pretty soon now the picnic baskets will be brought down from the attic. and the streets will be filled with happyfaced throngs intent on getting away for

faced throngs intent on getting away for the day to inviting spots where the dreary cares of city routine are forgotten and nobody gives a hang for the petty things that have perforce filled the mind for the last six months.

The weather man doesn't know it yet but spring is with us and summer is just around the corner. Even the skies cannot forever be clouded. Sooner or later these bone-searching winds must give way to balmy air and invigorating sunshine and we'll all be happy.

Summer is the only season of true foy. Winter is a make-believe, a time for deluding one's self into thinking one is alive while one is really but hibernating. Wake up; summer's coming.

The art of war has been robbed by the aeroplane of the element of surprise which afforded Napoleon dramatic opportunity for the display of his genius. His object was to discover the weak spot in the enemy's lines and, having discovered it, to hurl upon it all the forces at his command. His success depended upon the speed and sureness with which the great blow could be struck. A premature revelation would have spoiled all. But a coup of the sort is no longer possible, for a manoeuvre on the one side is met instantly by a manoeuvre on the other. War now consists of a series of parallel movements; its art has changed. It would be scarcely an exaggeration to say that it does not exist. The two armies turn about each other like boxers in the preliminary phases of a fight. They pivot clumsily to catch each other at a disadvantage, and that is practically all the art of it.-London

Uses of Silver.

The largest single use for silver, outside of the manufacture of silver plated war, is estimated to be in the manufacure of photographic plates, films and paper. The manufacture of films for moving picture use has now become an enormous business, and it is cents a box from The Dr. Williams' land. bring the largest consumption of silver. The silver is used in photography for making the light sensitive emulsion and is principally the bromide of silver.

Minard's Liniment Relieves Neuralgia

Chrysanthemums of Japan.

Although the chrysanthemum has reached its highest form of development in Japan, and is still reverenced as the imperial emblem, it was taken to Japan from China, where it has been brought to its highest state of cultivation. At the imperial chrysanthemum party given by His Majesty the Emperor of Japan in November every year one sees the most marvelous blossoms known to the floriculturist. The number of blossoms from one root is amazing. In one case no less than 700 flowers were seen growing from one plant. The festival of the chrysanthemum dates back to the Heian era, when the great ones of the empire used to call at the imperial palace and drink to the health of the imperial house from sake cups in which floated petals of the beautiful flowers.

An Unknown Hero.

A group of patriotic and very enthusiastic boys was assembled around a hoarding outside a well-known London hospital. A passer-by was asked by one of them, "Please, sir, can you tell us which general it is who is in this hospital."

GEOGRAPHICAL PUZZLES.

Where Were Ultima Thule and the Lost Atlantis Located?

A most puzzling geographical mystery has come down from ancient times. This is the old question as to promptly cure constipation, indiges- the identity of Ultima Thule. It was about 400 B. C., that Pytheas, a citizen of Massila, sailed on his famous voyage. He discovered Albion and then continued farther north until he reached a spot which he named Ultima Thule. What this country was has never been determined. It may have been Shetland, Norway or Ice-

Another ancient puzzle is that of Atlantis. It is commonly believed nowadays that this vanished continent did once actually lie beyond the pillars of Hercules, and there are theories unending concerning it. Some regard the Canary Islands as fragmentary remains of it, others think that flight. The solitary evidence that Atlantis ever existed is his reference to it.—Chicago Herald.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnaturel enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day, Address: Mrs. M. Summers, Box \$, Windsor Ont.

When Iron Doesn't Rust.

Iron which is actually in service in buildings and similar structures, it is found, often behaves in a rather unexpected manner as regards its tendency toward corrosion, writes L. C. Wilson in the Engineering Magazine! Those parts immersed in a few inches of water may corrode with great rapidity, while other parts placed, a considerable distance under the surface will remain in practically perfect shape almost indefinitely. Similar conditions are found in parts butter ly perfect shape almost indefinitely. Similar conditions are found in parts buried in the ground. The explanation is to be found in the fact that both water and oxygen are necessary to produce corrosion. If, therefore, iron parts are immersed in water or buried in the ground to a depth greater than that to which oxygen can penetrate, they will be preserved because the conditions for corrosian have not been attained.

A little observation will charm that

A little observation will show that "busy" iron, as it has been termed, does not rust as readily as that which is not in service. Perhaps steel rails are, the commonest example of this and it is well known that little orano corrosion is seen in lines on which the traffic is fast and heavy.
