he next morning the traveling mamely, Lord Wellrose, Surv. and Mrs. Brown, with his maid, met at the railway station and in a first-class carriage.

The train was the express, and soon steamed down to the seaport upon which the eyes of the world were now fixed, for there were gathered the vast British army about to set sail for the east.

In due time the train reached Southampton.

Lord Wellrose and his party went to a hotel, where they took a handsome suit of apartments, and established the two ladies comfortably.

It was yet early in the afternoon; so after a refreshing toilet and lunch. Lord Wellrose proposed to take Ensign Douglas to the quarters of his regiment to report for duty.

They set out, and in due time reached the quarters of the colonel commanding, where Ensign Douglas was introduced, and where he formally reported.

This ceremony being over, Lord .Wellrose took his protege to the quarters of the senior surgeon and introduced him to Dr. Kinlock.

The Scotch surgeon was a man of shout forty-five years of age, prematurely bald and gray, but with an erect form, clear eyes and a resolute

countenance. He received Lord Wellrose with much deference, and welcomed the young ensign with kindness.

"Ensign-Douglas, my lord, did you May? Oh, ay, a kinsman of the fam-lly, I presume?" said the surgeon, looking from one to the other of his two visitors, and then answering his own question by adding, 'Oh, ay, certainly. The likeuess shows that, my lord. I never saw twin brothers so much alike in person as your lordship and this young gentleman.'

Lord Wellrose did not contradict Dr. Kinlock. He felt that he could not. And then and there the surgeon received an impression that he afterward transferred to all the officers of his regiment—namely, that the new ensign was a near kinsman of the Earl of Wellrose.

It was the hour of the grand parwhen the colors were presented. Lord Wellrose, who presented them "in the name of the fair donor," made a short speech, full of patriot-

Lord Wellrose and Suzy, after having taken the most affectionate leave of Benjamin and given and received pondence, returned to London.

Suzy's next business was to give up her little palace in Park Lane, and take lodgings, while waiting for the sailing of the ship that was to carry her to the Antipodes.

It was just three weeks after the sailing of the English forces for the east that Suzy took leave of Lord Wellrose and all her London friends, and, accompanied by her companion. Mrs. Brown, and her maid, Jenny Smith, embarked on board the East Indianman Wendover bound for Syd-

Lord Wellrose felt her loss severe ly, but he was not the sort of man to yield to despondency. He devoted himself to the interests of his great bill for the "Reform of Prison Disdown with you. I wish to introduce cipline and the Reclamation of Criminals," and in good works soon recovered his good spirits.

CHAPTER XXIX.

The Earl of Wellrose occupied himself with the humane cause to which he had consecrated his life. And he found in his work an antidote to that depression of spirits consequent upon his separation from his betrothed, and from his protege, whom he had grown to love with more than the love of a brother.

At length Parliament was prorogued and the London season closed. The Earl of Wellrose, released from

official duties, would have gone on a yachting excursion to the Mediterranean, but his mother, the Duchess of Cheviot, made it a point that he should join her autumn party at Seton Court, Scotland.

twentieth of August a pleasant circle was assembled in the drawing room of Cheviot House. This circle included all the individuals named for the pachting party: among them, of course, the lovely Lady Hinda Moray -the most beautiful girl in Europe, as all the clubs declared. She was, in the world; with a perfemt form and perfect features; with a stately little head adorned with a profusion of bright, soft, purple-black ringlets; with large, brilliant, tender, purpleblack eyes, arched with slender black eyebrows, and fringed with long black eyelashes and with a rich complexion

Suzy had indeed written to her lover in a very matter-of-fact, though friendly sort of way. She dated her letter: On board the ship Wendover, Atlantic Ocean." And she commenced it with "Dear Lord Wellrose." She told him all the incidents of the voyage; what sort of a man the captain was; who her fellow-passengers were; what kind of weather they had had; what ships they had spoken; what fish and water fowl they had seen; who was seasick, and who were seaworthy. But She ended her letter by a paragraph date, in which she told him that they had just spoken the French ship Revenon, homeword bound, and that they would send a boat out to her to take out letters, and bring hers.
