# A GIFT OF A SOUL

Each day Davidoff, pursuing the pressed his friend's arm with force, same course, gave Juliette an account and pointed to the last window of the of the results of the investigations he told her he was making. And each day he saw this benumbed and frozen me appear at it, come in, but not beheart slowly reawakening to life. It fore. I am going to prepare the way was a delightful spectacle to the doc- for you. I am more uneasy than I can tor to see it timidly putting forth new tell you." buds. Juliette hoped, but with fear and trembling, and at times she would stop short suddenly on the road whither her imagination would lead her. What if, after indulging in these dreams, she should have to fall back again into her former state of despair? What if the reports they had heard should prove untrue, and Pierre had not been rescued?

Her heart was tortured by these conflicting hopes and fears.' It seemed to her impossible that death should have snatched away in an instant this young man so full of life and vigor. She recalled to mind what her brother had said to her at Beaulleu: "His body has not been recovered." She had said to her at Beaulieu: had not at the time accepted these words as a ground for hope. But now was it not evident that if the sea had not cast his body back upon the shore it was because he had been saved from its treacherous waves, and that he still lived? The hope was now so deeply rooted in her heart that to tear it thence nothing less than positive proof lent. A great calm absorbed every

ventured to say to Juliette:

a few moments, and then said:

'Why do you not tell me everything? a church, a poor village church, and he glance. was painting a sacred picture. His you, and it would make us so happy to welcome you.' But a sort of mist arose between us, and I could only see him faintly, in vague outline, and I could hear distinctly the noise of the waves, like the surf beating against the rocks at Beaulieu. this mist disappeared, like a veil which is torn away, and I saw him once more clearly. He came toward, me, a smile upon his lips. He made a gesture as if to say, 'Have patience: I am coming, and then I awoke,

Resurrection; but the noise of the But Juliette pleaded with her mothwaves striking the ear of the young zirl, at the very hour in which Pierre

information. But his attitude, his words, all had announced a coming event. The doctor left the young girl in a state of agitation which he thought favorable to his plans, and how his departure. In the sweming when he stopped before him de when she must be according to the consequence was so ardently. He issued to the according the first time in so many entered with Patrizzi, offered his to mouth, so many was airlingly and that froith and that froith and love had the new the first time in so many entered with Patrizzi, offered his to sophic Viroflay, and the guests proceeded to the dining-room.

This was a magnificent apartment hung with Chinese silk, with furnities of convergence in the consequence of so much unhappiness vanishing and into the garden on the other. Three large bay-windows of stained given, representing strange flowers and fantastic birds, looked on a ter-

entresol he said:

"Remain here and keep your eyes fixed on that window. When you see

He entered the house, leaving the painter on the sidewalk below. Laurier, left thus alone, was seized by an emotion similar to that which he had experienced standing on the rocky point at Torrevecchio, the sea relling at his feet, when, after receiving Davidoff's letter, he had questioned his own heart to know if he were worthy of Juliette. A solemn emothus waited the moment to present himself to the young girl. He was grave and thoughtful with the sense that he was making an act of reparation. He had none of the impatience, the joyful peace of a convert who is about to abjure his errorts, obtain pardon for his sins, and live henceforward in peace with God and man.

He stood leaning against, the wall, his eyes fixed on the window, thinking of the scene that was taking place in the darkened apartment within. There was no sign of life; ever thing was si-"I dined yesterday with some people swore to make her forget them.

of his life in the little Corsican hamlet. Juliette already loved Agostino, Marietta, the old mother and the good cure. And the premise made by Pierre to his friends at Torrevecchio to return to see ham was mentally renewed by her in the fullness of her heart. It struck midnight before they separated.

"You will not see us to-morrow," said Davidoff to his pacient with a smile.

And as her face suiderly clouded-"We must not think of you alone, dear child," he said, gently. "We have still to perform another cure, more difficult than yours. We start for Trouville to-morrow morning to see your brother."

In an instant the momentary selfishness, which had caused her to forget everything but her own happiness, disappeared. She remembered the painful position in which she and her mother were placed, and all the clearness of her judgment at once returned to her. She pressed Davidoff's hand, and said to Pierre:

"You are right; go, both of you and do for my brother what you have done for me! If you succeed you cannot indeed make me more grateful, but you can make me more happy."

Then, taking her lover by the hand, she led him to her mother. Mme. de Vignes opened her arms to the prodigal son, and as Pierre received tion took possession of him while he her kiss, he felt that now indeed he was absolved.

### CHAPTER VII.

There was to be a grand breakfast at the house of Clemence on this day, which was the first day of the races. A number of her friends had arrived from Paris the evening before, and the actress, who had met them at the Casine, had then invited them. Among them were Prince Patrizzi, Duverney, a painter of the nude of the modern school, and a wit who still preserved the gay good-humor of his youthful days: Baron Tresorier, a stock-broker and one of the best swordsmen

A voice murmured in his ear: "It ty states fall wheat is headed and would have sufficed. For her who other within him—his love for Juliette, of Paris; Berneville a sportsman who is because wou have refused to fulfill shows a heavy crop on a large area.

Nuno, you will make yourself ill," said Sophie Viroflay. "There is nothing so dangerous as to fly into a passion before eating." At this moment the doors leading

in the distance into a violet hue. The heat and silence tended to produce a feeling of well-being, and the guests of Clemence, yielding unconsciously to the influence of the day, gave themselves up to unrestrained gayety. in the midst of the general merri-ment Jacques alone remained grave,

as if some secret remorse preyed upon his mind. Delivered for the time being from his pecuniary anxieties, his thoughts reverted to those whem he had so cruelly wronged in order to Grain in the West Looks Good On procure this last supply of money. In the midst of this gay company he was possessed by the most lugubrious ideas. He looked at the brilliant Ontario Leports Are Also Quite table laden with flowers, silver and crystal; he observed those who were seated around it, and he saw that they were careless and happy: He alone feit the pangs of remorse for an ill-spent life. None of the others their jests; and thus it was with them every day; the same unconcerned gayety, the same round of pleasure. For him, too, every day was the same, embittered by anguish which he could not subdue. His eyes were fastened on Clemence and Faucigny, who were talking together in a low voice opposite him. He could not hear their words, but he divined what they were saying. The duke in his soft and insinuating voice was paying court to the actress, and she was listening to him with a smile. Jacques' brow contracted with a look of pain. 'It is because I am growing morose that she is getting tired of me," he said to himself. He emptied one after another the glasses that stood beside his plate, and this mingling of the different wines brought a flush to his cheeks.

Suddenly he heard Patrizzi calling to him across the table.

"Tell me, Jacques," he said, "does dinner at Monte Carlo? Some of the ating fairly evenly. men and most of the women here today were present on that occasion. We were not as gay as we are now. you remember?"

AIDS IN BATTLE

Most Unique Ships Accompany Fleet, But Do Not Fight

One of the largest ships in the British navy does not fight, but it always accompanies the fleet in actual warfare. This ship is the Ark Royal and the most unique in the world. She is the last word in special units, and is at the present time located off the Dardanelles. She is a floating aeroplane factory, and carries spare propellors, wings, floats and every conceivable part of a hydroplane or seaplane. Great Britain is the first navy in the world to possess such a ship. These flying machines accompanying the fleet can be repaired and practically rebuilt right on the ground, by means of this mother chip.

Another famous ship, and which does not fight, attached to the navy, in H. M. S. Cyqclops. She is nothing more or less than a huge dockyard foundry, employing three hundred skilled mechanics, in addition to the crew necessary to sail the ship. She does not carry a gun, because every inch room is required for machinery. Every battleship has a small work shop, but it cannot do big repairs or casting, but the Cyclops can. She carries a complete foundry, where as large a casting as a battleship's propellor can be made. In the ship are huge cupolas or domes for smelting and casting, stretched away above the deck like huge mushrooms.

Over the bow of this ship hangs huge anchor, made of wood. This is a template for casting a complete anchor, should one of the warships lose one. In addition to her huge repairing plant, the Cyclops carries a vast distilling apparatus to supply fresh water to all the ships in the fleet. She is fitted up with ice-making machines and refrigeration rooms, in which fresh meat is stored for the crews of those small craft, like submarines, torpedo boats and destroyers and small cruisers, which cannot be so fitted. The Cyclops is 500 feet long, and at the time she was built was the first of her type and size in the world.

There is also another ship of the same class, called the Assistance, but she is not so large. There is still another called the Vulcan, of 7,000 tons displacement, which has ability to cruise 10,000 miles without re-coaling. This latter ship has two huge cranes, worked by hydraulic, which are large enough to lift a small vessel clean out of me water on to the deck within half a minute. These cranes are fastened to the keel of the repair ship, to prevent her tipping over when lifting a large vessel. These facts possibly throw light for the general reader upon many matters connected with the royal navy, which must have suggested chought at times.

# NERVOUS CHILDREN

### Hard Study and Too Little Exercise Leads to St. Vitus Dance.

There is much criticism of modern educational methods that require too much work of school children, allowing them too little time for play and preventing sufficient out-of-door exercise. When the study of music or any other accomplishment, with the necessary practice, is added the strain is increased. Under these conditions the blood becomes impoverished and fails to nourish the nerves. The child becomes restless, and twitching of the muscles follow. Sometimes the child stumbles in walking and drops what it tries to hold. Pallor, listlessness and irritability are symptoms that early show that the blood and nerves are failing to meet the demands made

needs. Warm weather had occasional which build up the blood, strengthen showers would insure a good crop. the nerves, and safely help to meet the demands of the growing child. Out-ofdoor exercise, neurishing food, plenty of sleep with these tonic pills will cure even the most severe cases of St. Vitns' dance. We offer the following proof: "Up to the age of ten years," says Mrs. Johnson, of Hemford, N. S., 'my son Calvin was as healthy and rugged as any child could be. Then he began to complain that his eyes hurt him, and of pains in the head, and began to fall back in his studies at school. Then I noticed a twitching in constant motion. Our family phy-Vitus' dance. We was under the docter's treatment for some three months, but did not seem to improve.
